### AN ORAL HISTORY AS TOLD BY JON STEWART, THE CORRESPONDENTS, STAFF AND GUESTS

---

**Grand Central Publishing** *NEW YORK TIMES BESTSELLER* The complete, uncensored history of the award-winning *The Daily Show* with Jon Stewart, as told by its correspondents, writers, and host. For almost seventeen years, *The Daily Show* with Jon Stewart brilliantly redefined the borders between television comedy, political satire, and opinionated news coverage. It launched the careers of some of today's most significant comedians, highlighted the hypocrisies of the powerful, and garnered 23 Emmys. Now the show's behind-the-scenes gags, controversies, and camaraderie will be chronicled by the players themselves, from legendary host Jon Stewart to the star cast members and writers-including Samantha Bee, Stephen Colbert, John Oliver, and Steve Carell - plus some of *The Daily Show*'s most prominent guests and adversaries: John and Cindy McCain, Glenn Beck, Tucker Carlson, and many more. This oral history takes the reader behind the curtain for all the show's highlights, from its origins as Comedy Central's underdog late-night program to Trevor Noah's succession, rising from a scrappy jester in the 24-hour political news cycle to become part of the beating heart of politics-a trusted source for not only comedy but also commentary, with a reputation for calling bullshit and an ability to effect real change in the world. Through years of incisive election coverage, passionate debates with President Obama and Hillary Clinton, feuds with Bill O'Reilly and Fox, and provocative takes on Wall Street and racism, *The Daily Show* has been a cultural touchstone. Now, for the first time, the people behind the show's seminal moments come together to share their memories of the last-minute rewrites, improvisations, pranks, romances, blow-ups, and moments of Zen both on and off the set of one of America's most groundbreaking shows.

## **JESSE OWENS, ADOLF HITLER AND THE 1936 SUMMER OLYMPICS**

---

**Createspace Independent Publishing Platform** *Both Jesse Owens and Adolf Hitler grew up in poverty, and each of the two men struggled to find their footing later in life. Owens represented the United States in the 1936 Olympics, after which he found it difficult to sustain a well-paying job. In turn, Adolf Hitler moved to Vienna as a teenager, following his parents' death, but he never found the financial success he so desperately craved as an artist. He spent most of his time in the city a penniless, unemployed young man. The similarities between the two men end there. While Adolf Hitler became angered and enraged by his circumstances, and by the fate of Germany following the First World War, Jesse Owens went out of his way to help people. Even when he faced the cruelty of racism in the United States, Owens saw the best in others. He spent most of his days working with children and teenagers, making a conscious effort to give them the guidance and support they needed to enact positive change in the world. In contrast, Hitler turned to hatred,*

*divisiveness, and conflict in his attempts to change the world in his image. Owens was an open-minded man who spent his life bettering the lives of his family and the community at large. Even when others asked him to denounce the racist tendencies of Adolf Hitler, he chose to grudgingly respect the German leader. Meanwhile, Hitler's experiences only fuelled his hatred of anyone who was not Aryan and German. In this book, we will explore the lives of both men leading up to the 1936 Berlin Olympics. Then, we will take a closer look at the effects of that summer on the rest of their years. 30 Minute Book Series Welcome to the ninth book in the 30-Minute Book Series. ## **INTERMEDIATE VISUAL MATHEMATICS**

---

**Createspace Independent Publishing Platform** *One cannot be an expert in Autonomous Vehicle Navigation Systems without a proper understanding of the preliminary visual concepts being covered in this book. It is a COMPENDIUM of the intermediate level books in the Visual Mathematics Series. They cover topics of - Elementary (introductory solved visual problems) - Pre-algebra - Geometry - Algebra This book intends to test the mathematical concepts taught in intermediate school with an emphasis on the visual skills. The problems are based on middle school curriculum but they are meant to be challenging, and meant for visual learners and high achievers. The use of diagrams and color coding scheme allows enhancing the description of the problems presented in this book and to lead the problem solver towards the solution. The problems presented in this book are in FULL COLOR and they create a visual dimension to the underlying mathematical concepts. It intends to appeal to both sides of the brain - the left and the right. It requires understanding the problem presented in a visual manner, but requires solving the problems using a combination of visual insight and mathematical discipline. This book provides a wide variety of problems, albeit a very limited number of each type. The main goal is to maintain the student's interest. The first eighteen pages include solved examples of visual math problems and should provide the necessary background. Many of the problems in the Pre-Algebra section will remind you of logic based grid puzzles, but the problems in this book have a variety of graph as well as grid representations. The problems in the Geometry section require thinking in relative terms and many of the problems have a certain artistic flavor. The algebra section is also about geometry problems that require algebraic problem solving.*

### THE GENESIS OF MATHEMATICAL STORY-TELLING: NIWARD STORY OF NKECHI MADONNA ADELEINE AGWU, PH.D

---

**Createspace Independent Publishing Platform** *In the beginning God created woman in His own like image, blessed her to go out to be fruitful and multiply, to replenish the earth, subdue it, and have dominion over everything on it, Genesis 1: 27-28. God's Own: The Genesis of Mathematical Story-Telling is about the creativity of God (The Absolute Infinite) as He is reflected in women. It is about the power of The Absolute Infinite to perform signs and wonders reflected in mathematical symbols, patterns, numbers, and graphs. It is a book on His word according to John 1:1, in the beginning was the word, the word was with God, and the word was God. God's Own: The Genesis of Mathematical Story-Telling is a mathematical, cultural, and spiritual story of Dr. Nkechi (God's own) Madonna Adeleine Agwu, aka Nma (Beautiful) Jacob. Dr. Agwu is an African female leader in mathematics and statistics education. Her life trajectory includes experiences of displacement, homelessness, living in refugee camps, single-parenting of a child with hearing and speech needs, and many other issues that from all indications could have set her up for failure, but for God's divine intervention. God's Own: The Genesis of Mathematical Story-Telling is about Dr. Agwu's journey as an ethno-mathematician to her present scholarship in African culture and women's stories in science, technology, engineering, and mathematics (STEM) related fields. It is about how she found her identity as a mathematical story-teller of members of the Organization of Nigerian Women in Agricultural Research and Development (NiWARD). It is a story about the beauty, strength, courage, and nurturing spirit of women. In this era of globalization, African people face the urgent need to foster world-wide education about their mathematics, science, technology, history and culture (Gerdes, 1998). All groups of people have made significant contributions to the development of mathematics. However, the contributions of Africans other than those related to the early beginnings of algebra and geometry in ancient Egypt, are still highly unacknowledged in the history of mathematics (Lumpkin, 1997). This is partly due to our oral traditions, slavery, colonialism, neo-colonialism, globalization, and the fact that our indigenous mathematics, scientific and technological knowledge as a people is often shrouded in our spirituality. This notwithstanding, efforts must be made to document the mathematical contributions of Africans to enrich the curriculum in a multicultural and interdisciplinary way by providing a wide repertoire of examples of mathematical concepts*

*illustrated from the African context. God's Own: The Genesis of Mathematical Story-Telling does this. In particular, it highlights the indigenous mathematical knowledge and cultural beauty of the Ndebele people of Southern Africa. God's Own: The Genesis of Mathematical Story-Telling is a story about creativity, innovation, and adaptation. It is a story about necessity as the mother of innovation. It is about the philosophy of "do what you can, from where you are, with what you have." It is a story about Nma (Beautiful) Jacob, the survivor, overcomer, successor and faithful servant of God. It is a story that The Absolute Infinite is ever present in our lives shaping our mathematical genomes. Emmanuel - God is with us! His Angels are around us, protecting and guiding us!*

*What's Your Green Goldfish is based on the simple premise that employees are the key drivers of customer experience and that "Happy Employees Create Happy Customers." The book focuses on 15 different ways to drive employee engagement and reinforce a strong corporate culture. It's the second book in the goldfish trilogy. The first book was an Amazon Best Seller entitled, What's Your Purple Goldfish. Purple focused on customers, whereby Green focuses on employees. Both books are based on a revolutionary new*

approach called marketing g.l.u.e. (marketing by giving little unexpected extras). The book is based on the findings of the Green Goldfish Project, an effort which crowd sourced 1,001 examples of signature added value for employees. Key themes emerged from the Project. The book is filled with over 200 examples. PRAISE FOR WHAT'S YOUR GREEN GOLDFISH "Stan is the sherpa that guides executives along the journey between the heart and mind of business stakeholders. Stakeholders aren't always customers though. At a time when company vision and culture matters more than ever, it takes inspired and engaged employees to bring them to life." - Brian Solis, author of What's the Future of Business #WTF, The End of Business as Usual and Engage "So often overlooked, and so very vital to building company value... empowering employees to support each other and the brand. Stan Phelps 'gets' it and Green Goldfish will walk you step-by-step though achieving this critical goal." - Ted Rubin, author of Return on Relationship "Great customer centric organizations only exist because of engaged and empowered employees. The Green Goldfish is packed with awesome examples of what world class companies are doing today to inspire and reward their employees. If you see value in truly building an "A Team," Green Goldfish will be, without question, your single best reference." - Chris Zane, Founder and President of Zane's Cycles, author of Reinventing the Wheel, the Science of Creating Lifetime Customers "Stan Phelps takes customer service to a whole new level by focusing on EMPLOYEE service, and how to do well by your employees - so they take care of your customers. Packed with stories, insights and R.U.L.E.S. any company can follow, this book is a must-read for managers of companies of all shapes and sizes who know that employees don't leave jobs - they leave managers, especially when they don't feel your love and appreciation. Pick this up, and start engaging your team and making more GREEN - Phil Gerbyshak, author of The Naked Truth of Social Media "Our large-scale research shows unequivocally that engaged employees are more likely to work longer, try harder, make more suggestions for improvement, recruit others to join their company, and go out of their way to help customers. They even take less sick time. Companies can tap into the enormous value of engaged employees by following the 15 ideas that Stan lays out in this book." - Bruce Temkin, author of The Six Laws of Customer Experience "Too often, the actual employment experience delivered on the job does not measure up to the version sold to job candidates during the interview process. In What's Your Green Goldfish, Stan Phelps offers 15 ways to close the gap." - Steve Curtin, author of Delight Your Customers: 7 Simple Ways to Raise Your Customer Service from Ordinary to Extraordinary (AMACOM, June 2013) "In What's Your Green Goldfish, Stan Phelps brilliantly applies the idea of 'doing a little something extra' for employees. You know, those people that actually get the work done and keep customers happy. Read it, put some of the ideas to work, and soon you'll be reaping more 'green' from your customers." - Bob Thompson, Founder and CEO, CustomerThink Corp.

The boys were learning that the girls really did have something special.Summer romance and first loves are some of the many stories; but baseball, treeforts, fighting and much more are part of the story. Who knew girls could become sharks?"Out of the depths of the dark sea, Candy appeared like a large shark, with deep, dark eyes. It was like a scene from a prison movie; she swam by my table and dumped chocolate milk in my lunch tray. The boys laughed and had a heyday with that one. We went out to recess. As soon as Russ, Skip and I hit the exit doors there appeared Candy and her goon squad of six girls. Betty Smith, the Amazon Woman, Janet Betts, Ms Butch America, and several other girls who had hair on their upper lips. *"Me and E: A Baseball Odyssey is a reflection on parenting a highly skilled, nationally-ranked and difficult baseball prodigy, told through the author's eyes as he witnessed and participated in the successes and failures of his son playing baseball and growing up in Central Florida. It deals with the changing world of competitive youth sports, over-involved parents, fanatical coaches, the hypocrisies inherent in high school athletics, the college recruiting process and how we teach our kids to grow up and become decent human beings - despite ourselves. It involves well-known sports figures as well as local sports icons with traits and characteristics that everyone will recognize. **WEEKLY OPTIONS FOR MONTHLY INCOME**

---

**CreateSpace** Weekly Index Options became available on the Chicago Board of Options Exchange in 2003. I have watched this type of Options Trading evolve as more investors used weekly trading. The trading software I have developed adapted to the weeklies evolution. The software became simpler: It uses SPX for the weekly options My principle strategy for trading Weekly Index Options uses 2 sigma Condors: Short Calls 2 standard deviations above the market and the Long Calls the next strike price higher; Short Puts 2 standard deviations below the market and the Long Puts the next strike price lower. This is called 2 Sig Iron Condors. I have developed a tactic to make weekly profits in spite of the huge daily Up and Down movements in the SPX. SelfAdapSPXweeklyVLTy is the name of my software which I use to generate monthly income. The software described in this book uses only SPX for the options because I discovered that when I used other underlying stocks or indices such as Google and SPY, SPX usually finished best. This book describes how to use the TradeMonster real-time SPX quotes for computing the 2 sig Condors used in my Software: SelfAdapSPXweeklyVLTy. Trade Monster's affiliate OptionsHouse can be used for Weekly Options trading if you have a minimum of \$2,000 in the account. I use 1/4 of the capital = \$500 for Margin to generate about \$100 for the week or \$400 for the Month. In other words you get 90% return per month on \$500 margin. Remember the weekly in-out trades should be no more than 2 per week to avoid being designated a day trader by your broker which requires a minimum of \$25,000 in your account.
