Multilingual Education In Pesantren Context

Deepublish **Multilingual** has played an important role in globalization era as a tool to drive competitiveness among people or countries over the world, such in economic, trade, policy, culture, and also education. It was defined ordinarily as the ability to speak or to communicate using three or more languages (McArthur, 1992: 673; Edwards, 1994: 33; Vildomec, 1963: 28; Kemp, 2009: 11). The benefits of being multilingual exhibit over monolinguals and not restricted to linguistic knowledge only but extend outside the area of language. The substantial long-lived cognitive, social, personal, academic, and professional benefits of enrichment multilingual context have been well documented (Cummins, 1981: 3; Cook, 2001; Diaz R, Klingler, 1991: 167; Lam, Wan Shun Eva and Rosario-Ramos, Enid, 2009: 171).

Dynamics of Industrial Revolution 4.0: Digital Technology Transformation and Cultural Evolution

Proceedings of the 7th Bandung Creative Movement International Conference on Creative Industries (7th BCM 2020), Bandung, Indonesia, 12th November 2020

Routledge The 7th Bandung Creative Movement conference presented the theme "Dynamics of Industrial Revolution 4.0" which discussed how the digital world and connectivity changed human culture in various aspects of life, and transformed in accordance to human needs and social culture. Digital technology has transformed society to serve people from manufacturing needs to smart cities, from network connectivity to people connectivity. The application of information technology has helped in improving live quality and environmental sustainability. Digital transformation is revolutionizing how businesses and workers interconnect to be more productive and efficient. The result is improved collaboration, faster processes and time-to-market, lower costs and better products. Devices are getting smarter, meaning they are able to perform more and more tasks without human intervention; moreover, these devices generate data that provide insights to further improve processes and gain greater efficiencies. Moreover, with the Internet of Things (IoT), all these smart devices are interconnected in ways that not only help make them even smarter, but also enhances the intelligence of the overall system. Digital technology is a formidable driver for the transformation of a highly carbon-dependent world into one that is more ecologically 'smart.' We are entering a new era of environmental innovation that is driving better alignment between technology and environmental goals. Since its first announcement in 2011, industrial revolution 4.0 has dynamically changed and transformed to adjust itself to the human needs and to serve more efficiency and effectiveness of everyday life as well as environmental enhancement. The 7th Bandung Creative Movement has brought forward discussions on dynamic changes, ups and downs, innovations, relations of

industrial revolution of the internet of thing, data, automation, to human physical world, new art and aesthetic, business, product innovation, built environment, and education.

Introduction to Integrated Education

Description on the nature of integrated education

UNIDA GONTOR PRESS **Education is a process to change the behavior of an individual in the society and his surrounding, through teaching and guiding as the fundamental activity among other activities in the community. This definition stresses on the change of behavior from bad to good, from minimum to maximum from potential to actual and from passive to active. All the changes are through the teaching process, which does not end at the level of individual, but up to the level of society. In this sense, the educational process will enhance individual as well as social piety. Islamic education on the other hand, can be defined as all efforts to educate and develop individual self and his human resources for a perfect person. This definition is in accordance with the view of Islam on the real meaning of education,**

that is to actualize a person who has strong faith in Allah the Almighty and at the same time, he is able to keep in balance his pious relationship with his God and fellow being positively as well as constructively. Islamic education is an education which has fundamental principles like independent methods, learning based on self-reliance, freedom in teaching, self-study, special attention on children, encouraging the skill and potencies of the student, appreciation of the students' intelligence, teaching through suitable approaches, kind guidance, and softness. Islamic education focuses on the behavior education, giving special attention on the development of skill in oratory, reasoning and speech presentation, reading enrichment on the classical Islamic book and consistent in learning, research and teaching which all are based on long life education. Meanwhile, the aim of Islamic education is personality construction, educating the mind and heart, nourishing the potencies, inhabits good conduct and preparing the child to be sincere and clean in mind and heart based on the teaching of Islam. The whole activities and the subjects taught at the process of education should be tahdhibul akhlaq (etiquette construction). The author in this book tries to describe the foundation of integrated education based on the light of al-Qur'an and Prophetic Tradition. The elaboration of its nature also includes the basic principle, curriculum and method of this institution. In the end of narration, the book explains vividly the historical studies on its ideal model that developed significantly through the passage of times.
