Consisting of three parts plus an answer key, this resource provides numerous opportunities for students to review cases and answer questions similar to those they will see on the NCLEX-RN examination - including questions in alternate-item formats . Part 1, written by delegation expert Ruth Hansten, is an introduction that provides a practical review of clinical delegation skills and serves as a framework for the exercises that follow. Part 2 consists cases of patients who have relatively straightforward health problems followed by NCLEX examination-style questions focusing on prioritization, delegation, and assignment. Part 3 consists of complex, unfolding cases involving patients who have multiple health conditions, as well as complex patient assignments. An introduction by prioritization and delegation expert Ruth Hansten explains the importance of developing sound clinical skills and judgment in the areas of prioritization, delegation, and assignment. NCLEX-style questions help students develop fundamental skills in prioritization, delegation, and assignment and become familiar with the NCLEX examination format. Questions in Parts 2 and 3 are organized by body system and by complexity, respectively, to allow for easy use with any medical-surgical nursing text. Both sections of exercises give students essential hands-on practice in prioritizing (deciding what to do first), delegating (giving specific tasks to assistive personnel and supervising satisfactory completion of those tasks), and assignment (giving responsibility for the overall care of particular patients to appropriate personnel). The questions in Part 3 are more complex than those in Part 2, allowing students to master core concepts using unambiguous cases before applying this knowledge to patients with more complicated, multidimensional case presentations. Flexible organization allows the workbook to be used with any Elsevier medical-surgical nursing text. The answer key provides rationales for correct as well as incorrect answers, reinforcing the concepts presented in each unit. Questions follow NCLEX style, and about 10% represent the new alternate-item question format. The workbook is three-hole punched and perforated for convenience. **4 Weeks to NCLEX® Workbook and Study Planner Nursing Mnemonic Visual Learning Resource by Picmonic** The ultimate study companion to Picmonic for Nursing! Concern is often expressed about the need to support carers, but the best way to do this is not always clear. This book breaks new ground in exploring the reality of how service providers the doctors, social workers, and community nurses respond to carers. It looks at which carers get help and why, analyzing how age, relationship, class and gender structure the responses of service providers and carers. It examines the moral and policy issues posed by trying to incorporate carers' interests into service provision. What would services look like if they took the needs of carers seriously? How far can they afford to do so? Is this only achieved at the expense of disabled people? What is the proper relationship between carers and services? Carers pose in acute form many of the central dilemmas of social welfare, and the account presented here has the widest significance for the analysis of community care. Focusing on the views of carers as well as service providers, the book looks at caring across a variety of relationships and conditions, including people with mental health problems and learning disabilities. **Your First Year as a Nurse Making the Transition from Total Novice to Successful Professional** Three Rivers Press **Survive and Thrive As a Nurse from Day One!** Welcome to the compassionate and caring world of nursing! **Opportunities Missed, Opportunities Seized Preventive Diplomacy in the Post-Cold War World** Rowman & Littlefield The basic logic of preventive diplomacy is unassailable. Act early to prevent disputes from escalating; reduce tensions that could lead to war; deal with today's conflicts before they become tomorrow's crises. Yet as we look at the record of these first years of the post-Cold War era, it is quite mixed. There have been some preventive diplomacy successes and opportunities that have been seized by major powers and international organizations to help preserve and protect the peace. But there also have been other opportunities that have been missed, with some of the century's most deadly conflicts the result. This study examines ten major post-Cold War cases including Croatia-Bosnia, Rwanda, the Baltics, Russia-Ukraine, Macedonia, and North Korea to assess the key factors contributing to both the success and failure of preventive diplomacy. The method of case study analysis employed is based on the work of Alexander L. George. Authors include both leading academics and prominent policy officials with first-hand knowledge.
