## SECRETS OF THE BABY WHISPERER

---

**Ballantine Books** "TRACY HOGG HAS GIVEN PARENTS A GREAT GIFT—the ability to develop early insight into their child's temperament." -Los Angeles Family When Tracy Hogg's *Secrets of the Baby Whisperer* was first published, it soared onto bestseller lists across the country. Parents everywhere became "whisperers" to their newborns, amazed that they could actually communicate with their baby within weeks of their child's birth. Tracy gave parents what for some amounted to a miracle: the ability to understand their baby's every coo and cry so that they could tell immediately if the baby was hungry, tired, in real distress, or just in need of a little TLC. Tracy also dispelled the insidious myth that parents must go sleepless for the first year of a baby's life—because a happy baby sleeps through the night. Now you too can benefit from Tracy's more than twenty years' experience. In this groundbreaking book, she shares simple, accessible programs in which you will learn: • E.A.S.Y.—how to get baby to eat, play, and sleep on a schedule that will make every member of the household's life easier and happier. • S.L.O.W.—how to interpret what your baby is trying to tell you (so you don't try to feed him when he really wants a nap). • How to identify which type of baby yours is—Angel, Textbook, Touchy, Spirited, or Grumpy—and then learn the best way to interact with that type. • Tracy's Three Day Magic—how to change any and all bad habits (yours and the baby's) in just three days. At the heart of Tracy's simple but profound message: treat the baby as you would like to be treated yourself. Reassuring, down-to-earth, and often flying in the face of conventional wisdom, *Secrets of the Baby Whisperer* promises parents not only a healthier, happier baby but a more relaxed and happy household as well.

What role does Neanderthal DNA play in our genetic makeup? How did the theory of eugenics embraced by Nazi Germany first develop? How is trust passed down in Africa, and silence inherited in Tasmania? How are private companies like Ancestry.com uncovering, preserving and potentially editing the past? In *The Invisible History of the Human Race*, Christine Kenneally reveals that, remarkably, it is not only our biological history that is coded in our DNA, but also our social history. ### **THE STRANGE FRIENDSHIP BETWEEN HOUDINI AND CONAN DOYLE**

---

Prometheus Books . . . Polidoro has written--and written well--a saga of two Titans that is also a remarkable exploration of both superstition and obsession, at the lush twilight of the Edwardian era.--Baltimore Sun This is the story of an unusual friendship between two of the most intriguing characters of the early 20th century--renowned escape artist Harry Houdini and celebrated mystery writer Sir Arthur Conan Doyle (creator of Sherlock Holmes). Both men were fascinated by the occult practice of spiritualism, Houdini as an ardent skeptic who often publicly exposed fraudulent mediums and Conan Doyle as a true believer who became convinced that the dead could and did communicate with the living. Despite their differing perspectives the two men not only respected each other but became friends. The correspondence between them on the subject provides a fascinating glimpse not only into the personalities of two talented and interesting celebrities but also into a psychic phenomenon that is the ancestor of today's channeling craze. Based on original correspondence, photographs, and his own extensive research, Massimo Polidoro reconstructs this unusual friendship between a believer and a skeptic, which weathered mediums, seances, an apparition of Houdini's departed mother, automatic writing by Conan Doyle's wife, public debunkings, and hurt feelings. He also discusses the final rift that ended the friendship of the two strong-willed men. Fans of Conan Doyle, Houdini, magic, and the historical roots of the New Age will be delighted by this amazing story. Massimo Polidoro is executive director of the Italian Committee for the Investigation of Claims of the Paranormal, editor of *Scienza & Paranormale* (Science and the Paranormal), and author of twelve books on the paranormal.
