Norm Antipreneurs and the Politics of Resistance to Global Normative Change

Routledge Over recent decades International Relations scholars have investigated norm dynamics processes at some length, with the ‘norm entrepreneur’ concept having become a common reference point in the literature. The focus on norm entrepreneurs has, however, resulted in a bias towards investigating the agents and processes of successful normative change. This book challenges this inherent bias by explicitly focusing on those who resist normative change - norm ‘antipreneurs’. The utility of the norm antipreneur concept is explored through a series of case studies encompassing a range of issue areas and contributed by a mix of well-known and emergent scholars of norm dynamics. In examining the complexity of norm resistance, particular attention is paid to the nature and intent of the actors involved in norm-contestation, the sites and processes of resistance, the strategies and tactics antipreneurs deploy to defend the values and interests they perceive to be threatened by the entrepreneurs, and whether it is the entrepreneurs or the antipreneurs who enjoy greater inherent advantages. This text will therefore be of interest to scholars and students of International Relations, International Law, Political Science, Sociology and History.

Key Concepts in Urban Studies

SAGE "Key Concepts in Urban Studies is written in an accessible, concise way and introduces students to the key topics in urban studies. Drawing examples from different parts of the world, this authoritative resource exposes students to the diverse forms that cities take, and the social, spatial and temporal dimensions of urban living. It is an essential resource for students across disciplines interested in the city." - Lily Kong, Singapore Management University "An insightful multidisciplinary introduction to the multifarious places, processes and problems that constitute modern cities. Its short, digestible entries unpack the complexity and evolution of urban conditions, offering cross-references between concepts and links to key literature and to useful current and historical examples. The book's clear, often sharp critical edge also encourages deeper enquiry." - Quentin Stevens, School of Architecture and Design, RMIT University Key Concepts in Urban Studies is an essential companion for students of urban studies, urban sociology, urban politics, urban planning and urban development. This revised edition has been updated and expanded to provide a keen global focus, particularly in emerging economies with discussions on the creation of “dream cities” in the Gulf States and a renewed emphasis on building mega-scaled “downtowns” in India and China. New features include: Contemporary and international examples throughout. Detailed entries on environmental concerns and the sustainability of urban development. Discussion of the role of consumption in city culture and urban development. New entries on modern urban planning and adaptive urbanism. Key Concepts in Urban Studies is a must-have text with an explicit focus on contemporary urbanism which students will find invaluable during their studies. Mark Gottdiener is Professor Emeritus of Sociology at The University at Buffalo (SUNY). Leslie Budd is Reader in Social Science at the Open University. Panu Lehtovuori is Professor of Planning Theory at Tampere University of Technology.

Organizational Change for Corporate Sustainability

Routledge Since this classic book was first published in 2003, sustainability has increasingly been accepted as standard business practice for leading corporations, while the science itself has revealed how human activity has become the dominant force influencing irreversible changes in the planetary systems. The fourth edition of this trailblazing book on corporate sustainability provides new insights into how organizations
