Regulation of health care professionals

regulation of social care professionals in England, a joint consultation paper

[The Stationery Office](#) In this consultation paper, the Law Commissions of England and Wales, Scotland and Northern Ireland are seeking views on the regulation of health care professionals in the UK and social workers in England. In their first joint consultation, the Commissions are asking how a new legal framework would: give the regulators increased flexibility in the use of their powers while ensuring public accountability; enable them to ensure proper standards of professional education, conduct and practice; and have at its heart a duty on the regulators to protect the public. It makes provisional proposals which seek to simplify and modernise the law and establish a streamlined, transparent and responsive system of regulation of health care professionals, and in England only, the regulation of social workers

Mobile Computing: Concepts, Methodologies, Tools, and Applications

Concepts, Methodologies, Tools, and Applications

IGI Global "This multiple-volume publication advances the emergent field of mobile computing offering research on approaches, observations and models pertaining to mobile devices and wireless communications from over 400 leading researchers"--Provided by publisher.

Global Business Regulation

Cambridge University Press Across an amazing sweep of the critical areas of business regulation - from contract, intellectual property and corporations law, to trade, telecommunications, labour standards, drugs, food, transport and environment - this book confronts the question of how the regulation of business has shifted from national to global institutions. Based on interviews with 500 international leaders in business and government, this book examines the role played by global institutions such as the WTO, the OECD, IMF, Moody's and the World Bank, as well as various NGOs and significant individuals. The authors argue that effective and decent global regulation depends on the determination of individuals to engage with powerful agendas and decision-making bodies that would otherwise be dominated by concentrated economic interests. This book will become a standard reference for readers in business, law, politics and international relations.

The Evolution of a Regulatory Framework for E-commerce Formation

Metamorphosis of Traditional Contract Principles

This research, entitled *The Evolution of a Regulatory Framework for E-commerce: Metamorphosis of Traditional Contract Principles*, is set against the background of the general question whether there is the need for a whole new legal structure for contract formation in the on line environment, or if the existing traditional laws of contract are sufficient by adapting the current provisions to cyber space. In the first chapter, the research examines the context of e-contract, laying a foundation for the analysis of the legal framework through which electronic business transactions are conducted. The research covers matters such as the rudimentary use of the prefix e as an attempt to translate commerce from its traditional form to its cyber-based equivalent. This chapter also explores a description of the technological infrastructure for various avenues of e-commerce. Chapter Two provides a functional definition of the law of e-commerce. From the proposal that the virtual world is completely devoid of law to the view that it is too strictly regulated, this chapter examines whether or not there can be a legal mechanism for governing businesses online - as distinct from the general law of contract - what that mechanism might be, and the efficacy of any such law. In Chapter Three a model of a virtual contract formed by the use of electronic media is examined. This model of contract formation is aided by importing the rules of traditional contract into the virtual shop. The contract rules are tested for relevance and applicability in the online environment. Chapter Four deals with a crucial feature of many online contracts: 'standard forms'. It answers the question whether there is anything significantly different from the day-to-day standard form paper contracts when these contracts are formed and/or executed online. In Chapter Five the concept of a separate legal personality for automated agents is discussed. There is an analogous review of the creation of personality from other non-human v legal persons. Signature and other authenticating means as key to contract formation, though not necessarily ingredients for determining validity, are discussed. In Chapter Six the research explores the relevance and increased use of authentication features like pin numbers, biometrics and e-signatures, particularly the legal aspects of electronic signatures (statutory requirements, practical problems with their use, and case law response to the use of electronic signatures). Finally the work turns to the core issues surrounding complex e-commerce transactions: choosing a forum for the adjudication of disputes. The work, while dealing with keys aspects of contract, moves from the traditional contract form to contracts in the virtual environment, and questions the applicability of the existing law, then proposes an approach specific to the uniqueness of the online market.

Governance of Communication Networks

Connecting Societies and Markets with IT

Springer Science & Business Media Few would doubt the potential of information technology to connect individuals, firms and organisations. Whether this will actually lead to the integration of markets and societies is a different issue. The articles collected in this book shed light on crucial considerations for the success of global communication networks.

These include frameworks for regulation, inclusion of customers in defining product and service strategies, access to advanced technology and networks for all groups, and more.

Business Law I Essentials

A less-expensive grayscale paperback version is available. Search for ISBN 9781680923018. **Business Law I Essentials** is a brief introductory textbook designed to meet the scope and sequence requirements of courses on Business Law or the Legal Environment of Business. The concepts are presented in a streamlined manner, and cover the key concepts necessary to establish a strong foundation in the subject. The textbook follows a traditional approach to the study of business law. Each chapter contains learning objectives, explanatory narrative and concepts, references for further reading, and end-of-chapter questions. **Business Law I Essentials** may need to be supplemented with additional content, cases, or related materials, and is offered as a foundational resource that focuses on the baseline concepts, issues, and approaches.

CIMA F1

Financial Operations Study Text

BPP Learning Media **F1 builds on knowledge from paper C2 and introduces tax at a very basic level; it is not based on any tax regime. Financial reporting is a major part of the syllabus, both single company and group accounts are examined in the two '25-mark' questions in section C. New financial reporting topics introduced at this level are: group accounts; construction contracts; financial instruments; and leases. It has four main sections: The principles of business taxation The principles of regulation of financial reporting Preparation of financial statements which conform with IFRS Consolidated financial statements** The study text concentrates on the key areas of the syllabus, taking into account the way in which topics are examined. The text has a step-by-step approach to producing financial statements and lots of exercises in which you can practice the workings. We guide you through the more problematic topics which can be brought into the preparation of single company and group financial statements, and give you plenty of examples.

Principles of Contemporary Corporate Governance

Cambridge University Press **Extracts and evaluates the core principles of corporate governance. Gives context to the principles through discussions and explanations from selected case studies and real life examples of corporate governance.**

Model Rules of Professional Conduct

American Bar Association **The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.**

Is Mobile Money Part of Money? Understanding the Trends and Measurement

International Monetary Fund **The rapid uptake of mobile money in recent years has generated new data needs and growing interest in understanding its impact on broad money. This paper reviews mobile money trends using mobile money data from the Financial Access Survey (FAS) and examines the statistical treatment of mobile money under the IMF's Monetary and Financial Statistics (MFS) framework. MFS guidance is straightforward in most cases, as many jurisdictions have adopted regulations which ensure that mobile money is captured in the banking system and thus in the calculation of broad money. However, in cases where mobile network operators (MNOs) act as niche financial intermediaries outside the banking regulatory perimeter and are allowed to invest their customer funds in sovereign securities and other permitted assets, mobile money liabilities may remain outside the banking system as well as monetary statistics. In that case, information on mobile money liabilities need to be collected directly from MNOs to account for mobile money as part of broad money.**

Regulation and the Global Financial Crisis

Impact, Regulatory Responses, and Beyond

Routledge The Financial Crisis was a cross-sector crisis that fundamentally affected modern society. Regulation, as a concept, was both blamed for allowing the crisis to happen, but also tasked with developing and implementing solutions in the wake of the crash. In this book, a number of specialists from a range of fields have contributed their insights into the effect of the Financial Crisis upon the regulatory frameworks affecting their fields, how regulators have responded to the Crisis, and then what this may mean for the future of regulation within those industries. These analyses are joined by a picture of past financial crises - which reveals interesting patterns - and then analyses of architectural regulatory models that were fundamentally affected by the Crisis. The book aims to allow sector specialists the freedom to share their insights so that, potentially, a broader picture can be identified. Providing an interesting and thought-provoking account of this societally impactful era, this book will help the reader develop a more informed understanding of the potential future of financial regulation. The book will be of value to researchers, students, advanced level students, regulators, and policymakers.

Regulatory Competition in Contract Law and Dispute Resolution

Bloomsbury Publishing In many regions of the world and across various fields, law has become a product. Individuals and companies seek attractive legal regulations and countries advertise their legal wares globally as they compete for customers. To analyse this development and to develop policy recommendations with respect to contract law and dispute resolution a conference was held in Munich in October 2011, bringing together leading scholars in the field of contract law and dispute resolution from the US and Europe. This book presents the papers and main comments produced for that conference. The chapters include important papers on, inter alia, law and economic theory, legal transplants, theories of private law, choice of law, the characterisation of contract law and the English and American civil procedural traditions.

Research Handbook on International Insurance Law and Regulation

Edward Elgar Publishing 'Global insurance and its rapidly evolving law and regulation demands international research. To this aim, the Handbook offers a truly international collection of essays. Highly renowned experts analyze the key topics currently under international discussion and development. While representing a diversity of national jurisdictions, the focus lies on the largest insurance jurisdictions (USA, UK and Germany) but newly important jurisdictions like Brazil and China are considered as well a most valuable and important contribution to international insurance law literature.' Manfred Wandt, Director of the Insurance Law Institute, Goethe-University Frankfurt, Germany 'This Research Handbook is published at an opportune time. A global review of insurance law and regulation is underway. Much reform happens locally with little reference to developments elsewhere and this Research Handbook brings the strands together. It is a comprehensive review by distinguished authors from different backgrounds including both leading academics and practitioners. They consider the definitions of insurance, its economic underpinnings, comparative law and regulations, actual and proposed reforms, the effects on underwriting and claims and how insurance is studied and taught. Good laws and regulation benefit the market and its customers. Bad laws and regulation do the opposite. This book is required reading for all involved in the reform process.' David Hertzell, Law Commissioner 'Globalisation has had no greater impact in the commercial world than on insurance, the law which governs it and the risks it seeks to address. Those who inspired this publication and the contributing authors, are to be thanked for providing such a necessary and useful reference source. It covers so much of what insurance professionals need to be aware of in the insurance/law world of the twenty first century.' Michael Gill, President of the International Insurance Law Association Given its economic importance, insurance is a field that has been underserved as an area of academic study. This detailed book provides much needed coverage of insurance law and regulation in its international context. Produced in association with Lloyd's, it draws on the expertise both of academics and practising lawyers. Containing 30 comprehensive chapters, it provides in-depth studies on key areas, such as the role of international organisations, the judicial interpretation of insurance contract clauses and transnational regulatory recognition. It also provides thorough introductions to important jurisdictions, including the EU, US and Japan as well as focusing on newly emerging economies such as China and Brazil. Specialist topics covered include regulation by and of Lloyd's, the tort of bad faith in the US, microinsurance and takaful insurance. This well-documented resource will appeal to academics and students in insurance law and regulation, policymakers and private practice lawyers. The book also aims to stretch the imagination of anyone with an interest in insurance law and regulation, providing detailed analysis and avenues for further investigation.

ACCA Paper P4 - Advanced Financial Management Study

Text

BPP Learning Media The Association of Chartered Certified Accountants (ACCA) is the global body for professional accountants. With over 100 years of providing world-class accounting and finance qualifications, the ACCA has significantly raised its international profile in recent years and now supports a BSc (Hons) in Applied Accounting and an MBA. BPP Learning Media is an ACCA Official Publisher. The new ACCA syllabus for paper P4 is about the practical application of financial theory to problems that managers face, such as investment appraisal, funding policies, risk management, growth, organic or through mergers and acquisitions and dividend policy. The paper also covers crucial issues such as corporate governance and ethical and environmental aspects of financial policy. The BPP text provides a comprehensive treatment of the new ACCA syllabus for P4 and addresses all learning outcomes and the higher skills to be assessed in the professional examination in an integrated and practical way. The material, despite the technical nature of certain areas, follows a practical, common sense approach with plenty of case studies and real life business examples. The key points of each topic are summarised in a chapter roundup and tested in a diagnostic quiz at the end of each chapter. A question bank at the end of the book provides practice on exam style questions. BPP Learning Media is the publisher of choice for many ACCA students and tuition providers worldwide. Join them and plug into a world of expertise in ACCA exams.

Modernizing Legal Services in Common Law Countries

Will the US Be Left Behind?

Lexington Books Most people understand that regulations have a direct bearing on their access to things such as clean air and water and safe working environments. However, in the United States, few people make the connection between how legal services are regulated and how difficult it is for them to access legal services. Indeed, on the question of affordable and accessible civil justice, the World Justice Project ranks the US 94th out of 113 countries, behind Albania, Belarus, Myanmar, and Russia. For decades academics and others have debated whether the legal profession is self-regulated and, if it is, whether it should be. But is it the right debate? Self-regulation—or not—does not obviate the need for effective regulation. Independent, accountable, and transparent regulatory bodies, effective oversight of those bodies, the genuine engagement of citizens in the regulatory process, evidence-based research to fully assess the impact of regulation, and an approach to regulation that is proportionate and targeted to actual risks are essential for effective regulation. Through the lens of the adoption of alternative structures, this book explains how England, Wales, and Australia have, by embracing these essential elements, successfully modernized their regulatory environments for legal services, and how Canada has taken firm steps down its own path to the same. In contrast, by rejecting these elements, the United States remains paralyzed in an unproductive regulatory environment for legal services. This book provides a blueprint for how the US can take inspiration from its common law sisters to breathe new life into its regulatory environment for legal services. Ultimately, modernization will require more—and better—regulation that is financed publicly through equitable, progressive revenue sources.

From Governance to Government?

Basel III and the question of legitimacy of cross-border business regulation

GRIN Verlag Examination Thesis from the year 2012 in the subject Business economics - Economic Policy, grade: 1,0, Copenhagen Business School (Department of Business and Politics), course: International Political Economy, language: English, abstract: The global financial crisis of 2008 has inevitably caused intense debates on the conceptual foundations and the practice of global business regulation. There have been widespread calls for more efficient regulation and supervision of the international financial system, and explicitly, of the banking sector. The Basel Committee on Banking Supervision (BCBS), an international standard setting body constituted by national supervisory authorities, has particularly fallen into disrepute. For the German economist Martin Hellwig, the BCBS seemed to be more "an accelerant [to the crisis] rather than an extinguisher", which "failed marvelously". One might or might not agree with him, but it remains to state that the question of legitimacy of cross-border business regulation and its efficiency has been increasingly questioned in the aftermath of the financial crisis: "Who governs the globe?" "In whose benefit?" "What of democratic sovereignty?" Evidently, the future of the BCBS seems to be at stake. Only if its guidelines, based on voluntary recommendations, are perceived as legitimate, the BCBS can continue to exercise its regulatory authority. As Eric Helleiner predicts, financial crisis represent a turning point within the governance of international financial markets: "Regulation may be accompanied by a growing fragmentation of international financial governance over the medium term." Aart Scholte also summarizes that "the scale, effectiveness, and legitimacy of global governance lag far behind the world's needs". In this context this paper will examine i) the sources of authority of the BSCS on the basis of the current Basel Accord, also known as 'Basel III', and ii) address the question whether financial regulation can actually be exercised on a global scale or primarily underlies the solely implementation by national governments. The rest of the paper proceeds as follows. Section two begins with a general introduction to the BCBS, its scope of functions and the committee's embeddedness in the global business regulatory environment. This is followed by the exposition of the main theoretical framework based on the sources of authority by Avant et al. Section five turns to the analysis of Basel III in accordance with the methodological norms of the previously presented theory. Finally, section five provides a conclusion and answers the initially put question of legitimacy of crossborder business regulation.[...]

OECD Reviews of Regulatory Reform: Italy 2009 Better Regulation to Strengthen Market Dynamics

Better Regulation to Strengthen Market Dynamics

OECD Publishing This review of regulatory reform in Italy presents a general picture of the overall regulatory reform frameworks in Italy, examining quality regulation, competition policy and professional services. The review also offers a special focus on multi-level governance.

The Telecoms Trade War

The United States, the European Union and the World Trade Organisation

Bloomsbury Publishing If one were to believe the politicians and pundits in the trade press, the world is in midst of a "telecoms revolution," resulting from (the) deregulation and new competitive opportunities represented by the 1997 World Trade Organisation Agreement on Basic Telecommunications Services. This may be true. Unfortunately, however, the actions of many regulators and industry participants more accurately reveal not a telecoms "revolution" but instead a growing telecoms trade war that is dangerously close to spiralling out of hand. In this book, Naftel and Spiwak review U.S. and European competition and regulatory initiatives post-WTO and provide both a useful roadmap to today's U.S., EU and WTO telecoms regulation and an examination of various case studies to illustrate their points. In so doing, the authors discover unfortunately the sad reality that, despite the political rhetoric, regulators on both sides of the Atlantic have eschewed innovative and indeed productive solutions to create a market structure conducive to long-term competitive rivalry. Instead, the authors demonstrate that current policies reveal a growing cynicism towards the maximisation of consumer welfare that will be difficult - if not outright impossible- to remove.

International Convergence of Capital Measurement and Capital Standards

A Revised Framework

Preparing for Future Products of Biotechnology

National Academies Press Between 1973 and 2016, the ways to manipulate DNA to endow new characteristics in an organism (that is, biotechnology) have advanced, enabling the development of products that were not previously possible. What will the likely future products of biotechnology be over the next 5–10 years? What scientific capabilities, tools, and/or expertise may be needed by the regulatory agencies to ensure they make efficient and sound evaluations of the likely future products of biotechnology? Preparing for Future Products of Biotechnology analyzes the future landscape of biotechnology products and seeks to inform forthcoming policy making. This report identifies potential new risks and frameworks for risk assessment and areas in which the risks or lack of risks relating to the products of biotechnology are well understood.

Improving the Regulatory Framework

Measuring Regulatory Performance A Practitioner's Guide to Perception Surveys

A Practitioner's Guide to Perception Surveys

OECD Publishing This guide helps officials use perception surveys for evaluating and communicating progress in regulatory reform. It explains the challenges involved in the design and use of business and citizen perception surveys - and ways to overcome them.

Reviving Growth in India

Cambridge University Press "Discusses some of the unresolved questions relating to reviving growth in India covering various sectors of the economy"--

Corporate Social Responsibility European Style

The concept of corporate social responsibility (CSR) emerged in the official discourse of the EU in 2000. The paper explains how, while CSR may have been initially an idea about the scope of the responsibility of companies towards their environment, it has now become a process in which the representatives of the business community have come to occupy the main role, and whose purpose is to promote learning among business organizations, rather than to identify the components of a regulatory framework for CSR. The central question now, therefore, is whether the so-called 'business case' for CSR is strong enough, so that we may hope that the forces of market will suffice to encourage the companies to behave responsibly, over and above their obligation to comply with their legal obligations. The paper shows, however, that this case rests on certain presuppositions about markets and the business environment, which cannot be simply assumed, but should be affirmatively created by a regulatory framework for CSR. This article examines the development of CSR in the EU (II.). It then offers a critical examination of the so-called 'business case' for CSR, taking into account the growing diversity within the enlarged EU (III.). Next, it discusses, as an alternative, what a regulatory framework for CSR could resemble, highlighting a number of initiatives which have been taken in this regard by the EU (IV.). The paper finally concludes that, since the failure of the European Multistakeholder Forum on CSR in 2004, the debate has made a turn in the wrong direction, both because of the mistaken view that the establishment of a regulatory framework for CSR would threaten the competitiveness of European companies, and because of the naive (and contradictory) view that reliance on market mechanisms will suffice to ensure that corporations will seek to minimize the negative social and environmental impacts of their activities, even in circumstances where they are not legally obliged to do so (V.).
