Just Run It!

Running an Exceptional Business is Easier Than You Think

Routledge The growth engine of the global economy is no longer through mega-production and huge conglomerates, but rather through the proliferation of smaller enterprises. In America alone, tens of thousands of businesses crop up each year. Unfortunately, few will succeed, though not due to a lack of ingenuity, initiative, or even capital. Why, then? Because, according to Dick Cross, author of Just Run It!, most business owners lack not just the fundamentals, the nuts and bolts of operating a business effectively day to day, but the bigger picture of how to achieve business success. After taking dozens of companies from underperforming to high performing, Cross observed a pattern, out of which he devised a formula for success. Using his Just Run It! formula--which includes the Vision-Strategy-Execution analysis--he is now teaching business owners how to understand their business on "the back of an envelope" and make it exceptional.

The Leisure Commons

A Spatial History of Web 2.0

Routledge There is much excitement about Web 2.0 as an unprecedented, novel, community-building space for experiencing, producing, and consuming leisure, particularly through social network sites. What is needed is a perspective that is invested in neither a utopian or dystopian posture but sees historical continuity to this cyberleisure geography. This book investigates the digital public sphere by drawing parallels to another leisure space that shares its rhetoric of being open, democratic, and free for all: the urban park. It makes the case that the history and politics of public parks as an urban commons provides fresh insight into contemporary debates on corporatization, democratization and privatization of the digital commons. This book takes the reader on a metaphorical journey through multiple forms of public parks such as Protest Parks, Walled Gardens, Corporate Parks, Fantasy Parks, and Global Parks, addressing issues such as virtual activism, online privacy/surveillance, digital labor, branding, and globalization of digital networks. Ranging from the 19th century British factory garden to Tokyo Disneyland, this book offers numerous spatial metaphors to bring to life aspects of new media spaces. Readers looking for an interdisciplinary, historical and spatial approach to staid Web 2.0 discourses will undoubtedly benefit from this text.
