IGI Global Misunderstandings in technology-mediated communication can be due to a lack of tone and facial expression on the part of the speaker, which provide additional context clues into the meaning of the message beyond textual representation. NAZI CRIMES AGAINST JEWS AND GERMAN POST-WAR JUSTICE

THE WEST GERMAN JUDICIAL SYSTEM DURING ALLIED OCCUPATION (1945-1949)

Walter de Gruyter GmbH & Co KG Of all victims of Nazi persecution, German Jews had to suffer the Nazi yoke for the longest time. Throughout the Third Reich, they were exposed to anti-Jewish propaganda, discrimination, anti-Semitic laws and increasingly to outrages and offences by non-Jewish Germans. While the International Military Tribunal and the subsequent American Military Tribunals at Nuremberg dealt with a variety of Nazi crimes according to international law, these courts did not consider themselves cognizant in adjudicating wrongdoings against German citizens and those who lost German citizenship based on the so-called "Nuremberg laws," such as Germany's Jews. Until recently, scholarship failed to explore this task of the German judiciary in more detail. Edith Raim fills this gap by showing the extent of the crimes committed against Jews beyond the traditionally known facts and by elucidating how the West German administration of justice was reconstructed under Allied supervision.

DIANE Publishing Unlike routine maintenance, capital needs are the large-scale improvements required to make the housing decent and economically sustainable, such as replacing roofs or updating plumbing and electrical systems to increase energy efficiency. The study also looks at the estimated cost of energy and water conservation projects. It finds that the nation's 1.2 million public housing units need an estimated \$25.6 billion for large scale repairs. This report updates a 1998 analysis and includes costs to address overdue repairs, accessibility improvements for disabled residents, lead abatement, and water and energy conservation that would make the homes more cost effective and energy efficient.
