Principles of Finance Holt Rinehart & Winston The first course in finance for finance and business majors has traditionally focused solely on managerial (or corporate) finance. Now, many schools are indicating a need to introduce these students -- particularly the non-finance business majors -- to the other two major components of finance -- institutions and investments -- in this first course but at the same level of rigour as traditional financial management texts. The Dryden Press has answered this call with Principles of Finance. This text begins with a discussion of the principles of financial systems and business organizations, moves on to valuation concepts, and then corporate decision making (managerial finance). It concludes with coverage of investment fundamentals. Key chapters may be covered in a one-term course or supplemented with cases and outside readings for a two-term course. Chapters are written in a flexible, modular format, allowing instructors to cover the material in a different sequence if desired.

International Financial Reporting & Analysis The eighth edition of International Financial Reporting and Analysis has been thoroughly updated in line with changes to International Financial Reporting Standards. Chapters throughout have been rewritten with an increased focus on ethics, sustainability and corporate governance. In addition, all the real-world illustrations and company reports have been reviewed and replaced with up-to-date examples. The international expertise of the stellar author team is woven throughout the text. MindTap, an online learning solution encompassing many different content types, is available with this title. MindTap can be customized to suit your course and contains supporting applications and analytics to help learners make the most of the range of content.

Business Accounting and Finance Cengage Learning Intended for non-specialist students of accounting and finance taking their first module in the subject, within courses such as business studies and management.
