AUTOPHAGY

CRC Press **Starting in the early 1970s, a type of programmed cell death called apoptosis began to receive attention. Over the next three decades, research in this area continued at an accelerated rate. In the early 1990s, a second type of programmed cell death, autophagy, came into focus. Autophagy has been studied in mammalian cells for many years. The recen**

TWELVE YEARS A SLAVE

Prabhat Prakashan "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

SOFT COMPUTING AND SIGNAL PROCESSING

PROCEEDINGS OF 2ND ICSCSP 2019

Springer Nature This book presents selected research papers on current developments in the fields of soft computing and signal processing from the Second International Conference on Soft Computing and Signal Processing (ICSCSP 2019). The respective contributions address topics such as soft sets, rough sets, fuzzy logic, neural networks, genetic algorithms and machine learning, and discuss various aspects of these topics, e.g. technological considerations, product implementation, and application issues.

CONTEMPORARY ISSUES AND DEVELOPMENT IN THE GLOBAL HALAL INDUSTRY

SELECTED PAPERS FROM THE INTERNATIONAL HALAL CONFERENCE 2014

Springer This book features more than 50 papers presented at the International Halal Conference 2014, which was held in Istanbul and organised by the Academy of Contemporary Islamic Studies of Universiti Teknologi MARA. It addresses the challenges facing Muslims involved in halal industries in meeting the increasing global demand. The papers cover topics such as halal food, halal pharmaceuticals, halal cosmetics and personal care, halal logistics, halal testing and analysis and ethics in the halal industry. Overall, the volume offers a comprehensive point of view on Islamic principles relating to the halal business, industry, culture, food, safety, finance and other aspects of life. The contributors include experts from various disciplines who apply a variety of scientific research methodologies. They present perspectives that range from the experimental to the philosophical. This volume will appeal to scholars at all levels of qualification and experience who seek a clearer understanding of important issues in the halal industry.

DNA MICROARRAYS

A PRACTICAL APPROACH

Practical Approach Series DNA microarrays, or biochips, are small glass chips embedded with ordered rows of DNA and by providing a massive parallel platform for data gathering represent a fundamental technical advance in biomedical research. This volume is a comprehensive overview of DNA microarray technology and will be invaluable to any researcher interested in taking advantage of this powerful new technique.

INSIDE REPORTING

McGraw-Hill Education This text does for reporting what Tim Harrower's *The Newspaper Designer's Handbook* has previously done for design: make it fun and accessible to newcomers. Harrower is an award-winning editor, designer

and columnist who has previously taught at Portland State University and currently conducts journalism workshops. The second edition of *Inside Reporting* continues to emphasize the basics but also provides a wealth of information on online reporting and packaging stories in more visual, interactive ways. It also includes more useful information on feature writing--from stories to reviews and column-writing--than any other text in the field.

HEALTH OF PEOPLE, PLACES AND PLANET

REFLECTIONS BASED ON TONY MCMICHAEL'S FOUR DECADES OF CONTRIBUTION TO EPIDEMIOLOGICAL UNDERSTANDING

ANU Press This book has three main goals. The first is to celebrate the work of a great public health figure, the late A.J. (Tony) McMichael (1942-2014). The second is to position contemporary public health issues in an interdisciplinary context and in ways that highlight the interdependency between the environment, human institutions and behaviours; a broad approach championed by Tony. The third is to encourage emerging and future public health leaders to advocate for policies and cultural change to sustain and improve human health, from a foundation of objective scholarship. The book's foreword and 38 chapters were written by people who were inspired by Tony; many of whom worked with him at some point in the last 40 years. Its structure reflects five major public health domains, each of which Tony made major contributions to in an extremely productive academic life: occupational health and safety; environmental and social epidemiology; nutrition and food systems; climate change and health; and ecosystem change and infectious disease. The final section, 'Transformation', is dedicated to Tony's desire for public health scientists to propose adaptive and mitigating solutions to the problems they were observing. Each section contains at least one key publication involving Tony. There is also a selection of artworks from an exhibition which formed part of the

conference held to honour Tony at The Australian National University in 2012. This conference formed the first part of Tony's festschrift, completed by this book.

SONGS OF CENTRAL AUSTRALIA

[Sydney] : Angus and Robertson This is Strehlow's most widely regarded work and the culmination of his anthropological work related to the Aranda (Arunta) people of the Alice Springs region. In this work Strehlow records the patrilineal chants or songs of the Aranda people and puts them into a wider context of totemic cultural understanding. Of particular interest is Chapter 10, the love songs of the Aranda people, which pre-date European romantic conventions by several thousand years.

BIOMATERIALS AND REGENERATIVE MEDICINE

Cambridge University Press Written by world-leading experts, this book focusses on the role of biomaterials in stem cell research and regenerative medicine. Emphasising basic principles and methodology, it covers stem cell interactions, fabrication technologies, design principles, physical characterisation and biological evaluation, across a broad variety of systems and biomaterials. Topics include: stem cell biology, including embryonic stem cells, IPS, HSC and progenitor cells; modern scaffold structures, including biopolymer, bioceramic, micro- and nanofiber, ECM and biohydrogel; advanced fabrication technologies, including computer-aided tissue engineering and organ printing; cutting-edge drug delivery systems and gene therapy techniques; and medical applications spanning hard and soft tissues, the cardiovascular system and organ regeneration. With a contribution by Nobel laureate Shinya Yamanaka, this is a must-have reference for anyone in the field of biomaterials, stem cell biology and engineering, tissue engineering and regenerative medicine.

MATHS SKILLS FOR BIOLOGY A LEVEL

This handbook specifically targets the mathematical elements of A Level Science, whichever specification you're following. AMGOV

LONG STORY SHORT

***CQ Press* All the fundamentals. No fluff. Learn more with less! A truly revolutionary American Government textbook, Christine Barbour's AmGov: Long Story Short, responds to the needs of today's students and instructors through brevity and accessibility. The succinct ten chapters are separated by tabs that make it easy to skim, flip, revisit, reorient, and return to content quickly. Reading aids like bullets, annotations and arrows walk students through important facts and break up the material in short, engaging bites of information that highlight not only what is important but why it's important. Though brief, this core book is still robust enough to provide everything that students need to be successful in their American Government course. Whether for the on-the-go student who doesn't have time to read and digest a lengthy chapter, or the instructor who wants a book that will stay out of their way and leave room for plenty of supplementary reading and activities, AmGov provides a perfectly simplified foundation for a successful American Government course.**

PHYSICS

***Bloomsbury Publishing* Assuming no prior knowledge, this established textbook provides a complete course in physics for beginners and includes coverage on seven core areas of physics, including mechanics, materials, waves and electricity. Readers will develop a solid understanding of topics such as fields, electromagnetism, electronics, atomic and nuclear physics and thermodynamics, and are encouraged to engage with the text through exercises and revision questions. Illustrations are used extensively to complement theoretical explanations and help readers understand the fundamentals of physics. This book is aimed at students on access or foundation programmes in physics, but is also ideal for non-specialist students on degree courses such as biological sciences, chemical sciences, engineering,**

mathematics and geology, for whom physics is a subsidiary subject. It is also suitable for trainee science teachers and medical students who need to develop a solid background in physics. New to this Edition: - Brand-new unit on Rotational Dynamics - Attractive new layout and design, with more illustrations and use of colour - Expanded companion website with case studies on applications of physics, resources to develop essential mathematical skills, practical experiments and much more

VOGUE X MUSIC

Abrams **Vogue** has always been on the cutting edge of popular culture, and **Vogue x Music** shows us why. Whether they're contemporary stars or classic idols, whether they made digital albums or vinyl records, the world's most popular musicians have always graced the pages of **Vogue**. In this book you'll find unforgettable portraits of Madonna beside David Bowie, Kendrick Lamar, and Patti Smith; St. Vincent alongside Debbie Harry, and much more. Spanning the magazine's 126 years, this breathtaking book is filled with the work of acclaimed photographers like Richard Avedon and Annie Leibovitz as well as daring, music-inspired fashion portfolios from Irving Penn and Steven Klein. Excerpts from essential interviews with rock stars, blues singers, rappers, and others are included on nearly every page, capturing exactly what makes each musician so indelible. **Vogue x Music** is a testament to star power, and proves that some looks are as timeless as your favorite albums.

THE NEW FILIPINO KITCHEN

STORIES AND RECIPES FROM AROUND THE GLOBE

Agate Publishing "An engrossing, page-turner of a cookbook. If you can even call it a cookbook—it's more of a short story collection with delicious, addictive recipes." —Brian McGinn, Emmy-nominated director and executive producer, *Chef's Table* Named a top cookbook of 2018 by the San Francisco Chronicle and Epicurious You may not realize that Filipino Americans are the second-largest Asian American group living in the United States, especially when you compare the

number of, say, Japanese, Thai, and Korean restaurants to Filipino ones. There's a lot of speculation about why Filipino food hasn't taken off the way other Asian cuisines have, but one thing's for sure: there's something for everyone here. The *New Filipino Kitchen* collects thirty recipes and stories from expat Filipinos, all of whom have taken their favorite dishes with them, preserving their food memories and, if necessary, tweaking their recipes to work in a new environment or, in the case of some chefs, a more modern context. With contributions from White House executive chef Cristeta Comerford, silver Bocuse d'Or winner Christian André Pettersen, five-time Palanca Award winner and poet Francis Macansantos, and the "Food Buddha" Rodelio Aglibot, this is a multifaceted, nuanced introduction to the world of Filipino food and food culture. "Contributors' entrancing essays about work, life, and love of their heritage are not to be missed . . . A gentle, inspiring, and exciting introduction to a savory world still new to many U.S. readers." —Booklist, starred review "Engrossing stories and delicious recipes." —Foodista "A wonderful multilayered answer to the question 'What is Filipino food?' and an invitation to everyone to get cooking." —Naomi Duguid, author of James Beard Award-winning *Taste of Persia*

IRANIAN MASCULINITIES

GENDER AND SEXUALITY IN LATE QAJAR AND EARLY PAHLAVI IRAN

Cambridge University Press The transition from Qajar rule in Iran (c.1789-1925) to that of rule by the Pahlavi dynasty (1925-1979) set in motion a number of shifts in the political, social, and cultural realms. Focusing on masculinity in Iran, this book interweaves ideas and perceptions, laws, political movements, and men's practices to spotlight the role men as gendered subjects played in Iranian history. It shows how men under the reign of Reza Shah dressed, acted, spoke, and thought differently from their late Qajar period counterparts. Furthermore, it highlights how the notion of being a "proper Iranian man" changed over these decades. Demonstrating how an emerging elite of western-educated men constructed and promoted a new model of masculinity as part of their struggle for political, social, and cultural

hegemony, Balslev shows how this new model reflects wider developments in Iranian society at the time including the rise of Iranian nationalism and the country's modernisation process.

RECENT ADVANCES IN STORED PRODUCT PROTECTION

Springer This book aims to assess, evaluate and critically analyze the methods that are currently available for a judicious pest management in durable food. It presents and analyzes a vast amount of methods that are already in use in “real world” industrial applications. After the phase-out of methyl bromide, but also the withdrawal of several insecticides and the continuously updated food safety regulations, there is a significant knowledge gap on the use of risk-reduced, ecologically-compatible control methods that can be used with success against stored-product insect species and related arthropods. The importance of integrated pest management (IPM) is growing, but the concept as practiced for stored products might differ from IPM as historically developed for field crops. This book discusses a wide variety of control strategies used for stored product management and describes some of the IPM components. The editors included chemical and non-chemical methods, as both are essential in IPM. They set the scene for more information regarding emerging issues in stored product protection, such as emerging, alien and invasive species as

threats for global food security, as well as the importance of stored-product arthropods for human health. Finally, the analysis of the economics of stored product protection is presented, from theory to practice.
