Empowering Novice Academics for Student Success

Wearing Different Hats

African Sun Media This book is essential for academics that enter the field of higher education and training, as it focuses on preparing teachers and trainers to respond appropriately to student success challenges. Student success is a burning issue, both globally and locally. While student achievement is determined by a combination of factors, teachers and their teaching practices do matter. Higher education teachers are expected to fulfil different roles at different times, such as planning for curriculum implementation, mentorship and coaching, facilitating learning, resource development, and student assessment. Against this background the primary purpose of Empowering novice academics for student success: Wearing different hats is building the capacity of novice teachers and trainers to play an influential role in increasing student success throughput.

Doing Sociology in India

Genealogies, Locations, and Practices

Oxford University Press This important volume on the history of sociology in India locates scholars, scholarship, theories, perspectives, and practices of the discipline in different cities and regions of the country over a century. It argues that this history is enmeshed in political projects of constructing a 'society', which took place as a result of colonialism and dominant nationalism. The book affirms the existence of both strong and weak traditions of scholarship in India and underscores three processes that have aided this development at various points of time: reflexive interrogation of received scholarship; probing ideal types of theories within classrooms; and questioning existing debates on society and its language by the public.
