Bilaspur

A Study in Urban Geography

Northern Book Centre It is the analysis of the physical and cultural aspects of the city. It examines the influences of the physical features and the historical events as well as the centripetal and centrifugal forces, in shaping the city morphology. The present life and functions and the Regional relations are analysed for suggesting remedies for the removal of the problems and the healthy urban development. Here the role of geographer in planning the healthy urban development is evident by pointing out the shortcomings of the official master plan.

Medical Geography of Malaria in Madhya Pradesh

Northern Book Centre Medical Geography is a scientific discipline which links medicine with Geography. It is concerned with systematic study of spatial distribution of diseases in the backdrop of geographical conditions in order to find out answers to "where" and "why" of diseases. In India no disease has taken toll of such a large number of human beings as Malaria. Moreover, it steps the vitality of millions of people and forces them towards poverty.

Marketing in an Agricultural Region

A Geographical Study of Periodic Markets in Vidisha Plateau, Madhya Pradesh

Northern Book Centre It presents how the spatial system of market centres is organised and structured in the form of vested hierarchical system, and how regional development should be structured in consonance with their regional hierarchy, so that the functional cohesion and efficiency of the regional system is preserved and augmented.

State Public Enterprise and Economic Development

Northern Book Centre The history of public enterprises is not new. They have been assigned the role of harbinger of socialism in India in accordance with the Industrial Policy Resolution of 1956. They are treated as the catalysts of economic development and social upliftment of the people. For pretty a long time, public enterprises have been in dock and dottage on the ground that they have not been able to deliver goods as per our expectations. With a huge amount of investment in the central sector and the states' sector taken together, these enterprises have failed to generate a dependable surplus. Public sector is an amalgam of Central and State enterprises. In this book we have established that the state's enterprises' commitments are no less than central enterprises to fulfil the objectives and expectations with which, they were allotted the commanding height in our economy. A macro-level study of all types of State-level public undertakings has been done to judge the efficiency and effectiveness of these enterprises. This book is unique in the sense that it covers the syllabus of M.A., B.A. (Hons.) and B.A. (Pass) courses of all the universities of Bihar and special paper as 'Public Enterprises' in other universities of India. In view of its multi-dimensional approach, the book would be of immense importance to general readers, students, academicians and researchers. Review "The book deals with the economics of public enterprises with special reference to Bihar. The book is of special importance, particularly in the present context of redefining the role of public sector". I Satya Sundaram, Southern Economist

Mizoram

A Study in Comprehensive Geography

Northern Book Centre Annotation The publication of Mizoram A Study in Comprehensive Geography is a new contribution to the description and analysis of regional geography of India.

Resource Utilization and Development

A Perspective Study of Madhya Pradesh, India

Northern Book Centre The relationship between resources and development is the pivot around which the present study revolves. Focussing on the process of resource creation and utilization it emphasizes the need of equitable development integrating local needs, resources, people and functions. The resource exploitation and their utilization are two independent economic activities influenced by different algorithms and usually have manifested in core-periphery relationship. Reviews the persistent problems of economic development in perspective of exploitation of natural resources with the objective to provide some clues for occurrence and persistence of regional disparities and for suggesting a development model synchronising both the resource management and environmental protection.

Spatial Framework and Economic Development

A Geographical Perspective on Resources and Regional Disparities in Madhya Pradesh

Northern Book Centre Interrelationship between spatial structure and scenario of development is the focal theme of this volume. Attributes of the environment, man, his culture and society and their interaction shape the spatial structure which ultimately determine the pace of development. Unless transferential approach of resource exploitation is not changed to transformational one it is difficult to reduce the glaring disparity in development. Transformational approach is people oriented and nature oriented development concept, in which social justice, welfare, quality of life and environmental protection are kept at par with the economic growth.

Rural Development Policies and Programmes

Northern Book Centre The book presents a comprehensive picture of the rural development programmes in chronological order since first five year plan to the eighth five year plan. Attempt has been made to present the temporal dimensions of policies and objectives being adopted, extended and/or modified after reviewing the needs of identified target area and/or target groups. Also analyses the trend of rural development programmes being implemented in the region with their changing philosophy and composition from Community Development Programme (CDP), Small Farmers Development Agencies (SFDA) to Integrated Rural Development Programme (IRDP). The third part gives first hand information on the basis of village and household questionnaires especially developed for the purpose, not only have helped in evaluating the impact of various rural development programmes but also in assessing the participation of beneficiaries and that of the implementing agencies.

Agro Industrial Development in Indian Developing Economy

Northern Book Centre Agriculture is the dominant primary economic activity in every nook and corner of the developing world. It has great potential for those, who are interested in the spatial distribution of agricultural system. Now the major trust of agriculture geography is on the description, interpretation and explanation of spatial variations of land use, cropping pattern, crop combination, agricultural productivity, agricultural realisation and regional inequalities in agricultural efficiency with the set objective to formulate strategies for the planning and development of agriculture, agro industry and backward areas of the world as well as India. Important Features " Documented with five dozen figures and tables. " Matter is placed in scientific and logical manner. " Subject matter related to agricultural based areas dealt in general and Vaishali region in particular. " Review of the literature, conceptual word and theme related to geography as well as agricultural geography and backward developing areas have been comprehensively explained and placed thoroughly. " It has been elaborates that how backward and developing areas' regional development and agro industrial activities relates and correlates each other and how

positive correlation possible between these two aspect ? Structure of agro industrial activities in a backward area and local participation in these activities is important for the development of a backward or developing area or a region. Which system should apply? It has explained enlarge in the reference of agricultural characteristics of Vaishali. Potentiality of local agricultural resources examined very well, on which every developmental system depends. It has been found that without the development of infrastructural network, agro industrial and backward as well as developing area development has never been possible either in third-world countries or developing countries. So in the concluding remarks it has been answered that which type of infrastructural network is necessary for the development of an agro based backward areas.

Adoption of Agricultural Development Measures in Chhindwara

Northern Book Centre It embodies ecological determinants about agricultural relevance, demographic variables relevant to diffusion and adoption of agricultural innovation, land use pattern, determinants of agricultural innovations, status of irrigation-the base of yield raising technology, use of high yielding variety of seeds, adoption of soil fertility measures, financing system, mechanical technology and agricultural productivity and finally the levels of adoption. Analyses the spatio-temporal, inter-societal and intra-societal variation in the adoption of agricultural development measures has been the thrust objective of this book. Salient Features - Analyses the ecological parameters, cultural background and operational infrastructure of the plateau as the major determinants of agricultural land use and adoption of agricultural development measures. - Evaluates the spatial and temporal variation in the use of agricultural development measures. - Establishes relationship between each of personal-social and economic characteristics of adopters and the extent of adoption of each of selected agricultural innovation. - Determines spatial, inter-societal and intra-societal variation in level of adoption in perspectives of above determinants. - Evaluates the impact of the components of innovations on agricultural productivity. Useful for agricultural geographers, rural development planners and executors, irrigation engineers as well as scholars of rural habitat transformation. Also, this is well befitting the syllabi of universities for post-graduate classes and highly responsive to researchers.

Dimensions of Rural Electrification

Northern Book Centre Establishes relationships between rural electrification and development and between social structure and electricity in the rural India in general and M.P. region in particular. Most of the studies hitherto have been made with 'Single variable approach' but in the present study a 'multi-variable approach' has been emphasized and used to understand the real impact of rural electrification.

Application and Methodological Perspectives in Dermatoglyphics

Northern Book Centre Explore the recent methodological advances in dermatoglyphics, particularly-genetics, developmental variations, ethnic variability, inheritance, forensic and clinical aspects of dermatoglyphics. This volume is an aid to assist those who are engaged in application of dermatoglyphics, especially in the field of human biology, anthropology, forensic science and medicine.

Social Inequality and Health Care

Northern Book Centre India has committed itself to the pursuit of achieving the goal of Health For All by AD 2000 in accordance with the Alma-Ata declaration, 1978. There has been ample evidence to demonstrate that for the success of any health programme medical intervention alone will not bring about the desired results. Its success or failure depends, to a large extent, upon the interplay of several non-medical factors such as social, cultural, political, economic, and psychological. The role of these key factors in the domain of health care activities has been recently recognised by social scientists all over the world. It present a pioneering attempt in India to understand the relationship of social stratification and health care in a rural community from a sociological perspective.

Rural Poverty and Unemployment in India

Northern Book Centre Establishes relationship between poverty and unemployment and between social structure and poverty in the rural areas of Central India. Deals with both theoretical and empirical aspects of poverty and unemployment. The problems inherent in conceptualization as well as various theories and ideologies of poverty and unemployment, have been discussed in detail.

Agriculture, Food and Nutrition

Northern Book Centre Salient Features - The book examines the changing agricultural scenario and its impact on the food and nutritional situation during last fifty years in India. - It presents an analysis of changing agricultural land-use pattern, expansion and intensification in agriculture, agricultural development and increasing use of inputs, trends in food production, food availability and consumption and nutritional analysis in Madhya Pradesh. - The level of food and nutrition among the tribals of Madhya Pradesh has been analysed in details. - The food and nutritional analysis is based on the food balance sheet method and consumer survey method. - It presents a comparative analysis of recent food situation in the country and in the state of Madhya Pradesh as well. - The book will be useful to agricultural scientists, economists, social scientists, administrators alongwith the geographers, particularly who are engaged in the field of food and nutrition.

Paths of Development in Arunachal Pradesh

Northern Book Centre - Comprehensive geographical background of Arunachal Pradesh - Developing and understanding of existing land use patterns and factors responsible for changes among land use categories - Identification of levels of agricultural development and regionality - Infrastructure (roads, telecommunications, post-offices, banks, electrification) growth and intra-state distribution - Under-utilisation of education and health opportunities crucially shaping general development - Gender situation in Arunachal analysing sex-ratio, education and economic participation

Sustainable Agriculture

Northern Book Centre This book covers some of the crucial issues of sustainability in agriculture, which are presented in five sections viz., Concepts and Status, Sustainable Technologies in Crop Production & Management, Sustainability of Crops in Agro-ecosystems, Agro-forestry, and Spatial Informatics in Sustainable Agriculture. The sub-themes covered in the papers are: land use planning, sustainable livelihood, shifting cultivation, wetlands, weed management, technologies in crop production, traditional knowledge and management of agriculture, sustainability of crops in different agro-ecosystems, methods and policies, digital opportunities; use of remote sensing and GIS in agro-ecological zoning and agricultural resources information technology. The Contributions by scientists, planners, technocrats, researchers and practitioners, address both the conceptual and policy related issues with important empirical research findings.

Urban Studies in India

A Bibliography

Geographic Information Science for Land Resource Management

John Wiley & Sons Geographic Information Science for Land Resource Management is a comprehensive book focusing on managing land resources using innovative techniques of spatial information sciences and satellite remote sensing. The enormous stress on the land resources over the years due to anthropogenic activities for commercialization and livelihood needs has increased manifold. The only solution to this problem lies in the stakeholders' awareness, which can only be attained through scientific means. The awareness is the basis of the sustainable development concept, which involves optimal management of natural resources, subject to the availability of reliable, accurate, and timely information from the global to local scales. GIScience consists of satellite remote sensing (RS), Geographical Information System (GIS), and Global Positioning System (GPS) technology that is nowadays a backbone of environmental protection, natural resource management, and sustainable development and planning. Being a powerful and proficient tool for mapping, monitoring, modeling, and managing natural resources can help understand the earth's surface and its dynamics at different observational scales. Through the spatial understanding of land resources, policymakers can make prudent decisions to restore and conserve critically endangered resources, such as water bodies, lakes, rivers, air, forests, wildlife, biodiversity, etc. This innovative new volume contains chapters from eminent researchers and experts. The primary focus of this book is to replenish the gap in the available literature on the subject by bringing the concepts, theories, and experiences of the specialists and professionals in this field jointly. The editors have worked hard to get the best literature in this field in a book form to help the students, researchers, and policymakers develop a complete understanding of the land system's vulnerabilities and solutions.
