KEY=BELCOR - CHRIS ROTH

Fast Ion Transport in Solids

Springer Science & Business Media The main motivation for the organization of the Advanced Research Workshop in Belgirate was the promotion of discussions on the most recent issues and the future perspectives in the field of Solid State Ionics. The location was chosen on purpose since Belgirate was the place were twenty years ago, also then under the sponsorship of NATO, the very first international meeting on this important and interdisciplinary field took place. That meeting was named "Fast Ion Transport in Solids" and gathered virtually everybody at that time having been active in any aspect of motion of ions in solids. The original Belgirate Meeting made for the first time visible the technological potential related to the phenomenon of the fast ionic transport in solids and, accordingly, the field was given the name "Solid State Ionics". This field is now expanded to cover a wide range of technologies which includes chemical sensors for environmental and process control, electrochromic windows, mirrors and displays, fuel cells, high performance rechargeable batteries for stationary applications and electrotraction, chemotronics, semiconductor ionics, water electrolysis cells for hydrogen economy and other applications. The main idea for holding an anniversary meeting was that of discussing the most recent issues and the future perspectives of Solid State Ionics just twenty years after it has started at the same location on the lake Maggiore in North Italy.

Right the First Time

A Practical Handbook on High Speed PCB and System Design

Semiconductor Device Reliability

Springer Science & Business Media This publication is a compilation of papers presented at the Semiconductor Device Reliability Workshop sponsored by the NATO International Scientific Exchange Program. The Workshop was held in Crete, Greece from June 4 to June 9, 1989. The objective of the Workshop was to review and to further explore advances in the field of semiconductor reliability through invited paper presentations and discussions. The technical emphasis was on quality assurance and reliability of optoelectronic and high speed semiconductor devices. The primary support for the meeting was provided by the Scientific Affairs Division of NATO. We are indebted to NATO for their support and to Dr. Craig Sinclair, who admin isters this program. The chapters of this book follow the format and order of the sessions of the meeting. Thirty-six papers were presented and discussed during the five-day Workshop. In addition, two panel sessions were held, with audience participation, where the particularly controversial topics of burn-in and reliability modeling and prediction methods were discussed. A brief review of these sessions is presented in this book.

Leaders of Learning

How District, School, and Classroom Leaders Improve Student Achievement

Solution Tree Press For many years, the authors have been fellow travelers on the journey to help educators improve their schools. Their first coauthored book focuses on district leadership, principal leadership, and team leadership and addresses how individual teachers can be most effective in leading students—by learning with colleagues how to implement the most promising pedagogy in their classrooms

Gay Rights vs. Religious Liberty?

The Unnecessary Conflict

Oxford University Press Should religious people who conscientiously object to facilitating same-sex weddings, and who therefore decline to provide cakes, photography, or other services, be exempted from antidiscrimination laws? This issue has taken on an importance far beyond the tiny number who have made such claims. Gay rights advocates fear that exempting even a few religious dissenters would unleash a devastating wave of discrimination. Conservative Christians fear that the law will treat them like racists and drive them to the margins of American society. Both sides are mistaken. The answer lies, not in abstract principles, but in legislative compromise. This book clearly and empathetically engages with both sides of the debate. Koppelman explains the basis of antidiscrimination law, including the complex idea of dignitary harm. He shows why even those who do not regard religion as important or valid nonetheless have good reasons to support religious liberty, and why even those who regard religion as a value of overriding importance should nonetheless reject the extravagant power over nonbelievers that the Supreme Court has recently embraced. Koppelman also proposes a specific solution to the problem: that religious exemptions be granted only to the few businesses that are willing to announce their compunctions and bear the costs of doing so. His approach makes room for America's enormous variety of deeply held beliefs and ways of life. It can help reduce the toxic polarization of American politics.

Data for Continuous Programmatic Improvement

Steps Colleges of Education Must Take to Become a Data Culture

[Routledge](#) This book addresses the issue of data use in educator preparation programs towards continuous programmatic improvement. With an aim to increase the rigor in both research and practice in educational administration and teacher education, this volume will analyze the longstanding quality concerns about teacher and leadership preparation and standards for programs and educators, as well as controversies concerning national accreditation and federal efforts to mandate program reporting data. By exploring the policies and practices that influence departments of education, this volume examines the increasing pressures to improve institutional functioning, within a complex system of university, state, and national structures and organizations.

Mozart's Piano Music

[Oxford University Press](#) Mozart's emergence as a mature artist coincides with the rise to prominence of the piano, an instrument that came alive under his fingers and served as medium for many of his finest compositions. In *Mozart's Piano Music*, William Kinderman reconsiders common assumptions about Mozart's life and art while offering comprehensive and incisive commentary on the solo music and concertos. After placing Mozart's pianistic legacy in its larger biographical and cultural context, Kinderman addresses the lively gestural and structural aspects of Mozart's musical language and explores the nature of his creative process. Incorporating the most recent research throughout this encompassing study, Kinderman expertly surveys each of the major genres of the keyboard music, including the four-hand and two-piano works. Beyond examining issues such as Mozart's earliest childhood compositions, his musical rhetoric and expression, the social context of his Viennese concertos, and affinities between his piano works and operas, Kinderman's main emphasis falls on detailed discussion of selected individual compositions.

Translating For Singing

The Theory, Art and Craft of Translating Lyrics

[Bloomsbury Publishing](#) *Translating for Singing* discusses the art and craft of translating singable lyrics, a topic of interest in a wide range of fields, including translation, music, creative writing, cultural studies, performance studies, and semiotics. Previously, such translation has most often been discussed by music critics, many of whom had neither training nor experience in this area. Written by two internationally-known translators, the book focusses mainly on practical techniques for creating translations meant to be sung to pre-existing music, with suggested solutions to such linguistic problems as those associated with rhythm, syllable count, vocal burden, rhyme, repetition and sound. Translation theory and translations of lyrics for other purposes, such as surtitles, are also covered. The book can serve as a primary text in courses on translating lyrics and as a reference and supplementary text for other courses and for professionals in the fields mentioned. Beyond academia, the book is of interest to professional translators and to librettists, singers, conductors, stage directors, and audience members.

Essentials of Psychological Assessment Supervision

[John Wiley & Sons](#) The only pocket-size reference on supervising psychological testing and assessment In 2014, the American Psychological Association (APA) adopted a set of guidelines for clinical supervision for health service psychology. While technically covered by these guidelines, supervising clinical psychological assessment includes additional tasks (such as ensuring accurate administration, scoring, and interpretation of tests) and tensions. Supervisors must often instruct supervisees on the data-integration process—which can involve more direct teaching than standard clinical supervision—while encompassing the same interpersonal, therapeutic, and less structured guiding aspects as psychotherapy supervision. It is increasingly common to view clinical supervision in the assessment process and supervision of psychotherapy as two significantly different tasks. Surprisingly, there is very little training and guidance available on appropriate, effective, and beneficial methods of psychological assessment supervision. *Essentials of Psychological Assessment Supervision* seeks to remedy the lack of literature in this area, offering guidance on supervising psychological testing and assessment. This much-needed guide provides supervisors with authoritative, up-to-date information on guidelines relevant to assessment supervision. Additionally, detailed coverage of supervision of cognitive, personality/emotional, psychoeducational, neuropsychological, forensic, and therapeutic assessments, among others, provide supervisors with guidance and structure in the supervision process. Focusing on practical application, this book offers guidance on topics such as assessment models appropriate in different areas of assessment; diversity issues; evaluation and feedback of supervisee performance; and ethical, legal, and regulatory considerations relevant in each assessment context. An invaluable resource for practitioners, this book: Offers practical advice on supervising a wide range of clinical psychological assessments Includes contributions from experts in their respective subfields Provides guidance on incorporating new American Psychological Association (APA) and Society for Personality Assessment (SPA) guidelines into the supervision process Fills an urgent need for an up-to-date reference on assessment supervision *Essentials of Psychological Assessment Supervision* is a must-have reference for both psychology practitioners who supervise the assessment process and instructors of psychological testing and assessment.

Urban Heat Stress and Mitigation Solutions

An Engineering Perspective

Routledge This book provides the reader with an understanding of the impact that different morphologies, construction materials and green coverage solutions have on the urban microclimate, thus affecting the comfort conditions of urban inhabitants and the energy needs of buildings in urban areas. The book covers the latest approaches to energy and outdoor comfort measurement and modelling on an urban scale, and describes possible measures and strategies to mitigate the effects of the mutual interaction between urban settlements and local microclimate. Despite its relevance, only limited literature is currently devoted to appraising—from an engineering perspective—the intertwining relationships between urban geometry and fabrics, energy fluxes between buildings and their surroundings, outdoor microclimate conditions and building energy demands in urban areas. This book fills this gap by first discussing the physical processes that govern heat and mass transfer at an urban scale, while emphasizing the role played by different spatial arrangements, manmade materials and green infrastructures on the outdoor microclimate. The first chapters also address the implications of these factors on the outdoor comfort conditions experienced by pedestrians, and on the buildings' energy demand for space heating and cooling. Then, based upon cutting-edge experimental activities and simulation work, this book demonstrates current and forthcoming adaptation and mitigation strategies to improve the urban microclimate and its impact on the built environment, such as cool materials, thermochromic and retroreflective finishing materials, and green infrastructures applied either at a building scale or at the urban scale. The effect of these solutions is demonstrated for different cities worldwide under a range of climate conditions. Finally, the book opens a wider perspective by introducing the basic elements that allow fuel poverty, raw materials consumption, and the principles of circular economy in the definition of a resilient urban settlement.

Musicians and Composers of the 20th Century

Contracts and Commercial Transactions

Aspen Publishing Responding to the call to place more emphasis on practical skills, *Contracts and Commercial Transactions* is a groundbreaking text that immerses the reader in real agreements made between sophisticated parties--so the reader can develop the ability to read, understand, and draft contracts effectively. Drawing upon their collective experiences in the classroom and the boardroom as well as in law-firm and in-house practice, authors David Zarfes and Michael L. Bloom, in *Contracts and Commercial Transactions*, explore actual agreements between sophisticated parties. Along the way, they teach the reader to read and understand contracts, with an emphasis on how a decision maker--be it a judge, arbitrator, corporate executive, or senior partner--might later understand those same contracts. *Contracts and Commercial Transactions* features: Actual agreements, formatted as whole documents, that support the exercise of contract reading and analysis Insight and advice from expert practitioners, from law firms such as Sidley Austin and Simpson Thacher and companies such as Microsoft and JPMorgan Chase , that emphasize the realities of legal practice from the perspective of "real-world" lawyers Explanations and analysis from esteemed academics, at law schools such as Chicago and NYU, that explain the nuances of legal matters that pertain to contractual documents Focus points that preface each contract highlight key aspects of the document Methodical and repeated exposure to provisions that teach the reader to recognize and understand contractual concepts A consistent emphasis on the "building block" provisions typically found in contracts Drafting tips integrated throughout the book

All Classical Music Explained

A History of Singing

Cambridge University Press Why do we sing and what first drove early humans to sing? How might they have sung and how might those styles have survived to the present day? This history addresses these questions and many more, examining singing as a historical and cross-cultural phenomenon. It explores the evolution of singing in a global context - from Neanderthal Man to Auto-tune via the infinite varieties of world music from Orient to Occident, classical music from medieval music to the avant-garde and popular music from vaudeville to rock and beyond. Considering singing as a universal human activity, the book provides an in-depth perspective on singing from many cultures and periods: western and non-western, prehistoric to present. Written in a lively and entertaining style, the history contains a comprehensive reference section for those who wish to explore the topic further and will appeal to an international readership of singers, students and scholars.

Shakespeare and Authority

Citations, Conceptions and Constructions

Springer This book examines conceptions of authority for and in Shakespeare, and the construction of Shakespeare as literary and cultural authority. The first section, *Defining and Redefining Authority*, begins by re-defining the concept of Shakespeare's sources, suggesting that 'authorities' and 'resources' are more appropriate terms. Building on this conceptual framework, the remainder of this section explores linguistic and discursive authority more broadly. The second section, *Shakespearean Authority*, considers the construction, performance and questioning of authority in Shakespeare's plays. Essays here range from examinations of monarchical authority to discussions of household authority, literary authority and linguistic ownership. The final part, *Shakespeare as Authority*, then traces the increasing establishment of Shakespeare as an authority from the eighteenth to the twenty-first century in a series of essays that explore Shakespearean authority for editors, actors, critics, authors, readers and audiences. The volume concludes with two essays that reassess Shakespeare as an authority for visual culture - in the cinema and in contemporary art.

Pioneers of Jazz

The Story of the Creole Band

Oxford University Press Thanks to the pioneering tours of the Creole Band, jazz began to be heard nationwide on the vaudeville stages of America from 1914 to 1918. This seven-piece band toured the country, exporting for the first time the authentic jazz strains that had developed in New Orleans at the start of the 20th century. The band's vaudeville routines were deeply rooted in the minstrel shows and plantation clichés of American show business in the late 19th century, but its instrumental music was central to its performance and distinctive and entrancing to audiences and reviewers. *Pioneers of Jazz* reveals at long last the link between New Orleans music and the jazz phenomenon that swept America in the 1920s. While they were the first important band from New Orleans to attain national exposure, The Creole Band has not heretofore been recognized for its unique importance. But in his monumental, careful research, jazz scholar Lawrence Gushee firmly establishes the group's central role in jazz history. Gushee traces the troupe's activities and quotes the reaction of critics and audiences to their first encounters with this new musical phenomenon. While audiences often expected (and got) a kind of minstrel show, the group transcended expectations, taking pride in their music and facing down the theatrical establishment with courage. Although they played the West Coast and Canada, most of their touring centered in the heartland. Most towns of any size in Iowa, Illinois, and Indiana heard them, often repeatedly, and virtually all of their appearances were received with wild enthusiasm. After four years of nearly incessant traveling, members of the band founded or joined groups in Chicago's South Side cabaret scene, igniting the craze for hot New Orleans music for which the Windy City was renowned in the early 1920s. The best-known musicians in the group--cornetist Freddie Keppard, clarinetist Jimmy Noone and string bassist Bill Johnson--would play a significant role in jazz, becoming famous for recordings in the 1920s. Gushee effectively brings to life each member of the band and discusses their individual contributions, while analyzing the music with precision, skillful and exacting documentation. Including many never before published photos and interviews, the book also provides an invaluable and colorful look at show business, especially vaudeville, in the 1910s. While some of the first jazz historians were aware of the band's importance, attempts to locate and interview surviving members (three died before 1935) were sporadic and did little or nothing to correct the mostly erroneous accounts of the band's career. The jazz world has long known about Gushee's original work on this previously neglected subject, and the book represents an important event in jazz scholarship. *Pioneers of Jazz* brilliantly places this group's unique importance into a broad cultural and historical context, and provides the crucial link between jazz's origins in New Orleans and the beginning of its dissemination across the country.

From Three to Five

By the summer of 2011, Senator George Vincent, a Democratic senior senator from Ohio and staunch supporter of the president in 2008, realized that he could support neither the president nor the likely nominee of the Republican Party in the upcoming 2012 election. The senator had come to the conclusion that the leadership of both political parties was far too close to the extremes of each party. No one running for the presidency represented his views of and for the United States of America. Senator Vincent formed the American Exceptionalism Party and spent every waking hour, collected every political marker he had earned during his political career, and invested most of his personal wealth to legally qualify his fledgling little political party in every state. The Senator found an unknown vice presidential candidate and easily prevailed in every primary race of his own political party in the winter and spring of 2012. Few knew of or followed the primary campaign of this new American Exceptionalism Party and of those who did, most viewed the campaign as nothing more than hubris. With the first nominating convention of the American Exceptionalism Party days away, a few politically

savvy voters and academicians began to ponder the possibility that Senator George Vincent and his nascent political party could strike a chord with the voters. From Three to Five is the story of the country's journey into the world of three serious political parties with its resulting political and Constitutional mayhem.

Enhancing Security, Sustainability and Resilience in Energy, Food and Water

MDPI This book looks at the ways that energy, food, and water help to create connections between sustainability and security. The concept of security is in our current societies increasingly connected with sustainability, which seeks to ensure that we as humans are able to live and prosper on this planet now and in the future. The concepts of energy security, food security, and water security—used separately or together—manifest the burgeoning linkages between security and sustainability. This book brings together ten scientific articles that look at different aspects of security, sustainability, and resilience with an emphasis on energy, food, and/or water in the context of Finland and Europe. Together, the articles portray a rich picture on the diverse linkages between both energy, food, and water, and between security and sustainability. In sum, the articles and related preface conclude that ensuring sustainable security—or secure sustainability—requires systemic, structured processes that link the policies and actors in these two important but still distant fields.

The Student Aid Game

Meeting Need and Rewarding Talent in American Higher Education

Princeton University Press Student aid in higher education has recently become a hot-button issue. Parents trying to pay for their children's education, college administrators competing for students, and even President Bill Clinton, whose recently proposed tax breaks for college would change sharply the federal government's financial commitment to higher education, have staked a claim in its resolution. In *The Student Aid Game*, Michael McPherson and Morton Owen Schapiro explain how both colleges and governments are struggling to cope with a rapidly changing marketplace, and show how sound policies can help preserve the strengths and remedy some emerging weaknesses of American higher education. McPherson and Schapiro offer a detailed look at how undergraduate education is financed in the United States, highlighting differences across sectors and for students of differing family backgrounds. They review the implications of recent financing trends for access to and choice of undergraduate college and gauge the implications of these national trends for the future of college opportunity. The authors examine how student aid fits into college budgets, how aid and pricing decisions are shaped by government higher education policies, and how competition has radically reshaped the way colleges think about the strategic role of student aid. Of particular interest is the issue of merit aid. McPherson and Schapiro consider the attractions and pitfalls of merit aid from the viewpoint of students, institutions, and society. *The Student Aid Game* concludes with an examination of policy options for both government and individual institutions. McPherson and Schapiro argue that the federal government needs to keep its attention focused on providing access to college for needy students, while colleges themselves need to constrain their search for strategic advantage by sticking to aid and admission policies they are willing to articulate and defend publicly.

You Don't Have to Be Smart to Own a Smartphone

And Other Lessons to Excel at Your First Job After Graduation

CreateSpace Hank Adler tackles one of the most critical topics in our work lives: how to be successful in that first job. Whether it be when to use or when not to use a Smartphone or how to make sure the receptionist is your friend rather than a stranger or enemy, Hank Adler provides a plethora of ideas for recent graduates in their first post graduation job. This advice, put forth in a readable and enjoyable style is equally relevant to supervisors and parents with respect to delivering helpful advice to recent graduates (and maybe not so recent graduates). As a former partner in an international accounting firm, a former school board president and now a veteran college professor, Adler is in a unique position to provide advice to recent graduates. He mentored first year graduates for decades when he was an accounting firm partner and today, he helps prepare college graduates for their first post graduate business job. In *You Don't Have To Be Smart To Own A Smartphone*, Adler addresses the cultural issues and day to day expectations of employers versus the modern life experiences of recent graduates. He explains how the cultural expectations of supervisors are different because they entered the work force before it was possible or anticipated that they would have a Smartphone embedded in their palm. Through a specific experience, he demonstrates with great humor how effective multi-tasking while texting on a Smartphone is an oxymoron. From Smartphone etiquette to understanding how damaging it is to complain to colleagues about how hard one is working to avoiding being part of the gossip community to explaining what it takes to be interesting to bosses and clients, *You Don't Have To Be Smart To Own A Smartphone* is the best first job primer written in the last twenty years. It is timely, it is interesting and Adler's story telling puts mistakes he has made into a context that will be useful to every reader. This is a book that will enhance careers.
