Child Health Nursing

For courses in Pediatric Nursing. A comprehensive survey of family-centered pediatric nursing care Child Health Nursing: Partnering with Children & Families promotes excellence in nursing care for infants, children, and adolescents--in hospitals and in the community. It focuses on the importance of partnering with families to adapt care plans for children based on their age, health status, and social and cultural influences. The text considers the impact of contemporary care environments on nursing practice, both in health promotion and in the care of children with acute or chronic health conditions. By offering industry best practices and practical applications, the book encourages students to apply evidence-based findings and clinical reasoning to planning superior care. The updated 3rd edition explains how modern nursing practice is affected by reforms to healthcare and its delivery--such as electronic health records, new approaches to chronic and acute condition management, and a focus on prevention. To support safe, effective, and innovative care, this edition draws on the latest recommendations of NANDA International diagnoses, Nursing Intervention Classifications (NIC), Nursing Outcomes Classifications (NOC), and Healthy People 2020. Also available with MyLab Nursing MyLab(tm) Nursing is an online self-study and class preparation program designed to engage students and improve results. Pediatric Nursing

A Case-Based Approach

Lippincott Williams & Wilkins Immerse Yourself in the Role of a Pediatric Nurse Develop the clinical judgment and critical thinking skills needed to excel in pediatric nursing with this innovative, case-based text. Pediatric Nursing: A Case-Based Approach brings the realities of practice to life and helps you master essential information on growth and development, body systems, and pharmacologic therapy as you apply your understanding to fictional scenarios based on real clinical cases throughout the pediatric nursing experience. Accompanying units leverage these patient stories to enrich your understanding of key concepts and reinforce their clinical relevance, giving you unparalleled preparation for the challenges you'll face in your nursing career. Powerfully written case-based patient scenarios instill a clinically relevant understanding of essential concepts to prepare you for clinicals. Nurse's Point of View sections in Unit 1 help you recognize the nursing considerations and challenges related to patient-based scenarios. Unfolding Patient Stories, written by the National League for Nursing, foster meaningful reflection on commonly encountered clinical scenarios. Let's Compare boxes outline the differences between adult and pediatric anatomy and physiology. Growth and Development Check features alert you to age and developmental stage considerations for nursing care. The Pharmacy sections organize medications by problem for convenient reference. Whose Job is it Anyway? features reinforce the individual responsibilities of different members of the healthcare team. Analyze the Evidence boxes compare conflicting research findings to strengthen your clinical judgment capabilities. How Much Does It Hurt? boxes clarify the principles of pediatric pain relevant to specific problems. Hospital Help sections alert you to specific considerations for the hospitalization of pediatric patients. Priority Care Concepts help you confidently assess patients and prioritize care appropriately. Patient Teaching boxes guide you through effective patient and parent education approaches. Patient Safety alerts help you quickly recognize and address potential safety concerns. Interactive learning resources, including Practice & Learn Case Studies and Watch & Learn Videos, reinforce skills and challenge you to apply what you have learned. Learning Objectives and bolded Key Terms help you maximize your study time. Think Critically questions instill the clinical reasoning

and analytical skills essential to safe patient-centered practice. Suggested Readings point you to further research for more information and clinical guidance.

ECG Interpretation

Lippincott Williams & Wilkins Geared to LPNs/LVNs, this quick-reference pocket book provides an easy-to-understand guide to ECG interpretation and features over 200 clearly explained ECG rhythm strips. Following a refresher on relevant cardiac anatomy, physiology, and electrophysiology, the book presents the 8-step method for reading any rhythm strip. Subsequent chapters explain various cardiac rate and rhythm abnormalities, including sinus node arrhythmias, atrial arrhythmias, junctional arrhythmias, ventricular arrhythmias, and atrioventricular blocks. Arrhythmias are covered in a consistent format—causes, significance, ECG characteristics, signs and symptoms, and interventions. Coverage also includes ECG characteristics of disorders, drugs, pacemakers, and implantable cardioverter-defibrillators and a chapter on basic 12-lead electrocardiography.

Prioritization, Delegation, and Assignment

Practice Exercises for Medical-Surgical Nursing

Mosby Incorporated This must-have workbook helps students learn the prioritization and delegation skills needed to survive nursing school, pass the NCLEX-RN® examination, and make the transition to practice in today's healthcare environment. Consisting of three

parts plus an answer key, this resource provides numerous opportunities for students to review cases and answer questions similar to those they will see on the NCLEX-RN examination - including questions in alternate-item formats. Part 1, written by delegation expert Ruth Hansten, is an introduction that provides a practical review of clinical delegation skills and serves as a framework for the exercises that follow. Part 2 consists of cases of patients who have relatively straightforward health problems followed by NCLEX examination-style questions focusing on prioritization, delegation, and assignment. Part 3 consists of complex, unfolding cases involving patients who have multiple health conditions, as well as complex patient assignments. An introduction by prioritization and delegation expert Ruth Hansten explains the importance of developing sound clinical skills and judgment in the areas of prioritization, delegation, and assignment. NCLEX-style questions help students develop fundamental skills in prioritization, delegation, and assignment and become familiar with the NCLEX examination format. Questions in Parts 2 and 3 are organized by body system and by complexity, respectively, to allow for easy use with any medical-surgical nursing text. Both sections of exercises give students essential hands-on practice in prioritizing (deciding what to do first), delegating (giving specific tasks to assistive personnel and supervising satisfactory completion of those tasks), and assignment (giving responsibility for the overall care of particular patients to appropriate personnel). The questions in Part 3 are more complex than those in Part 2, allowing students to master core concepts using unambiguous cases before applying this knowledge to patients with more complicated, multidimensional case presentations. Flexible organization allows the workbook to be used with any Elsevier medical-surgical nursing text. The answer key provides rationales for correct as well as incorrect answers, reinforcing the concepts presented in each unit. Questions follow NCLEX style, and about 10% represent the new alternate-item question format. The workbook is three-hole punched and perforated for convenience.

Introduction to Critical Care Nursing

Saunders The 4th edition provides a solid foundation in the concepts, assessment, and technical skills of critical care nursing. It includes an entire section focusing on skills that every critical care nurse needs to use, such as ventilatory assistance and hemodynamic monitoring. The text also provides real-life case studies to help readers understand how concepts apply to critical care practice. New chapters on the hot areas of Nutrition and Comfort and Sedation reflect the real-world challenges of the critical care nurse. Introduction to Critical Care Nursing, 4th Edition also comes with a companion website with self-study exercises. Ideal for students as well as experienced nurses new to critical care. Instructor resources available; contact your sales representative for details. Clinical Alerts emphasize the procedures and issues encountered in the clinical setting. Laboratory Alerts detail both common and cutting-edge tests and procedures. Research Analysis with references incorporate studies on cultural diversity and complementary therapies. Nursing Care Plans provide examples of nursing care for specific disorders; they include nursing diagnoses, patient outcomes, nursing interventions, and rationales. Case Studies present actual cases highlighting the major discussions in each chapter with accompanying questions to help readers better understand how concepts apply to real life. Pathophysiology Flow Charts provide outcomes of particular injuries, disorders, and complex diseases. Geriatric Assessments alert the reader to the special critical care needs of the older patient. Drug Tables reflect the most current and most commonly used critical care drugs. Critical Thinking Questions challenge students' comprehension of the content. 2 NEW chapters on Nutritional Support and Comfort and Sedation cover hot topics in critical care nursing today. NEW! Two-color design and 85 new two-color line drawings enhance reader understanding. NEW! Evolve companion website supplements the text with numerous resources for instructors and learning tools for students, such as open-book quizzes for self-study and review. A NEW column of Rationales is included in Nursing Care Plans. Expansion of Gerontology content throughout the text increases the focus on this special population.

Maternal-Child Nursing - Text and Simulation Learning System Package

W B Saunders Company This money saving package includes the McKinney: Maternal-Child Nursing, 3rd edition textbook, and the Simulation Learning System (SLS) User Guide & Access Code for McKinney's Maternal-Child Nursing, 3rd edition. STUDENT ACCESS ONLY - INSTITUTIONAL LICENSE REQUIRED. The Simulation Learning System (SLS) integrates simulation technology into your combined maternity and pediatric nursing course by providing realistic scenarios and supportive learning resources that correspond to McKinney: Maternal-Child Nursing, 3rd edition. The SLS offers targeted reading assignments and critical thinking exercises to prepare you for the simulation experience; access to patient data with a shift report and fully-functional electronic medical record (EMR); post-simulation exercises including charting and documentation activities in the EMR, reflective journaling, and concept mapping; and review resources including animations, videos, and textbook references. Simulation with the SLS is a complete learning experience that bridges the gap between lecture and clinicals to prepare you for the real world of nursing.
