INFORMATION SYSTEMS FOUNDATIONS

THEORY, REPRESENTATION AND REALITY

ANU E Press This volume contains the papers presented at the third biennial Information Systems Foundations ('Theory, Representation and Reality') Workshop, held at The Australian National University in Canberra from 27-28 September 2006. The focus of the workshop was, as for the others in the series, the foundations of Information Systems as an academic discipline. The particular emphasis was, as in past workshops, the adequacy and completeness of theoretical underpinnings and the research methods employed. At the same time the practical nature of the applications and phenomena with which the discipline deals were kept firmly in view. Accordingly, the papers in this volume range from the unashamedly theoretical in their focus (Designing for Mutability in Information Systems Artifacts; Towards a Unified Theory of Fit: Task, Technology and Individual) to the much more practically oriented (An Action-Centred Approach to Conceptualising Information Support for Routine Work).

POSITIVE LEARNING ENVIRONMENTS : CREATING AND MAINTAINING PRODUCTIVE CLASSROOMS

Cengage AU How do you create a learning environment that's productive; one where students are engaged, learning and happy? And how do you ensure that inappropriate behaviours are kept to a minimum? The second edition of Positive Learning Environments: Creating and Maintaining Productive Classrooms introduces the key concepts teachers need to know to create and maintain their classroom as a positive learning environment. It begins by introducing four essential components that are the cornerstones of creating a positive, productive learning environment. These positive practices set readers on the pathway to success and help them establish classrooms that recognise and encourage appropriate behaviours while reducing the probability of inappropriate behaviours. It then examines in turn each of the four main groups of evidence-based approaches to managing student behaviour: behavioural, cognitive behavioural, psychoeducational and social justice approaches. For each it discusses the theories that inform them, their practical applications for fostering appropriate behaviours and also when and how to use them to proactively intervene, if necessary. By the end, readers are empowered to select appropriate theories, approaches and strategies and bring these together to develop their individualised classroom management plan: one that suits their own theoretical beliefs, professional philosophy and teaching style.
