The game-changing 1600.io "Orange Book" establishes a new category of premium SAT instructional materials. This groundbreaking text is not a collection of "tricks" or "hacks" for getting around the SAT's function of assessing students' skills. Instead, it meets the test on its own terms by providing comprehensive, clear, and patient education in every mathematical concept that can appear on the exam according to the officially published specifications for the test. The renowned SAT preparation team at 1600.io used their extensive experience based on the tens of thousands of students who have passed through our virtual doors to craft this two-volume set (of which this is Volume I) with a

fanatical attention to every detail, no matter how small, and we poured into it everything we've learned about how to most effectively help each student acquire the firm, confident grasp of math they need to become a confident master of the material - and, therefore, of the math sections of the SAT. Every SAT math topic, clearly explained Our team spent two years analyzing every math problem on every released test to ensure that we provided engaging, cogent, and thorough explanations for all of the needed concepts. We've got problems... ..and our problems are going to be your problems. More than 16 tests' worth of meticulously constructed SAT-style example and practice problems with hundreds of fully-worked-out solutions. A 1600.io invention: SkillDrills(TM) Many problem-solving techniques are composed of building block skills, so rather than forcing students to make the leap right from instruction to tackling test problems, we provide the intermediate step of these innovative mini-problem sets that build essential skills - and students' confidence. Instant topic lookup for released SAT problems Every one of the 1,276 math problems on the released SATs has been cross-referenced with the section of this pair of books where the primary math skill is fully explained, so students are supported for the entire learning cycle. Each chapter in each volume in the series contains chapters which have section problems, chapter problems, SkillDrills, answer keys, and lists of related real problems from released tests. Volume I (this book) contains the following chapters: Foundations Linear Relationships Slope-Intercept Form Standard Form/Parallel and Perpendicular Lines Systems of Linear Equations Linear Inequalities and Absolute Value Exponents and Radicals/Roots Introduction to Polynomials Solving Quadratic Equations> Extraneous Solutions and Dividing Polynomials The Graphs of Quadratic Equations and Polynomials Number of Zeros/Imaginary and Complex Numbers Volume II (available separately) contains the following chapters: Ratios, Probability, and Proportions Percentages Exponential Relationships Scatterplots and Line Graphs Functions Statistics Unit Conversions Angles, Triangles, and Trigonometry Circles and Volume Wormholes Note that this is a two-volume set, with the topics divided between the volumes, so students should purchase both volumes to have the complete text.

Straphanger Saving Our Cities and Ourselves from the Automobile Macmillan Taras Grescoe rides the rails all over the world and makes an elegant and impassioned case for the imminent end of car culture and the coming transportation revolution "I am proud to call myself a straphanger," writes Taras Grescoe. The perception of public transportation in America is often unflattering—a squalid last resort for those with one too many drunk-driving charges, too poor to afford insurance, or too decrepit to get behind the wheel of a car. Indeed, a century of auto-centric culture and city planning has left most of the country with public transportation that is underfunded, ill maintained, and ill conceived. But as the demand for petroleum is fast outpacing the world's supply, a revolution in transportation is under way. Grescoe explores the ascendance of the straphangers—the growing number of people who rely on public transportation to go about the business of their daily lives. On a journey that takes him around the world—from New York to Moscow, Paris, Copenhagen, Tokyo, Bogotá, Phoenix, Portland, Vancouver, and Philadelphia—Grescoe profiles public transportation here and abroad, highlighting the people and ideas that may help undo the damage that car-centric planning has done to our cities and create convenient, affordable, and sustainable urban transportation—and better city living—for all.

SAT For Dummies, with Online Practice John Wiley & Sons The easy way to prepare for the SAT The College Board has announced a redesign to the SAT in the spring of 2016.
