ABNORMAL PSYCHOLOGY

CONTRASTING PERSPECTIVES

Bloomsbury Publishing This groundbreaking core textbook offers a comprehensive overview of different approaches to the assessment and treatment of psychological disorders. The book retains important diagnostic perspectives, including the DSM-5, ICD-10, ICD-11 and PDM, but also widens the scope of coverage beyond mainstream psychiatric models to include psychological, biological, historical, sociocultural and therapeutic approaches. Contemporary and well-balanced, this book provides an even-handed and holistic foundation, allowing students to develop a strong critical mindset while retaining a robust research-driven orientation. **Abnormal Psychology: Contrasting Perspectives:** - features an innovative structure organized by presenting problem, examining each in a broad context of traditional psychiatric and alternative approaches - is grounded in lived experience of disorder: shining a spot-light on service-users through 'Case Examples' scenarios and 'Lived Experience' perspective pieces - supports student learning and critical thinking through engaging 'Controversial Question', 'Try it Yourself' and 'In Depth' - is supported by an impressive online support features including lecture slides, a test bank, instructor manual, student study guide, multiple choice self-test quizzes, flashcard activities and more. This book is ideal for undergraduate and postgraduates students on abnormal psychology, psychopathology, mental health or clinical psychology courses.

VIOLENCE IN SOUTH AFRICA

A VARIETY OF PERSPECTIVES

HSRC Press **Violence in South Africa** contains contributions on various issues related to violence in South Africa. The variety of perspectives, explanations and intervention strategies indicates that violence, its causes and prevention are diverse and complex matters. Hence a single perspective or universal explanation cannot properly explain the phenomenon. Factors related to the micro- and macro-levels, as well as the interaction between these levels, should be considered. The contributions consequently do not deal only with violence of a structural, collective or political nature, but also the far more prevalent forms of interpersonal and small group-violence.

HANDBOOK OF CRIME CORRELATES

Academic Press **The Handbook of Crime Correlates, Second Edition** summarizes more than a century of worldwide research on traits and social conditions associated with criminality and antisocial behavior. Findings are provided in tabular form, enabling readers to determine at a glance the nature of each association. Within each table, results are listed by country, type of crime (or other forms of antisocial behavior), and whether each variable is positively, negatively, or insignificantly associated with offending behavior. Criminal behavior is broken down according to major categories, including violent crime, property crime, drug offenses, sex offenses, delinquency, and recidivism. This book provides a resource for practitioners and academics who are interested in criminal and antisocial behavior. It is relevant to the fields of criminology/criminal justice, sociology, and psychology. No other publication provides as much information about how a wide range of variables—e.g., gender, religion, personality traits, weapons access, alcohol and drug use, social status, geography, and seasonality—correlate with offending behavior. Includes 600+ tables regarding variables related to criminal behavior Consolidates 100+ years of academic research on criminal behavior Findings are identified by country and world regions for easy comparison Lists criminal-related behaviors according to major categories Identifies universal crime correlates

LIVING WITH TERROR, WORKING WITH TRAUMA

A CLINICIAN'S HANDBOOK

Jason Aronson Terrorism and war have engendered a special set of people with distinctive and uniquely contemporary therapeutic needs. How do we cope with the personal experience of political violence? **Living with Terror, Working with Trauma** addresses the ways that mental health practitioners can assist survivors of terrorism. Drawing upon the experience of leading practitioners and renowned experts throughout the world, this edited volume explores the most innovative methods currently employed to help people heal and even grow from traumatic experiences. It argues for a multi-dimensional approach to understanding and treating the effects of terror-related trauma. Comprehensive in scope, **Living with Terror, Working with Trauma** covers psychodynamic, cognitive-behavioral, existential, and neuro-physiological techniques for working with individuals and groups, children and adults, both in the clinic and in the field. The contributors share their personal and clinical experiences in Hiroshima, Cambodia, the Middle East, Vietnam, and other sites of mass violence and terror, including the Holocaust. A special section is devoted to the September 11th. As it addresses the basic existential challenge of finding meaning and creatively transforming one's experience of terror and trauma, this volume explores the territory, identifies the key problems, and presents effective therapeutic solutions.

PSYCHOLOGY AND LAW

Juta and Company Ltd The congruencies between psychology and law are explored in this collection of learning objectives, exercises, and reference material that addresses the intersection of these two disciplines. In addition to practical topics such as crime and policing, the detection of deception and truthfulness, dangerousness and the risk of violence, and the employment of the psychologist as expert witness, it also discusses modern moral issues such as the role and treatment of child witnesses in legal proceedings, investigative psychology and psychological profiling, and the use of insanity and diminished capacity defenses.

STRENGTH BASED PERSPECTIVE IN WORKING WITH CLIENTS WITH MENTAL ILLNESS

A CHINESE CULTURAL ARTICULATION

Nova Publishers This book offers to serve as a guide for professionals in understanding and applying a strength based perspectives for Chinese clients with mental illness and to discuss the Chinese articulation of concepts and practice of these perspective within Chinese culture. Ever since the emergence of a medical model in the explanation of mental illness, the disease model or deficit/problem orientation became the dominant paradigm in perceiving, treating and rehabilitating persons with mental illness. The terms 'mentally ill' and 'mental patient' serve as labels for both professionals, family caregivers and members of community to describe the burden, the needs of care and treatment for persons with mental illness. These labels also justify the establishment and implementation of mental health services. Under the influences of the disease model, persons with mental illness are regarded as subjects for academic research, patients for treatment, clients for intervention, and objects for stigmatisation and labelling.

HANDBOOK OF TEMPERAMENT

Guilford Publications Timely and authoritative, this unique handbook explores the breadth of current knowledge on temperament, from foundational theory and research to clinical applications. Leaders in the field examine basic temperament traits, assessment methods, and what brain imaging and molecular genetics reveal about temperament's biological underpinnings. The book considers the pivotal role of temperament in parent-child interactions, attachment, peer relationships, and the development of adolescent and adult personality and psychopathology. Innovative psychological and educational interventions that take temperament into account are reviewed. Integrative in scope, the volume features extensive cross-referencing among chapters and a forward-looking summary chapter.

THE OXFORD HANDBOOK OF DEVELOPMENTAL PSYCHOLOGY, VOL. 2

SELF AND OTHER

Oxford University Press Research in developmental psychology--which examines the history, origins, and causes of behavior and age-related changes in behavior--seeks to construct a complex, multi-level characterization of behavior as it unfolds in time across a range of time scales, from the milliseconds of reaction time to the days and weeks of childhood, the decades of the human lifespan, and even beyond, to multiple generations. Behavior, in this view, is embedded within what is essentially a dynamic system of relations extending deep within individuals. Thorough and engaging, this handbook explores the impact of this research on what is now known about psychological development, from birth to biological maturity, and it highlights the extent to which the most cutting-edge developmental science reflects a new kind of intellectual synthesis: one that reveals how cultural, social, cognitive, neural, and molecular processes work together to yield human behavior and changes in human behavior. With insightful contributions from more than 50 of the world's leading developmental scientists, these two volumes will serve as an influential and informed text for students and as an authoritative desk reference for years to come.

Academic Conferences and publishing limited These proceedings represent the work of contributors to the 19th European Conference on Cyber Warfare and Security (ECCWS 2020), supported by University of Chester, UK on 25-26 June 2020. The Conference Co-chairs are Dr Thaddeus Eze and Dr Lee Speakman, both from University of Chester and the Programme Chair is Dr Cyril Onwubiko from IEEE and Director, Cyber Security Intelligence at Research Series Limited. ECCWS is a well-established event on the academic research calendar and now in its 19th year the key aim remains the opportunity for participants to share ideas and meet. The conference was due to be held at University of Chester, UK, but due to the global Covid-19 pandemic it was moved online to be held as a virtual event. The scope of papers will ensure an interesting conference. The subjects covered illustrate the wide range of topics that fall into this important and ever-growing area of research.

NUTRITION AND BEHAVIOR, 2ND EDITION**A MULTIDISCIPLINARY APPROACH**

CABI The relationship between nutrition and behaviour is bi-directional in nature, with nutritional factors able to affect activity and disposition, and behavior impacting diet and food intake. This book reviews these links, starting with their complex neurobiological basis, such as in the case of folate deficiency and cognitive decline. It also illustrates how behaviour may determine nutritional choices or status through peer modelling and poor dietary habits. Micronutrients and eating disorders are then critically addressed, with a review of current research methods and results, before extra-nutritional influencers on behaviour such as caffeine, herbal supplements and alcohol are discussed in the final section.
