STANDARDIZATION OF WORK MEASUREMENT

BASIC VOLUME, GENERAL GUIDANCE

The purpose of this manual is to standardize instructions, methods, terminology and standard time data applicable to work measurement and the development of labor performance standards. The use of this manual is intended to: a. Maximize the productivity of industrial/management engineering personnel by providing a more rapid means of establishing labor performance standards and eliminating duplication in labor performance standards development. b. Foster the increased use of engineered performance standards by making available standard time data of stated accuracy and reliability structured for maximum ease of application. c. Promote appropriate application of more efficient methods of performing work. d. Provide uniformity in labor performance standards development by standardizing the application of various work measurement techniques. e. Facilitate communication by providing common terminology and definitions.

STANDARDIZATION OF WORK MEASUREMENT. VOLUME 6, MACHINE TRADES OCCUPATIONS

This volume of Machine Trades Occupations Standard Time Data is one of ten volumes of standard time data in the 11 volume series included in DWMSTDP. Machine Trades Occupations as categorized by the Department of Labor includes those occupations concerned with feeding, tending, operating, controlling, and setting up machines to cut, bore, mill, abrade, print, and similarly work such materials as metal, paper, wood, and stone. This includes understanding machine functions, reading blueprints, making mathematical computations and exercising judgement to attain conformance to specifications. Disassembly, repair, reassembly, installation, and maintenance of machines and mechanical equipment, and weaving, knitting, spinning, and similarly working textiles are also included.

THE CHEROKEE PROJECT

A COMPREHENSIVE REPORT ON THE PLANNING, DESIGN, CONSTRUCTION, AND INITIAL OPERATIONS OF THE CHEROKEE PROJECT

Cherokee is the tenth major hydro project authorized for construction of the Tennessee Valley Authority and the seventh to be completed. The dam is located at mile 52.3 on the Holston River which unites with the French Broad River just above Knoxville to form the Tennessee River. This main tributary project was the first of several TVA dams authorized under World War II emergency program and constructed on an emergency basis. Although operated primarily for power during the war emergency, Cherokee forms an integral unit in the overall system of water control projects in the Tennessee Valley, and under normal multiple purpose operation aids in reducing main-river flood stages and in stabilizing low water flows.
