The Music Advantage How learning music helps your child's brain and wellbeing Allen & Unwin Brain research has revealed something extraordinary: learning music and listening to music can grow and repair our brains at any age. Simply clapping in time can assist a young child who is struggling with reading. Learning an instrument can help children of all ages dramatically improve their ability to focus on school work, enhance their memory and improve behaviour. Playing in an orchestra develops children's social skills. Learning music can give every child an advantage, whether they are not coping at school or are doing well already. Dr Anita Collins has visited the labs of leading neuromusical researchers around the world and trialled their techniques herself. With real examples from home and school along with practical strategies, The Music Advantage shows how parents and teachers can support children's development with music from birth to the teenage years. 'Dr Collins' exuberance and infectious enthusiasm shine through as she persuasively argues for the importance of music in every child's education.' - Professor Alan Harvey, author of Music, Evolution and the Harmony of Souls 'Dr Anita Collins' insights highlight the irreplaceable role music plays in the full education of a child.' - Benjamin Northey, Principal Conductor in Residence of the Melbourne Symphony Orchestra Phonics Visual Impairments Determining Eligibility for Social Security Benefits National Academies Press When children and adults apply for disability benefits and claim that a visual impairment has limited their ability to function, the U.S. Social Security Administration (SSA) is required to determine their eligibility. To ensure that these determinations are made fairly and consistently, SSA has developed criteria for eligibility and a process for assessing each claimant against the criteria. Visual Impairments: Determining Eligibility for Social Security Benefits examines SSA's methods of determining disability for people with visual impairments, recommends changes that could be made now to improve the process and the outcomes, and identifies research needed to develop improved methods for the future. The report assesses tests of visual function, including visual acuity and visual fields whether visual impairments could be measured directly through visual task performance or other means of assessing disability. These other means include job analysis databases, which include information on the importance of vision to job tasks or skills, and measures of health-related quality of life, which take a person-centered approach to assessing visual function testing of infants and children, which differs in important ways from standard adult tests. When Tate Collins meets airline pilot Miles Archer, she doesn't think it's love at first sight. They wouldn't even go so far as to consider themselves friends. The only thing Tate and Miles have in common is an undeniable mutual attraction. Once their desires are out in the open, they realize they have the perfect set-up. He doesn't want love, she doesn't have time for love, so that just leaves the sex. Their arrangement could be surprisingly seamless, as long as Tate can stick to the only two rules Miles has for her. Never ask about the past. Don't expect a future. They think they can handle it, but realize almost immediately they can't handle it at all. Hearts get infiltrated. Promises get broken. Rules get shattered. Love gets ugly. So Much More Than the ABCs The Early Phases of Reading and Writing "List of children's literature cited": p. 203-205. Transforming the Workforce for Children Birth Through Age 8 A Unifying Foundation National Academies Press Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.
