Comprehensive Approach as "Sine Qua Non" for Critical Infrastructure Protection

IOS Press The world in which we live is becoming ever more complex, both from the viewpoint of ensuring security, and also because of our level of dependence on technology, as represented by so-called critical infrastructure. Despite the efforts of national security entities in the national and international context, terrorist attacks will probably never be completely preventable. This makes it necessary to prepare the functioning of our systems for the occurrence of a terrorist attack so that they will operate quickly and effectively even in this type of crisis. This book presents the papers delivered at the NATO Advanced Research Workshop: Managing Terrorism Threats to Critical Infrastructure - Challenges for South Eastern Europe, held in Belgrade, Serbia in May 2014. The book is divided into five sections: strategic environment and critical infrastructure protection; information security and counterterrorism considerations; terrorist threats to critical infrastructure operation - environmental aspects; energy security as a key factor of critical infrastructure protection; and national approaches to critical infrastructure protection. The book highlights the main dilemmas and challenges of managing terrorist threats in the region of South Eastern Europe, and will be of interest to all those whose work involves protecting critical infrastructure from the threat of terrorist attack.

Africa Reader 2018: A continent full of potential

European Investment Bank Africa is transforming itself. The continent stands ready to seize the opportunities arising from its young population, new technologies, new trade agreements and potential for productivity gains. However, the region needs a lot of help to fight deteriorating infrastructure, climate change, extreme weather events, social and political strife, persistent poverty, and the rising numbers of people leaving their homes to escape conflict or seek a better life. The European Investment Bank has been active in Africa for more than half a century, carrying out thousands of complex projects in all corners of the continent. We are concentrating even more on activities that create jobs and growth. We also are working hard on sustainable urbanisation, digital connectivity and gender equality.

Banking in Africa: Delivering on Financial Inclusion, Supporting Financial Stability

European Investment Bank In its fourth edition, this report focuses on recent developments in Africa's banking sectors and the policy options for all stakeholders. The study of banking sectors across all African sub-regions includes the results of the EIB survey of banking groups operating in Africa. Three thematic chapters address challenges and opportunities for financing investment in Africa: Crowding out of private sector lending by public debt issuance The state of bank recovery and resolution laws in Africa Policy options on how to finance infrastructure development. The report finds that in many African banking markets, the last two years saw a pause in financial deepening. However, a rising share of banking groups report improving market conditions and plan a structural expansion of their operations in Africa and a continued push for new technologies.

The New Regulatory Framework for Consumer Dispute Resolution

Oxford University Press Consumer out-of-court redress in the European Union is experiencing a significant transformation; indeed the current changes are the most important that have occurred in the history of the EU. This is due to the recent implementation of the Alternative Dispute Resolution (ADR) Directive 2013/11/EU and the Online Dispute Resolution (ODR) Regulation (EU) 2013/524. The Directive ensures the availability of quality ADR schemes and sets information obligations on businesses, and the Regulation enables the resolution of consumer disputes through a pan European ODR platform. The New Regulatory Framework for Consumer Dispute Resolution examines the impact of the new EU law in the field of consumer redress. Part I of the volume examines the new European legal framework and the main methods of consumer redress, including mediation, arbitration, and ombudsman schemes. Part II analyses the implementation of the ADR Directive in nine Member States with very different legal cultures in consumer redress, namely: Belgium, Ireland, Italy, Germany, France, Portugal, Spain, the Netherlands and the UK, as well as the distinct approach taken in the US. Part III evaluates new trends in consumer ADR (CDR) by identifying best practices and looking at future trends in the field. In particular, it offers a vision of the future of CDR which is more than a mere dispute resolution tool, it poses a model on dispute system design for CDR, it examines the challenges of cross-border disputes, it proposes a strategy to promote mediation, and it identifies good practices of CDR and collective redress. The book concludes by calling for the mandatory participation of traders in CDR.

The Routledge Companion to Non-Market Strategy

Routledge It is commonplace for today's transnational enterprises to undertake political risk analysis when choosing foreign markets and creating entry strategies. Despite this, non-market elements of corporate strategy are less well researched than the traditional market-based perspectives. Providing comprehensive and leading edge overviews of current scholarship, this Companion surveys the current state of the field and provides a basis for improving our understanding of the non-market environment, encouraging new insights to improve strategies for enhancing a firm's performance and legitimacy. With a foreword by David Baron, the international team of contributors includes Jean-Philippe Bonardi, Bennet Zelner, and Jonathan Doh, who combine to create a book that is essential reading for students and researchers in business, management, and politics, including those interested in business regulation, environmental policy, political risk and corporate social responsibility.

The UK Regional-National Economic Problem

Geography, globalisation and governance

Routledge In recent years, the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been. In a landmark analysis of the current state of Britain's regional development, Philip McCann utilises current statistics, examines historical trends and makes pertinent international comparisons to assess the state of the nation. The UK Regional-National Economic Problem brings attention to the highly centralised, top down governance structure that the UK deploys, and demonstrates that it is less than ideally placed to rectify these inequalities. The 'North-South' divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity, incomes, employment status and

wealth. Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland, in contrast the Midlands, the North of England, Northern Ireland and Wales lag behind by most measures of prosperity. This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored. The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends, although this definitive study suggests that some areas of improvement are possible if they are well implemented. This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government.

Oil and the political economy in the Middle East

Post-2014 adjustment policies of the Arab Gulf and beyond

Manchester University Press The downhill slide in the global price of crude oil, which started mid-2014, had major repercussions across the Middle East for net oil exporters, as well as importers closely connected to the oil-producing countries from the Gulf. Following the Arab uprisings of 2010 and 2011, the oil price decline represented a second major shock for the region in the early twenty-first century - one that has continued to impose constraints, but also provided opportunities. Offering the first comprehensive analysis of the Middle Eastern political economy in response to the 2014 oil price decline, this book connects oil market dynamics with an understanding of socio-political changes. Inspired by rentierism, the contributors present original studies on Bahrain, Egypt, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, and the United Arab Emirates. The studies reveal a large diversity of country-specific policy adjustment strategies: from the migrant workers in the Arab Gulf, who lost out in the post-2014 period but were incapable of repelling burdensome adjustment policies, to Egypt, Jordan, and Lebanon, who have never been able to fulfil the expectation that they could benefit from the 2014 oil price decline. With timely contributions on the COVID-19-induced oil price crash in 2020, this collection signifies that rentierism still prevails with regard to both empirical dynamics in the Middle East and academic discussions on its political economy.

Microfinance, EU Structural Funds and Capacity Building for Managing Authorities

A Comparative Analysis of European Convergence Regions

Springer In recent years, the European Commission has attached increasing importance to the use of financial engineering instruments rather than traditional grant-based financing for the microcredit sector, considering these to be the most efficient option available. This book presents a study of capacity building and structural funds in public managing authorities for the microcredit sector. It presents two surveys to highlight the strengths and weaknesses of the managing authorities' capacity building. The first survey investigates the authorities' need for and interests in capacity building activities, assessing the areas in which capacity building support is needed, and explores the different types of support offered. The second survey analyses the results of the microcredit and microfinance programming activity, investigating its target groups and other operational features. It examines the key monitoring and reporting issues involved in this activity, before analysing the regulatory framework of the microcredit and microfinance sector. This book presents an in-depth analysis of structural funds and their management by policy-makers in the European convergence regions. It explores the interests of managing authorities, microcredit institutions, operators and other financial intermediaries involved in microcredit programming activities, and offers some core strategic and operational recommendations for the use of structural funds in the microcredit sector.

Paper Dragons

China and the Next Crash

Bloomsbury Publishing Emerging relatively unscathed from the banking crisis of 2008, China has been viewed as a model of both rampant success and fiscal stability. But beneath the surface lies a network of fissures that look likely to erupt into the next big financial crash. A bloated real-estate sector, roller-coaster stock market, and rapidly growing shadow-banking sector have all coalesced to create a perfect storm: one that is in danger of taking the rest of the world's economy with it. Walden Bello traces our recent history of financial crises - from the bursting of Japan's 'bubble economy' in 1990 to Wall Street in 2008 - taking in their political and human ramifications such as rising inequality and environmental degradation. He not only predicts that China might be the site of the next crash, but that under neoliberalism this will simply keep happening. The only way that we can stop this cycle, Bello argues, is through a fundamental change in the ways that we organise: a shift to cooperative enterprise, respectful of the environment, and which fractures the twin legacies of imperialism and capitalism. Insightful, erudite and passionate, Paper Dragons is a must-read for anyone wishing to prevent the next financial meltdown.

European Politics

Taylor & Francis European Politics surveys the history, institutions, and issues that are essential for understanding contemporary European politics. Exploring a central question—"what is Europe?"—this text's thematic approach helps students compare politics in individual countries and see the political big picture in the region. European Politics examines not only countries already in the European Union but also those eligible to join to give students the most comprehensive picture of Europe's evolution in a globalized world. Key changes for the new edition: Fully revised and updated to include coverage of recent elections, public opinion data and key topics such as refugees, Russia and Ukraine, Syria, more on the economic crisis, and Brexit; Expanded and revised opening chapter explaining Europeanization, multi-level governance, and the fissures in Europe; Greater and updated coverage of theory, multi-culturalism, and the EU. This timely, in-depth text will be essential reading for anyone interested in European politics.

Handbook of Behavioural Economics and Smart Decision-Making

Rational Decision-Making within the Bounds of Reason

Edward Elgar Publishing This Handbook is a unique and original contribution of over thirty chapters on behavioural economics, examining and addressing an important stream of research where the starting assumption is that decision-makers are for the most part relatively smart or rational. This particular approach is in contrast to a theme running through much contemporary work where individuals' behaviour is deemed irrational, biased, and error-prone, often due to how people are hardwired. In the smart people approach, where errors or biases occur and when social dilemmas arise, more often than not, improving the decision-making environment can repair these problems without hijacking or manipulating the preferences of decision-makers. This book covers a wide-range of themes from micro to macro, including various sub-disciplines within economics such as economic psychology, heuristics, fast and slow-thinking, neuroeconomics, experiments, the capabilities approach, institutional economics, methodology, nudging, ethics, and public policy.

American Oligarchy

The Permanent Political Class

University of Illinois Press A permanent political class has emerged on a scale unprecedented in our nation 's history. Its self-dealing, nepotism, and corruption contribute to rising inequality. Its reach extends from the governing elite throughout nongovernmental institutions. Aside from constituting an oligarchy of prestige and power, it enables the creation of an aristocracy of massive inherited wealth that is accumulating immense political power. In a muckraking tour de force reminiscent of Lincoln Steffens, Upton Sinclair, and C. Wright Mills, American Oligarchy demonstrates the way the corrupt culture of the permanent political class extends down to the state and local level. Ron Formisano breaks down the ways this class creates economic inequality and how its own endemic corruption infects our entire society. Formisano delves into the work of not just politicians but lobbyists, consultants, appointed bureaucrats, pollsters, celebrity journalists, behind-the-scenes billionaires, and others. Their shameless pursuit of wealth and self-aggrandizement, often at taxpayer expense, rewards channeling the flow of income and wealth to elites. That inequality in turn has choked off social mobility and made a joke of meritocracy. As Formisano shows, these forces respond to the oligarchy 's power and compete to bask in the presence of the .01 percent. They also exacerbate the dangerous instability of an American democracy divided between extreme wealth and extreme poverty.

Integrated Marketing Communications with Student Resource Access 12 Months

Cengage AU Organisations continually use integrated marketing communications to achieve a competitive advantage and meet their marketing objectives. The Handbook of Global Shadow Banking, Volume II

The Future of Economic and Regulatory Dynamics

Springer Nature This global handbook provides an up-to-date and comprehensive overview of shadow banking, or market-based finance as it has been recently coined. Engaging in financial intermediary services outside of normal regulatory parameters, the shadow banking sector was arguably a critical factor in causing the 2007-2009 financial crisis. This second volume explores three particular domains of shadow banking. The first domain deals with the macro-economic fundamentals of the respective shadow banking segments: Why do they exist, what problems do they solve and why are some of their embedded risks so persistent? The second domain captures the global dimensions of shadow banking markets, reviewing the particularities and specifics of various shadow banking systems around the world. Volume II concludes with an extensive overview of how the sector has changed since the financial crisis, focusing on regulatory arbitrage, contract imperfection and governance. Closing on unresolved issues and open-ended questions that will no doubt remain prominent in the shadow banking sector for years to come, this handbook is a must-read for professionals and policy-makers within the banking sector, as well as those researching economics and finance.

New Discourses, Evolutions and Actions

Emerald Group Publishing This book addresses the question of the extent of and responses to inequalities in the UK in 2017 in the wake of the 2008 Great Recession and provides an up-to-date account of the distribution of inequalities, the evolving ways they are measured/addressed as well as the changing perception of inequalities by the general public and policy-makers.

The Energy Security Paradox

Rethinking Energy (In)security in the United States and China

Oxford University Press The decisions we make about energy shape our present and our future. From geopolitical tension to environmental degradation and an increasingly unstable climate, these choices infiltrate the very air we breathe. Energy security politics has direct impact on the continued survival of human life as we know it, and the earth cannot survive if we continue consuming fossil energy at current rates. The low carbon transition is simply not happening fast enough, and change is unlikely without a radical change in how we approach energy security. But thinking on energy security has failed to keep up with these changing realities. Energy security is primarily considered to be about the availability of reliable and affordable energy supplies - having enough energy - and it remains closely linked to national security. The Energy Security Paradox looks at contemporary energy security politics in the United States and China: the top two energy consumers and producers. Based on in-depth empirical analysis, it demonstrates that current energy security practices actually lead to a security paradox: they produce insecurity. To illustrate this, it develops the 'energy security paradox' as a framework for understanding the interconnected insecurities produced by current practices. However, it also goes beyond this, examining resistance to current practices to highlight that we not only can do energy security differently: this is already happening. In the process, the volume demonstrates that the value of security depends on the context. Based on this, The Energy Security Paradox proposes a radical reconsideration of how we approach and practice energy security.

The Myth of Chinese Capitalism

The Worker, the Factory, and the Future of the World

St. Martin's Press The untold story of how restrictive policies are preventing China from becoming the world's largest economy Dexter Roberts lived in Beijing for two decades working as a reporter on economics, business and politics for Bloomberg Businessweek. In *The Myth of Chinese Capitalism*, Roberts explores the reality behind today's financially-ascendant China and pulls the curtain back on how the Chinese manufacturing machine is actually powered. He focuses on two places: the village of Binghuacun in the province of Guizhou, one of China's poorest regions that sends the highest proportion of its youth away to become migrants; and Dongguan, China's most infamous factory town located in Guangdong, home to both the largest number of migrant workers and the country's biggest manufacturing base. Within these two towns and the people that move between them, Roberts focuses on the story of the Mo family, former farmers-turned-migrant-workers who are struggling to make a living in a fast-changing country that relegates one-half of its people to second-class status via household registration, land tenure policies and inequality in education and health care systems. In *The Myth of Chinese Capitalism*, Dexter Roberts brings to life the problems that China and its people face today as they attempt to overcome a divisive system that poses a serious challenge to the country's future development. In so doing, Roberts paints a boot-on-the-ground cautionary picture of China for a world now held in its financial thrall.

Corporate Social Responsibility and Natural Resource Conflict

Routledge This book examines the possibilities and limitations of corporate social responsibility in minimising the violent conflict often associated with natural resource exploitation. Through detailed and penetrating empirical analysis, the author skilfully asks why previous corporate social responsibility practices have not always achieved their aims. This theme is explored through an analysis of two of the most complex and protracted conflicts linked to natural resources in the Asia Pacific region: Bougainville (Papua New Guinea) and West Papua (Indonesia). Drawing on first-hand accounts of corporate executives and communities affected by resource conflict, this book documents the translation of global corporate social responsibility into local peace. Covering topics as diverse as post-colonialism, law, revenue distribution, security, the environment and customary reconciliation, this ambitious text reveals how and why current corporate social responsibility initiatives may be unable to assist extractive companies avoid social conflict. The study concludes that this is attributable to the failure of extractive companies to respond to the social and environmental issues of most concern to local host communities. The idea is that extractive companies could actively contribute to peace building if they were to engage with the interdependencies between business activity and the root causes of conflict. What sets this book apart is that it offers a holistic framework for extractive companies to engage with the complexity of resource conflict. 'Interdependent Engagement' is an integrated model of corporate social responsibility that encourages extractive companies to deal with the underlying causes of resource conflict, rather than applying solutions or critiques of their symptoms.

A Political Economy of the Middle East

Routledge A Political Economy of the Middle East is the most comprehensive analysis of developments in the political economy of the region over the past several decades, examining the interaction of economic development processes, state systems and policies, and social actors in the Middle East. The fourth edition, with new authors Melani Cammett and Ishac Diwan, has been thoroughly revised, with two new introductory chapters that provide an updated framework with which to understand and study the many changes in demography, education, labor markets, urbanization, water and agriculture, and international labor migration in the recent years. The new edition also includes: a new chapter that charts the political economy of the Gulf states and, in particular, the phenomenal

growth of oil economies; a new chapter on the rise of "crony capitalism;" and increased coverage of the changes in civil society and social movements in the region, including an exploration of the causes, dynamics, consequences, and aftermath of the Arab uprisings.

New Silk Road: China Meets Europe In The Baltic Sea Region, The - A Business Perspective

World Scientific The "Belt and Road" initiative announced by Chinese President Xi Jinping in 2013 aims at reviving the ancient trade routes connecting China to Europe and Africa: the "21st Century Maritime Silk Road" and the inland "Silk Road Economic Belt". Both maritime and land routes of the New Silk Road meet Europe in the Baltics — a region accounting for some 150 million inhabitants representing 30% of the total EU population. The maritime route enters Europe through the Mediterranean Sea before reaching the largest European seaports of the North Sea and the Baltic Sea up to Saint Petersburg in Russia. The land route starting from West China crosses Central Asia, Russia and Belarus before reaching the shores of the Baltic Sea. This book focuses on the business and economic dimensions of China's initiative: Chinese government objective and policies, the strategies of Chinese and foreign firms along the Silk Road, trade and investment between China and Nordic-Baltic countries, the Eurasia Land Bridge corridors and logistics, the impact of the New Silk Road on the economies of Central Asia, new institutions financing the "Belt and Road", cross-cultural challenges and Sino-foreign joint ventures along the New Silk Road. The direct impact of China's initiative on economic sectors such as logistics services; the shipping, port management and maritime industry; construction and high-speed train; energy and engineering; and e-commerce, information technology and tourism will be assessed. Readers will be provided with an in-depth analysis of the opportunities and challenges for companies and regions along the New Silk Road as well as 17 short case studies focusing on China-led projects currently developed along the "Belt and Road" and 15 maps of the New Silk Road, the Baltic Sea Region and Central Asia to help in understanding China's vision and strategic moves.

Inside the Enemy's Computer

Identifying Cyber Attackers

Oxford University Press Attribution - tracing those responsible for a cyber attack - is of primary importance when classifying it as a criminal act, an act of war, or an act of terrorism. Three assumptions dominate current thinking: attribution is a technical problem; it is unsolvable; and it is unique. Approaching attribution as a problem forces us to consider it either as solved or unsolved. Yet attribution is far more nuanced, and is best approached as a process in constant flux, driven by judicial and political pressures. In the criminal context, courts must assess the guilt of criminals, mainly based on technical evidence. In the national security context, decision-makers must analyse unreliable and mainly non-technical information in order to identify an enemy of the state. Attribution in both contexts is political: in criminal cases, laws reflect society's prevailing norms and powers; in national security cases, attribution reflects a state's will to maintain, increase or assert its power. However, both processes differ on many levels. The constraints, which reflect common aspects of many other political issues, constitute the structure of the book: the need for judgement calls, the role of private companies, the standards of evidence, the role of time, and the plausible deniability of attacks.

Handbook on Transport and Urban Transformation in China

Edward Elgar Publishing Since 1978, when China embarked on a new period of economic reforms and introduced open door policies, it has experienced a great urban transformation. The role of transport has proved indispensable in this unprecedented rapid urbanisation and economic growth. As the first research-focused book dedicated to this important topic, the Handbook on Transport and Urban Transformation in China offers new insight into the various opportunities and challenges brought by fast-paced motorization and urban development, and explores them in broad spatial-economic, environmental, social, and institutional dimensions.

Criminal Enterprises and Governance in Latin America and the Caribbean

Cambridge University Press This book examines security in three cities that suffer from chronic violence: Rio de Janeiro, Brazil; Medellin, Colombia; and Kingston, Jamaica. In each, democratic states contend with subnational armed groups that dominate territory and play important roles in politics even as they contribute to fear and insecurity. Through a nested three-city, six-neighborhood analysis of the role of criminal groups in governance, this research provides a deep understanding of the impact of crime on political experience. Neighborhoods controlled by different types of armed actors, operating in the same institutional context, build alliances with state officials and participate in political life through the structures created by these armed actors. The data demonstrates the effects criminal dominance can have on security, civil society, elections, and policymaking. Far from reflecting a breakdown of order, varying types of criminal groups generate different local lived political experiences.

China's New Silk Road

An Emerging World Order

Routledge Much is being written about China's new 'One Belt, One Road' initiative, but much of the writing focuses on China itself, on the destinations of the road - Europe and the Middle East - or on the countries through which the road passes, such as Central Asia. This book takes a different approach, assessing the views of East Asian and other countries on the Belt and Road Initiative, both from a transnational and multidisciplinary perspective. The book considers international visions and limitations of the New Silk Road as a new paradigm, explores economic and trade aspects, including infrastructure networks, financial mechanisms, and the likely impact for other countries and regions, and analyses the likely implications for regional and trans-regional cooperation and competition.

Western and Asian regional perspectives on the New Silk Road, including from India, Pakistan, Southeast Asia and Japan are considered throughout the book.

Key Controversies in European Integration

Bloomsbury Publishing Is the EU a success or a failure? Should It Stay or Should It Go? Britain and the EU The Big Waste or Essential to Feed Europe? The Common Agricultural Policy Observers of the European Union could be forgiven in thinking that since its inception the EU project has been under threat from near constant crises. In recent years, controversial issues such as EU enlargement, the fallout from the Eurozone crisis, migration policies, Brexit and the Corona pandemic have tested the EU to its limits and divided public opinion in the process. The major third edition of this comprehensive textbook on the EU seeks to introduce the integration project by looking at the thorny debates politicians, European citizens and the media contend with on a daily basis. Well known for its unique and pedagogically-innovative key debates format, the editors have invited top names in the field to contribute a stirring contribution either 'for' or 'against' each of the toughest political questions the EU faces. In doing so, not only does it offer a broad introduction to all the key concerns of the Union, but it does so in a way that is contemporary, engaging and designed to spark controversy. New to this Edition: - All chapters fully revised and updated New chapter on the transatlantic partnership - All chapters now with key takeaway points - Across all controversies, more inclusion of mainstream gender and feminist approaches

China's Backyard

Flipside Digital Content Company Inc. In this multi-disciplinary and multi-sited volume, the authors challenge reductionist and oversimplifying approaches to understanding China's engagement with Southeast Asia. Productively viewing these interactions through a "e;resource lens";, the editor has transcended disciplinary and area studies divides in order to assemble a dynamic and diverse group of scholars with extensive experience across Southeast Asia and in China, all while bringing together perspectives from resource economics, policy analysis, international relations, human geography, political ecology, history, sociology and anthropology. The result is an important collection that not only offers empirically detailed studies of Chinese energy and resource investments in Southeast Asia, but which attends to the complex and often ambivalent ways in which such investments have become both a source of anxiety and aspiration for different stakeholders in the region.

The Politics and Crisis Management of Animal Health Security

Routledge The Politics and Crisis Management of Animal Health Security addresses the 2001 foot and mouth epidemic in the United Kingdom - one of, if not the, most significant crises ever to face the UK farming industry. Underpinned by interviews with politicians and bureaucrats and with significant primary documentary analysis the book shows that the crisis was a critical juncture in how disease outbreaks have been planned and managed ever since. The author explores how this event affected policy and governance arrangements for managing subsequent disease-induced threats (such as avian influenza and bovine TB) and concludes by considering the 'temporality' of lesson learning by the UK government including the current and future challenges associated with managing incongruent risks (e.g., flood protection, swine flu and Ebola). This book provides students of public policy and administration with a significant illustration of how key concepts and analytical lenses from public policy can be applied to the study of the contours of practical policy change.

Critical Issues in Contemporary China

Unity, Stability and Development

Routledge Critical Issues in Contemporary China: Unity, Stability and Development comprehensively examines key problems crucial to understanding modern-day China. Organized around three interrelated themes of unity, stability and development, each chapter explores distinct issues and debate their significance for China domestically and for Beijing's engagement with the wider world. While presenting contending explanatory approaches, contributors advance arguments to further critical discussion on selected topics. Main issues analysed include: political change military transformation legal reforms economic development energy security environmental degradation food security and safety demographic trends migration and urbanization labour unrest health and education social inequalities ethnic conflicts Hong Kong's integration cross-Strait relations. Given its thorough and up-to-date assessment of major political, social and economic challenges facing China, this fully revised and substantially expanded new edition is an essential read for any student of Chinese Studies.

India's Pakistan Policy

How Think Tanks Are Shaping Foreign Relations

Taylor & Francis This book critically examines the role of think tanks as foreign policy actors. It looks at the origins and development of foreign policy think tanks in India and their changing relevance and position as agents within the policy-making process. The book uses a comparative framework and explores the research discourse of prominent Indian think tanks, particularly on the India-Pakistan dispute, and offers unique insights and perspectives on their research design and methodology. It draws attention to the policy discourse of think tanks during the Composite Dialogue peace process between India and Pakistan and the subsequent support from the government which further expanded their role. One of the first books to offer empirical analyses into the role of these organisations in India, this book highlights the relevance of and the crucial role that these institutions have played as non-state policy actors. Insightful and topical, this book will be of interest to researchers focused on international relations, foreign policy analysis and South Asian politics. It would also be a good resource for students interested in a theoretical understanding of foreign policy institutions in general and Indian foreign policy in particular.

Ecological, Societal, and Technological Risks and the Financial Sector

Springer Nature Today's financial sector faces multiple challenges stemming from ecological, societal, and technological risks such as climate change, political extremism, and cyber-attacks. However, these non-traditional risks are yet to be fully identified and measured, in order to ensure their successful management. This edited collection sheds light on the topic by examining the unique measurement and modelling challenges associated with each of these risks, and their interaction with finance. Offering a comprehensive analysis of non-traditional finance risks, the authors provide the basis for developing appropriate risk management techniques. With new approaches to protect against emerging threats to the financial sector, this edited collection will appeal to academics researching sustainability, development finance, and risk management, as well as policy-makers and practitioners within the banking sector.

Alternative Investments

John Wiley & Sons The complete guide to alternative investments, from experts working with CFA Institute Alternative Investments is the definitive guide to understanding non-traditional asset classes. Alternatives are a disparate group of investments that are distinguished from long-only, publicly traded investments in stocks, bonds, and cash (often referred to as traditional investments). Alternative investments include real estate, commodities, infrastructure, and other non-traditional investments such as private equity or debt and hedge funds. They are attractive to investors because of the potential for portfolio diversification resulting in a higher risk-adjusted return for the portfolio. Alternative Investments and its accompanying workbook (sold separately) lead students and

investment professionals through the many characteristics of non-traditional assets, including: Narrow specialization of the investment managers Relatively low correlation of returns with those of traditional investments Less regulation and less transparency than traditional investments Limited historical risk and return data Unique legal and tax considerations Higher fees, often including performance or incentive fees Concentrated portfolios Restrictions on redemptions (i.e. “lockups” and “gates”) CFA Institute is the world's premier association for investment professionals, and the governing body for the CFA® Program, CIPM® Program, CFA Institute ESG Investing Certificate, and Investment Foundations® Program. Those seeking a deeper understanding of the markets, mechanisms, and use of alternatives will value the level of expertise CFA Institute brings to the discussion, providing a clear, comprehensive resource for students and professionals alike. Whether used alone or in conjunction with the companion workbook, *Alternative Investments* offers a complete course in alternative investments and their role in investment management.
