This book proposes that nationalism, rather than a political doctrine, is a way of making sense of the world which results from the combination of a set of definite assumptions. The work analyzes how each one of these premises was accepted and negotiated by literati, intellectuals, historians, and other scholars in the late nineteenth and early twentieth centuries. The results of this research showcase how the reception of the new nationalist worldview crucially affected images of the past, the present, and the future in both societies and decisively framed cultural, social, and political debate. In addition, they likewise evidence the fundamental role that historical narratives play in the crystallization of national identities. This book is perfect for readers interested in China and Britain during this time period, but also to anyone attracted to new ways of conceiving nationalism and its role in our world. **World Civilizations: Volume I: To 1700** *Cengage Learning* For an accessible, comprehensive global survey of the world's major civilizations, Adler and Pouwels's **WORLD CIVILIZATIONS** offers a great balance between detail and brevity. Joseph Esherick reconstructs the early history of the Boxers, challenging the traditional view that they grew from earlier anti-dynastic sects, and stressing instead the impact of social ecology and popular culture. **Learning to Be You How Our True Identity in Christ Sets Us Free** *Baker Books* We all want the confidence that comes from living out of our true identity, but how do we get there? We don't magically discover our true selves when we reach our twenties. And some of us spend our entire lives feeling like we are living a lie. We can be torn apart by our duplicity or we can become so comfortable with putting on various personas to suit our situation that we don't even realize we're doing it. But if we are followers and disciples of Christ, our identity is already decided. What we need to learn is how to understand and embrace it. In this honest and penetrating book, David D. Swanson calls readers to take off their masks, discover the true source of their identities, and enjoy the peace and satisfaction that comes from being authentic and transparent to ourselves, our God, and the people who surround us. He gently leads readers from their hiding places to a life of conviction and courage. **The School World Contemplating Historical Consciousness Notes from the Field** *Berghahn Books* The last several decades have witnessed an explosion of new empirical research into representations of the past and the conditions of their production, prompting claims that we have entered a new era in which the past has become more "present" than ever before. **Contemplating Historical Consciousness** brings together leading historians, ethnographers, and other scholars

who give illuminating reflections on the aims, methods, and conceptualization of their own research as well as the successes and failures they have encountered. This rich collective account provides valuable perspectives for current scholars while charting new avenues for future research. *Educational Philosophy for a Post-secular Age* Taylor & Francis

*Educational Philosophy for a Post-secular Age* reinterprets post-secular insights for educational theory by recognising that the persistence of religion in contemporary life raises new questions about the place of religion in education. Two common assumptions are critically examined: first, that the better educated a society becomes, the more secular it becomes, and second, that religion can and should be separated from public education. For too long, religion has had an uneasy relationship with education, being seen either as a foreign invader, a problem to be solved, or as a mechanism by which to reinforce particular religious, cultural or national identities. In order to move educational theory beyond the debates about indoctrination and competing rights between parents, children and nation states, the argument undercuts rationalist conceptions of religion and education that tend to frame the debates in terms of competing truth claims or worldviews. Drawing on a diverse range of theological, philosophical and educational sources, this book demonstrates the continuing significance of the Christian mystical tradition to educational theory. It proposes an exploration of democratic education that brings together two apparently irreconcilable poles: the meaning of religion in education and contemporary life, and the need for a deliberative democratic process that is fit for the post-secular age. It argues that religious literacy can be served by democratic encounters in public religious education. *Educational Philosophy for a Post-secular Age* will be of interest to researchers, academics and postgraduate students in the fields of the philosophy of education, philosophy of religion, education policy, politics, anthropology and cultural theory. It will particularly appeal to those, of both secular and religious persuasions, interested in the place of religion in education and public life.

*Machine Learning and Knowledge Discovery in Databases European Conference, ECML PKDD 2020, Ghent, Belgium, September 14-18, 2020, Proceedings, Part I* Springer Nature The 5-volume proceedings, LNAI 12457 until 12461 constitutes the refereed proceedings of the European Conference on Machine Learning and Knowledge Discovery in Databases, ECML PKDD 2020, which was held during September 14-18, 2020. The conference was planned to take place in Ghent, Belgium, but had to change to an online format due to the COVID-19 pandemic. The 232 full papers and 10 demo papers presented in this volume were carefully reviewed and selected for inclusion in the proceedings. The volumes are organized in topical sections as follows: Part I: Pattern Mining; clustering; privacy and fairness; (social) network analysis and computational social science; dimensionality reduction and autoencoders; domain adaptation; sketching, sampling, and binary projections; graphical models and causality; (spatio-) temporal data and recurrent neural networks; collaborative filtering and matrix completion. Part II: deep learning optimization and theory; active learning; adversarial learning; federated learning; Kernel methods and online learning; partial label learning; reinforcement learning; transfer and multi-task learning; Bayesian optimization and few-shot learning. Part III: Combinatorial optimization; large-scale optimization and differential privacy; boosting and ensemble methods; Bayesian methods; architecture of neural networks; graph neural networks; Gaussian processes; computer vision and image processing; natural language processing; bioinformatics. Part IV: applied data science: recommendation; applied data science: anomaly detection; applied data science: Web mining; applied data science: transportation; applied data science: activity recognition; applied data science: hardware and manufacturing; applied data science: spatiotemporal data. Part V: applied data science: social good; applied data science: healthcare; applied data science: e-commerce and finance; applied data science: computational social science; applied data science: sports; demo track.

*Anesthesiology: A Problem-Based Learning Approach* Oxford University Press Linking existing knowledge to new knowledge by presenting it in the form of a case or a problem is a popular and effective educational approach resulting in better retention of the knowledge and improved ability to apply that knowledge to solve real problems. This problem-based learning (PBL) method was introduced into medical education at McMaster University in Ontario, Canada, in 1969. Since then it has been widely incorporated into secondary, undergraduate, and graduate education in a variety of disciplines worldwide. This new volume for the Anesthesiology Problem-Based Learning series reviews topics in general anesthesiology utilizing the PBL approach. Each chapter deals with conditions and problems in anesthesia practice presented as a case stem with questions to encourage critical thinking, followed by an evidence-based discussion and multiple-choice questions for self-assessment. Current in its knowledge of organ systems and management, the text keeps pace with new technology, new drugs, and new surgical techniques coupled with current guidelines for anesthetic management. Cases highlight the practical issues that arise in the operating room and offers solutions for them. The book can be used to review an upcoming clinical case or as a PBL tool. The Stem Case and Key Questions and Discussion sections can serve as the basis for interactive learning experiences for study groups or as a broad yet in-depth clinical review of the specialty for the individual learner. Self-assessment questions can be used as a measure of knowledge acquisition or simply as a question bank to prepare for examinations.

*The Antinomies of Realism* Verso Books A groundbreaking analysis of the nineteenth-century novel *The Antinomies of Realism* is a history of the nineteenth-century realist novel and its legacy told without a glimmer of nostalgia for artistic achievements that the movement of history makes it impossible to recreate. The works of Zola, Tolstoy, Pérez Galdós, and George Eliot are in the most profound sense inimitable, yet continue to dominate the novel form to this day. Novels to emerge since struggle to reconcile the social conditions of their own creation with the history of this mode of writing: the so-called modernist novel is one attempted solution to this conflict, as is the ever-more impoverished variety of commercial narratives—what today’s book reviewers dub “serious novels,” which are an attempt at the impossible endeavor to roll back the past. Fredric Jameson examines the most influential theories of artistic and literary realism, approaching the subject himself in terms of the social and historical preconditions for realism’s emergence. The realist novel combined an attention to the body and its states of feeling with a focus on the quest for individual realization within the confines of history. In contemporary writing, other forms of representation—for which the term “postmodern” is too glib—have become visible: for example, in the historical fiction of Hilary Mantel or the stylistic plurality of David Mitchell’s novels.

Contemporary fiction is shown to be conducting startling experiments in the representation of new realities of a global social totality, modern technological warfare, and historical developments that, although they saturate every corner of our lives, only become apparent on rare occasions and by way of the strangest formal and artistic devices. In a coda, Jameson explains how “realistic” narratives survived the end of classical realism. In effect, he provides an argument for the serious study of popular fiction and mass culture that transcends lazy journalism and the easy platitudes of recent cultural studies. *The Pluto Files: The Rise and Fall of America's Favorite Planet* W. W. Norton & Company The New York Times bestseller: "You gotta read this. It is the most exciting book about Pluto you will ever read in your life." —Jon Stewart When the Rose Center for Earth and Space at the American Museum of Natural History reclassified Pluto as an icy comet, the New York Times proclaimed on page one, "Pluto Not a Planet? Only in New York." Immediately, the public, professionals, and press were choosing sides over Pluto's planethood. Pluto is entrenched in our cultural and emotional view of the cosmos, and Neil deGrasse Tyson, award-winning author and director of the Rose Center, is on a quest to discover why. He stood at the heart of the controversy over Pluto's demotion, and consequently Plutophiles have freely shared their opinions with him, including endless hate mail from third-graders. With his inimitable wit, Tyson delivers a minihistory of planets, describes the oversized characters of the people who study them, and recounts how America's favorite planet was ousted from the cosmic hub. *World History, Culture, and Geography The Modern World* This resource book is designed to assist teachers in implementing California's history-social science framework at the 10th grade level. The models support implementation at the local level and may be used to plan topics and select resources for professional development and preservice education. This document provides a link between the framework's course descriptions and teachers' lesson plans by suggesting substantive resources and instructional strategies to be used in conjunction with textbooks and supplementary materials. The resource book is divided into eight units: (1) "Unresolved Problems of the Modern World"; (2) "Connecting with Past Learnings: The Rise of Democratic Ideas"; (3) "The Industrial Revolution"; (4) "The Rise of Imperialism and Colonialism: A Case Study of India"; (5) "World War I and Its Consequences"; (6) "Totalitarianism in the Modern World: Nazi Germany and Stalinist Russia"; (7) "World War II: Its Causes and Consequences"; and (8) "Nationalism in the Contemporary World." Each unit contains references. (EH) *Computational Engineering of Historical Memories With a Showcase on Afro-Eurasia (ca 1100-1500 CE)* Taylor & Francis Nanetti outlines a methodology for deploying artificial intelligence and machine learning to enhance historical research. Historical events are the treasure of human experiences, the heritage that societies have used to remain resilient and express their identities. Nanetti has created and developed an interdisciplinary methodology supported by practice-based research that serves as a pathway between historical and computer sciences to design and build computational structures that analyse how societies create narratives about historical events. This consilience pathway aims to make historical memory machine-understandable. It turns history into a computational discipline through an interdisciplinary blend of philological accuracy, historical scholarship, history-based media projects, and computational tools. Nanetti presents the theory behind this methodology from a humanities perspective and discusses its practical application in user interface and experience. An essential read for historians and scholars working in the digital humanities. *U.S. Army War College Military Education In A Democracy* Temple University Press A look inside the U.S. Army War College. *Chamber's London Journal of History, Literature, Poetry, Biography & Adventure* Written in the Rain *Citizenship and the Origins of Women's History in the United States* University of Pennsylvania Press *Citizenship and the Origins of Women's History in the United States* challenges twenty-first-century assumptions of nineteenth-century women's history by tracing the ways women's history was politicized, particularly in light of the growing activism of women and the first woman's rights movement. *China and the West at the Crossroads* Essays on Comparative Literature and Culture Springer Beginning with a retrospective of the past century, this book offers a panoramic picture of Chinese comparative literature, from its nascence in the early 1920s, through its evolution in the 1980s, to the new development at the turn of the century, ending with a prospective look at the future of comparative literature in the 21st century. The articles presented here reveal the author's deep understandings of the literature and culture of her own country and those of other countries. A rich array of case studies and in-depth theorizing make it an extremely interesting and enlightening read. Prof. Daiyun Yue is a prominent professor at Peking University and a leading figure in Chinese comparative literature. She has served as Head of the Institute for Comparative Literature and Cultural Studies, PKU (1984–1998) and the third president of the Chinese Comparative Literature Association (1989–2014). Further, she is the founder of *Dialogue Transcultural*, a much-acclaimed journal of comparative literature. Prof. Yue approaches outstanding literature as a bridge to link people of different cultural traditions: “The reason why interdisciplinary literary research between two alien cultures is possible is because dialog between alien cultures, along with exchange and understanding, is more readily realized through literature.” Herein lies the value of comparative literature. *Princeton Alumni Weekly* *princeton alumni weekly* *The Crisis* *The Crisis*, founded by W.E.B. Du Bois as the official publication of the NAACP, is a journal of civil rights, history, politics, and culture and seeks to educate and challenge its readers about issues that continue to plague African Americans and other communities of color. For nearly 100 years, *The Crisis* has been the magazine of opinion and thought leaders, decision makers, peacemakers and justice seekers. It has chronicled, informed, educated, entertained and, in many instances, set the economic, political and social agenda for our nation and its multi-ethnic citizens. *The Open Classroom* Distance Learning in Schools Routledge The 'e-revolution' that has swept the higher and further education sector over the last decade is now starting to make a real impact in school level teaching and learning around the world. There is a rapidly growing interest in, and demand for open and distance learning solutions for schools, not only in terms of improving access (for example, for the children of travellers, or for those in geographically remote areas) but also in terms of improving pedagogy for more 'conventional' teaching, by offering teachers, parents and pupils greater support and access to learning materials and resources. This ground-breaking book, with contributions from around the world including the UK, US, New Zealand, Canada and India, looks at the key areas of development in this new field, provides best practice examples

and inspiring case studies and will increase the awareness of the opportunities and challenges in this potentially huge field. On History Introduction to World History (1831); Opening Address at the Faculty of Letters, 9 January 1834; Preface to History of France (1869) *Open Book Publishers* Edited by Lionel Gossman, this volume contains three programmatic essays by Michelet. The first two are available here for the first time in English translation. The third, the Preface to the 1869 edition of the *Histoire de France*, originally published in its first English translation by Edward K. Kaplan in his *Michelet's Poetic Vision* (1977), has been revised by the translator for this volume. One of the greatest Romantic historians and immensely popular during his lifetime, Jules Michelet (1798-1874) fell into disfavour among the positivist historians who came after him and who regarded his work with disdain as "literature." In the 1920s and 30s, however, he began to be rediscovered and rehabilitated by the members of the influential *Annales* school. The objects of Michelet's interest—living conditions, popular mentalities, laws and the arts, the historian's relation to the objects of his study, no less than political history—have since come to occupy a central place in modern historical research. A free online-only supplement contains an essay on Michelet by John Stuart Mill from the *Edinburgh Review* (January 1844) and several studies of Michelet by Lionel Gossman. The *Classic Children's Television Quiz Book* *Andrews UK Limited* Compiled by acclaimed television scriptwriter and novelist Dean Wilkinson, *The Classic Children's Television Quiz Book* is packed with fascinating facts about the shows you loved as a child as well as those programmes currently capturing the imagination of today's young audiences. From timeless classics like *Thunderbirds*, *Blue Peter* and *Dr Who* to the thoroughly up-to-date *Sponge Bob*, the 1,000 questions in this book will not only test your memory of the characters you grew up with but your family's knowledge of their current favourites. With a fitting foreword by popular family TV presenters Ant and Dec this book is sure to prove a hit with television lovers of all ages and, in particular, those members of the older generation who have remained young at heart. *Congressional Record Proceedings and Debates of the ... Congress APEX Calculus Version 3.0* The European history is entirely at sea *Philaletheians UK* Civilization is an inheritance, a patrimony that passes from race to race along the ascending and descending paths of cycles. In its dark ages, Europe rejected the testimony of Antiquity, calling such sages as Herodotus and other learned Greeks the Fathers of Lies. Lemuria and the Atlantic Continent with their high civilizations, were submerged and drowned. The two catastrophes were separated by just , years. Our present Fifth Race began in Asia a million years ago. Greek, Roman, and even Egyptian civilizations are nothing compared to the civilizations that began with the Third Race. Greeks and Romans were small sub-races, and Egyptians part and parcel of our own "Caucasian" stock. Look at the latter, and at India: having reached their highest civilization and learning, both went down. Today's India, one of the first and most powerful off-shoots of the mother Race, is still struggling to resume her place in history. A series of far greater civilizations than our own existed before (as well as after the Glacial Period) at various points of the globe, reached the apex of glory, and died. The Chaldees were at the apex of their Occult fame well before the so-called "Bronze Age." The highest people now on earth, in terms of spirituality, belong to the first sub-race of the Fifth Root-race — the Aryan Asiatics. The highest, in terms of physical intellectuality, are those of the last sub-race of the Fifth, the "White Conquerors." Black magic, bestiality, selfishness, and self-adoration spelled the demise of Atlantis and the rise of evil. The British Islands will be the first to be destroyed by submarine volcanos and water; France and other lands will follow suit. When they reappear, very few seas and great waters will be found then on our globe. The approach of every new obscuration is always signalled by cataclysms, earthquakes, and fire. Though perfected in materiality, the Atlanteans degenerated in spirituality. Atlantis and its proud Fourth Race inhabitants sunk , years ago, coinciding with the elevation of the Alps. When our present race reaches its zenith of intellectuality, and its peak of materialistic "civilization," unable to go any higher towards absolute evil, its progress will be arrested by one of such cataclysmic changes; and it's sub-races will go down their respective cycles, after a short period of glory and learning. See the remnants of the Atlanteans, the old Greeks and Romans, how great, how short, and how evanescent were their days of fame and glory! Every race had its adepts, who are allowed to give out as much of their knowledge as the men of that race deserve. The adepts of the last race will be far higher than any of the preceding races, for among them will abide the future Planetary Spirit, whose duty will be to instruct or "refresh the memory" of the first race of the Fifth Round men after this planet's future obscuration. A Jewish State in Palestine
