### Model Rules of Professional Conduct

*American Bar Association* **The Model Rules of Professional Conduct** provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

### The Miraculous Flying House of Loreto

### Spreading Catholicism in the Early Modern World

*Princeton University Press* In 1295, a house fell from the evening sky onto an Italian coastal road by the Adriatic Sea. Inside, awestruck locals encountered the Virgin Mary, who explained that this humble mud-brick structure was her original residence newly arrived from Nazareth. To keep it from the hands of Muslim invaders, angels had flown it to Loreto, stopping three times along the way. This story of the house of Loreto has been read as an allegory of how Catholicism spread peacefully around the world by dropping miraculously from the heavens. In this book, Karin Vélez calls that interpretation into question by examining historical accounts of the movement of the Holy House across the Mediterranean in the thirteenth century and the Atlantic in the seventeenth century. These records indicate vast and voluntary involvement in the project of formulating a branch of Catholic devotion. Vélez surveys the efforts of European Jesuits, Slavic migrants, and indigenous peoples in Baja California, Canada, and Peru. These individuals contributed to the expansion of Catholicism by acting as unofficial authors, inadvertent pilgrims, unlicensed architects, unacknowledged artists, and unsolicited cataloguers of Loreto. Their participation in portaging Mary's house challenges traditional views of Christianity as a prepackaged European export, and instead suggests that Christianity is the cumulative product of thousands of self-appointed editors. Vélez also demonstrates how miracle narratives can be treated seriously as historical sources that preserve traces of real events. Drawing on rich archival materials, *The Miraculous Flying House of Loreto* illustrates how global Catholicism proliferated through independent initiatives of untrained laymen.

### U.S. History

Published by OpenStax College, *U.S. History* covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. *U.S. History* is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

### Capital of the Mind

*Casemate Publishers* This "elegant portrait of Edinburgh in the age of Enlightenment" reveals a thriving city of artists, architects, scientists, and other pioneers (*Times Literary Supplement*). In the early eighteenth century, Edinburgh, Scotland, was a filthy backwater town synonymous with poverty and disease. Yet by century's end, it had become the marvel of modern Europe, home to the finest minds of the day and their breathtaking innovations in architecture, politics, science, the arts, and economics—all of which continues to echo loudly today. Adam Smith penned *The Wealth of Nations*. James Boswell produced *The Life of Samuel Johnson*. Alongside them, pioneers such as David Hume, Robert Burns, James Hutton, and Sir Walter Scott transformed the way we understand our perceptions and feelings, sickness and health, relations between the sexes, the natural world, and the purpose of existence. In *Capital of the Mind*, James Buchan beautifully reconstructs the intimate geographic scale and boundless intellectual milieu of Enlightenment Edinburgh. With the scholarship of a historian and the elegance of a novelist, he tells the story of the triumph of this unlikely town and those whose vision brought it into being. "As Buchan

says in this marvelous book, 'there is no city like Edinburgh in all the world'." —Sunday Times

## A Little History of the World

### Illustrated Edition

*Yale University Press* E. H. Gombrich's *Little History of the World*, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time, and his text suggests illustrations on every page. This illustrated edition of the *Little History* brings together the pellucid humanity of his narrative with the images that may well have been in his mind's eye as he wrote the book. The two hundred illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. The book incorporates freshly drawn maps, a revised preface, and a new index. Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an enhanced edition of a timeless account of human history.

### The Nature of History Reader

*Psychology Press* The question of what the nature of history is, is now a key issue for all students of history. It is now recognised by many that the past and history are different phenomena and that the way the past is actively historicised can be highly problematic and contested. Older metaphysical, ontological, epistemological, methodological and ethical assumptions can no longer be taken as read. In this timely collection, key pieces of writing by leading historians are reproduced and evaluated, with an explanation and critique of their character and assumptions, and how they reflect upon the nature of the history project. The authors respond to the view that the nature of history has become so disparate in assumption, approach and practice as to require an informed guide that is both self-reflexive, engaged, critical and innovative. This work seeks to aid a positive re-thinking of history today, and will be of use both to students and to their teachers.

### Living with Climate Change

### How Communities Are Surviving and Thriving in a Changing Climate

*CRC Press* The climate has changed and communities across America are living with the consequences: rapid sea level rise, multi-state wildfires, heat waves, and enduring drought. *Living with Climate Change: How Communities Are Surviving and Thriving in a Changing Climate* details the steps cities are taking now to protect lives and businesses, to reduce their vulnerability, and to adapt and make themselves more resilient. The authors included in this book have been directly involved in the successful design and implementation of community-based adaptation and resilience programs. In this book, they apply decades of combined experience in hazard risk reduction, climate change adaptation, and environmental protection to provide timely and practical advice on how to plan for and live with a climate that is changing faster and more erratically than predicted. The book also examines obstacles to local, state, and national action on climate change, includes case studies to illustrate smart, effective policies and practices that have already been put in place, and defines how these actions benefit the economy, the environment, and public health. *Living with Climate Change* provides much-needed guidance for finding and enacting solutions to immediate and future risks of climate change.

### The Industrial Age

### Economy and Society in Britain since 1750

*Routledge* A new edition of this popular single volume survey of the British economy from industrialisation to the present day. This key text has been updated to cover a further decade of Britain's economic and social fortunes. In particular the chapters on the industrial revolution have been extensively revised and there is a new chapter on environmental history. *The Industrial Age* marshals a wealth of statistical and other evidence, using economic theory to analyse recent British economic change.

## Natural and Moral History of the Indies

*Duke University Press* **The Natural and Moral History of the Indies**, the classic work of New World history originally published by José de Acosta in 1590, is now available in the first new English translation to appear in several hundred years. A Spanish Jesuit, Acosta produced this account by drawing on his own observations as a missionary in Peru and Mexico, as well as from the writings of other missionaries, naturalists, and soldiers who explored the region during the sixteenth century. One of the first comprehensive investigations of the New World, Acosta’s study is strikingly broad in scope. He describes the region’s natural resources, flora and fauna, and terrain. He also writes in detail about the Amerindians and their religious and political practices. A significant contribution to Renaissance Europe’s thinking about the New World, Acosta’s **Natural and Moral History of the Indies** reveals an effort to incorporate new information into a Christian, Renaissance worldview. He attempted to confirm for his European readers that a “new” continent did indeed exist and that human beings could and did live in equatorial climates. A keen observer and prescient thinker, Acosta hypothesized that Latin America’s indigenous peoples migrated to the region from Asia, an idea put forth more than a century before Europeans learned of the Bering Strait. Acosta’s work established a hierarchical classification of Amerindian peoples and thus contributed to what today is understood as the colonial difference in Renaissance European thinking.

## The Earth and Its Peoples: A Global History, Volume II: Since 1500

*Cengage Learning* Featuring a beautiful new design, **THE EARTH AND ITS PEOPLES**, Sixth Edition, presents world history in a balanced, global framework, shifting the focus away from political centers of power. This truly global text for the world history survey course employs fundamental themes of “environment and technology” and “diversity and dominance” to explore patterns of humans’ interactions with their surroundings and with each other. The authors’ approach reveals how humanity continues to shape and be shaped by the environment and how dominant structures and traditions are balanced and challenged by alternate beliefs. Special emphasis is given to technological development and how it underlies all human activity. Highly acclaimed in their fields of study, the authors bring a wide array of expertise to the program. A combination of strong scholarship and detailed pedagogy gives the book its reputation for rigor and student accessibility.
