THE CLEAR PATH TO DOING WORK YOU LOVE

Ramsey Press Work isn't supposed to be a four-letter word! Does the work you do matter to you? Are you unsure what you want to do for a living? Are you in the right place but looking to advance? No matter where you are in your career, you were born to do work you love. National bestselling author and career expert Ken Coleman was stuck in an unfulfilling career until he realized he didn't have to be. In his latest book, he draws on what he learned from his own ten-year journey as well as from coaching thousands of others to walk you through the seven stages to discovering and doing meaningful work. Relevant to any job or industry, you'll learn step-by-step how to: Get Clear on the work you were uniquely made to do and why. Get Qualified to do the work you were created for. Get Connected with the right people who can open the doors to your dream. Get Started by overcoming the emotions and mistakes that often hold people back. Get Promoted by developing winning habits and traits. Get Your Dream Job by doing work you love and accomplishing results that matter to you. Give Yourself Away by expanding the dream to leave a legacy. This is your moment. You are needed, and you were made to contribute. It's time to exit the daily grind and use your talents to

start living your dream once and for all.

THE PROXIMITY PRINCIPLE

THE PROVEN STRATEGY THAT WILL LEAD TO THE CAREER YOU LOVE

Ramsey Press Right now, 70% of Americans aren't passionate about their work and are desperately longing for meaning and purpose. They're sick of "average" and know there's something better out there, but they just don't know how to reach it. One basic principle—The Proximity Principle—can change everything you thought you knew about pursuing a career you love. In his latest book, *The Proximity Principle*, national radio host and career expert Ken Coleman provides a simple plan of how positioning yourself near the right people and places can help you land the job you love. Forget the traditional career advice you've heard! Networking, handing out business cards, and updating your online profile do nothing to set you apart from other candidates. Ken will show you how to be intentional and genuine about the connections you make with a fresh, unexpected take on resumes and the job interview process. You'll discover the five people you should look for and the four best places to grow, learn, practice, and perform so you can step into the role you were created to fill. After reading *The Proximity Principle*, you'll know how to connect with the right people and put yourself in the right places, so opportunities will come—and you'll be prepared to take them.

DEBT-FREE DEGREE

THE STEP-BY-STEP GUIDE TO GETTING YOUR KID THROUGH COLLEGE WITHOUT STUDENT LOANS

Ramsey Press Every parent wants the best for their child. That's why they send them to college! But most parents struggle to pay for school and end up turning to student loans. That's why the majority of graduates walk away with \$35,000 in student loan debt and no clue what that debt will really cost them.¹ Student loan debt doesn't open doors for young adults—it closes them. They postpone getting married and starting a family. That debt even takes away their freedom to pursue their dreams. But there is a different way. Going to college without student loans is possible! In *Debt-Free Degree*, Anthony O'Neal teaches parents how to get their child through school without debt, even if they

haven't saved for it. He also shows parents: *How to prepare their child for college *Which classes to take in high school *How and when to take the ACT and SAT *The right way to do college visits *How to choose a major A college education is supposed to prepare a graduate for their future, not rob them of their paycheck and freedom for decades. Debt-Free Degree shows parents how to pay cash for college and set their child up to succeed for life.

THE ECONOMETRICS OF DEMAND SYSTEMS

WITH APPLICATIONS TO FOOD DEMAND IN THE NORDIC COUNTRIES

Springer Science & Business Media This book contains some of the results from the research project "Demand for Food in the Nordic Countries", which was initiated in 1988 by Professor Olof Bolin of the Agricultural University in Ultuna, Sweden and by Professor Karl Iohan Weckman, of the University of Helsinki, Finland. A pilot study was carried out by Bengt Assarsson, which in 1989 led to a successful application for a research grant from the NKJ (The Nordic Contact Body for Agricultural Research) through the national research councils for agricultural research in Denmark, Finland, Norway and Sweden. We are very grateful to Olof Bolin and Karl Iohan Weckman, without whom this project would not have come about, and to the national research councils in the Nordic countries for the generous financial support we have received for this project. We have received comments and suggestions from many colleagues, and this has improved our work substantially. At the start of the project a reference group was formed, consisting of Professor Olof Bolin, Professor Anders Klevmarken, Agr. lie. Gert Aage Nielsen, Professor Karl Iohan Weckman and Cando oecon. Per Halvor Vale. Gert Aage Nielsen left the group early in the project for a position in Landbanken, and was replaced by Professor Lars Otto, while Per Halvor Vale soon joined the research staff. The reference group has given us useful suggestions and encouraged us in our work. Weare very grateful to them.

THE MOM TEST

HOW TO TALK TO CUSTOMERS & LEARN IF YOUR BUSINESS IS A GOOD IDEA WHEN EVERYONE IS LYING TO YOU

Robfitz Ltd The Mom Test is a quick, practical guide that will save you time, money, and heartbreak. They say you shouldn't ask your mom whether your business is a good idea, because she loves you and will lie to you. This is technically true, but it misses the point. You shouldn't ask anyone if your business is a good idea. It's a bad question

and everyone will lie to you at least a little . As a matter of fact, it's not their responsibility to tell you the truth. It's your responsibility to find it and it's worth doing right . Talking to customers is one of the foundational skills of both Customer Development and Lean Startup. We all know we're supposed to do it, but nobody seems willing to admit that it's easy to screw up and hard to do right. This book is going to show you how customer conversations go wrong and how you can do better.

This title has been endorsed by Cambridge International Examinations for the latest Cambridge IGCSE (0450) and Cambridge O Level Business Studies (7115) syllabuses. - Offers an international perspective through a wide range of up-to-date case studies - Reinforces understanding through a variety of activities and discussion points - Provides examination preparation with revisions questions and summaries throughout - Written in accessible language, but with plenty of detail for top-grade students

PHENOTYPES AND GENOTYPES

THE SEARCH FOR INFLUENTIAL GENES

Springer This timely text presents a comprehensive guide to genetic association, a new and rapidly expanding field that aims to elucidate how our genetic code (genotypes) influences the traits we possess (phenotypes). The book provides a detailed review of methods of gene mapping used in association with experimental crosses, as well as genome-wide association studies. Emphasis is placed on model selection procedures for analyzing data from large-scale genome scans based on specifically designed modifications of the Bayesian information criterion. Features: presents a thorough introduction to the theoretical background to studies of genetic association (both genetic and statistical); reviews the latest advances in the field; illustrates the properties of methods for mapping quantitative trait loci using computer simulations and the analysis of real data; discusses open challenges; includes an extensive statistical appendix as a reference for those who are not totally familiar with the fundamentals of statistics.

SPECIFICATION ANALYSIS IN THE LINEAR MODEL

Routledge Originally published in 1987. This collection of original papers deals with various issues of specification in the context of the linear statistical model. The volume honours the early econometric work of Donald Cochrane, late Dean of Economics and Politics at Monash University in Australia. The chapters focus on problems associated with autocorrelation of the error term in the linear regression model and include appraisals of early work on this topic by Cochrane and Orcutt. The book includes an extensive survey of autocorrelation tests; some exact finite-sample tests; and some issues in preliminary test estimation. A wide range of other specification issues is discussed, including the implications of random regressors for Bayesian prediction; modelling with joint conditional probability functions; and results from duality theory. There is a major survey chapter dealing with specification tests for non-nested models, and some of the applications discussed by the contributors deal with the British National Accounts and with Australian financial and housing markets.

DIFFERENTIAL ITEM FUNCTIONING

Routledge Test fairness is a moral imperative for both the makers and the users of tests. This book focuses on methods for detecting test items that function differently for different groups of examinees and on using this information to improve tests. Of interest to all testing and measurement specialists, it examines modern techniques used routinely to insure test fairness. Three of these relevant to the book's contents are: * detailed reviews of test items by subject matter experts and members of the major subgroups in society (gender, ethnic, and linguistic) that will be represented in the examinee population * comparisons of the predictive validity of the test done separately for each one of the major subgroups of examinees * extensive statistical analyses of the relative performance of major subgroups of examinees on individual test items.

ECONOMETRIC ANALYSIS OF CROSS SECTION AND PANEL DATA, SECOND EDITION

MIT Press The second edition of a comprehensive state-of-the-art graduate level text on microeconomic methods, substantially revised and updated. The second edition of this acclaimed graduate text provides a unified treatment of

two methods used in contemporary econometric research, cross section and data panel methods. By focusing on assumptions that can be given behavioral content, the book maintains an appropriate level of rigor while emphasizing intuitive thinking. The analysis covers both linear and nonlinear models, including models with dynamics and/or individual heterogeneity. In addition to general estimation frameworks (particular methods of moments and maximum likelihood), specific linear and nonlinear methods are covered in detail, including probit and logit models and their multivariate, Tobit models, models for count data, censored and missing data schemes, causal (or treatment) effects, and duration analysis. *Econometric Analysis of Cross Section and Panel Data* was the first graduate econometrics text to focus on microeconomic data structures, allowing assumptions to be separated into population and sampling assumptions. This second edition has been substantially updated and revised. Improvements include a broader class of models for missing data problems; more detailed treatment of cluster problems, an important topic for empirical researchers; expanded discussion of "generalized instrumental variables" (GIV) estimation; new coverage (based on the author's own recent research) of inverse probability weighting; a more complete framework for estimating treatment effects with panel data, and a firmly established link between econometric approaches to nonlinear panel data and the "generalized estimating equation" literature popular in statistics and other fields. New attention is given to explaining when particular econometric methods can be applied; the goal is not only to tell readers what does work, but why certain "obvious" procedures do not. The numerous included exercises, both theoretical and computer-based, allow the reader to extend methods covered in the text and discover new insights.

STATISTICAL METHODS FOR PSYCHOLOGY

Cengage Learning **STATISTICAL METHODS FOR PSYCHOLOGY** surveys the statistical techniques commonly used in the behavioral and social sciences, particularly psychology and education. To help students gain a better understanding of the specific statistical hypothesis tests that are covered throughout the text, author David Howell emphasizes conceptual understanding. This Eighth Edition continues to focus students on two key themes that are the

cornerstones of this book's success: the importance of looking at the data before beginning a hypothesis test, and the importance of knowing the relationship between the statistical test in use and the theoretical questions being asked by the experiment. New and expanded topics--reflecting the evolving realm of statistical methods--include effect size, meta-analysis, and treatment of missing data. BIM HANDBOOK

A GUIDE TO BUILDING INFORMATION MODELING FOR OWNERS, DESIGNERS, ENGINEERS, CONTRACTORS, AND FACILITY MANAGERS

John Wiley & Sons Discover BIM: A better way to build better buildings Building Information Modeling (BIM) offers a novel approach to design, construction, and facility management in which a digital representation of the building product and process is used to facilitate the exchange and interoperability of information in digital format. BIM is beginning to change the way buildings look, the way they function, and the ways in which they are designed and built. The BIM Handbook, Third Edition provides an in-depth understanding of BIM technologies, the business and organizational issues associated with its implementation, and the profound advantages that effective use of BIM can provide to all members of a project team. Updates to this edition include: Information on the ways in which professionals should use BIM to gain maximum value New topics such as collaborative working, national and major construction clients, BIM standards and guides A discussion on how various professional roles have expanded through the widespread use and the new avenues of BIM practices and services A wealth of new case studies that clearly illustrate exactly how BIM is applied in a wide variety of conditions Painting a colorful and thorough picture of the state of the art in building information modeling, the BIM Handbook, Third Edition guides readers to successful implementations, helping them to avoid needless frustration and costs and take full advantage of this paradigm-shifting approach to construct better buildings that consume fewer materials and require less time, labor, and capital resources.

DAVE RAMSEY'S COMPLETE GUIDE TO MONEY

Ramsey Press If you're looking for practical information to answer all your "How?" "What?" and "Why?" questions

about money, this book is for you. Dave Ramsey's Complete Guide to Money covers the A to Z of Dave's money teaching, including how to budget, save, dump debt, and invest. You'll also learn all about insurance, mortgage options, marketing, bargain hunting and the most important element of all—giving. This is the handbook of Financial Peace University. If you've already been through Dave's nine-week class, you won't find much new information in this book. This book collects a lot of what he's been teaching in FPU classes for 20 years, so if you've been through class, you've already heard it! It also covers the Baby Steps Dave wrote about in The Total Money Makeover, and trust us—the Baby Steps haven't changed a bit. So if you've already memorized everything Dave's ever said about money, you probably don't need this book. But if you're new to this stuff or just want the all-in-one resource for your bookshelf, this is it!

NURTURESHOCK

NEW THINKING ABOUT CHILDREN

Twelve In a world of modern, involved, caring parents, why are so many kids aggressive and cruel? Where is intelligence hidden in the brain, and why does that matter? Why do cross-racial friendships decrease in schools that are more integrated? If 98% of kids think lying is morally wrong, then why do 98% of kids lie? What's the single most important thing that helps infants learn language? NurtureShock is a groundbreaking collaboration between award-winning science journalists Po Bronson and Ashley Merryman. They argue that when it comes to children, we've mistaken good intentions for good ideas. With impeccable storytelling and razor-sharp analysis, they demonstrate that many of modern society's strategies for nurturing children are in fact backfiring--because key twists in the science have been overlooked. Nothing like a parenting manual, the authors' work is an insightful exploration of themes and issues that transcend children's (and adults') lives.

REASONING, RATIONALITY AND DUAL PROCESSES

SELECTED WORKS OF JONATHAN ST B.T. EVANS

Psychology Press In the World Library of Psychologists series, international experts themselves present career-long collections of what they judge to be their finest pieces - extracts from books, key articles, salient research findings, and their major theoretical and practical contributions. Jonathan St B T Evans is amongst the foremost cognitive

psychologists of his generation, having been influential in spearheading developments in the psychological study of reasoning from its very beginnings in the 1970s up to the present day. This volume of self-selected papers recognises Professor Evan's major contribution to the psychological study of thinking and reasoning by bringing together his most influential and important works. Early selections in the book focus upon experimental studies of reasoning - matching bias in the Wason selection task, belief bias in syllogistic reasoning, and also seminal work on the understanding of conditional statements. The later selections include Evans' work on more general forms of dual process and dual system theory, and his recent account of two minds in one brain. The volume also contains chapters which highlight Evans' contribution to the topic of human rationality, and also his influence on the development of the "new paradigm" in the psychology of reasoning. The key developments in the psychology of reasoning are paralleled by those in Evans's own intellectual history, and the book will therefore make essential reading for all researchers in the psychology of reasoning, and a wider audience of graduate and upper-level undergraduate students with an interest in reasoning and/or dual process theory.

INFORMATION, INTERACTION, AND AGENCY

Springer Science & Business Media Contemporary epistemological and cognitive studies, as well as recent trends in computer science and game theory have revealed an increasingly important and intimate relationship between Information, Interaction, and Agency. Agents perform actions based on the available information and in the presence of other interacting agents. From this perspective Information, Interaction, and Agency neatly ties together classical themes like rationality, decision-making and belief revision with games, strategies and learning in a multi-agent setting. Unified by the central notions Information, Interaction, and Agency, the essays in this volume provide refreshing methodological perspectives on belief revision, dynamic epistemic logic, von Neumann games, and evolutionary game theory; all of which in turn are central approaches to understanding our own rationality and that of other agents.

COCHRANE HANDBOOK FOR SYSTEMATIC REVIEWS OF INTERVENTIONS

Wiley Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews

respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

IBM IMS SOLUTIONS FOR AUTOMATING DATABASE MANAGEMENT

IBM Redbooks Over the last few years, IBM® IMSTM and IMS tools have been modernizing the interfaces to IMS and the IMS tools to bring them more in line with the current interface designs. As the mainframe software products are becoming more integrated with the Windows and mobile environments, a common approach to interfaces is becoming more relevant. The traditional 3270 interface with ISPF as the main interface is no longer the only way to do some of these processes. There is also a need to provide more of a common looking interface so the tools do not have a product-specific interface. This allows more cross product integration. Eclipse and web-based interfaces being used in a development environment, tooling using those environments provides productivity improvements in that the interfaces are common and familiar. IMS and IMS tools developers are making use of those environments to provide tooling that will perform some of the standard DBA functions. This book will take some selected processes and show how this new tooling can be used. This will provide some productivity improvements and also provide a more familiar environment for new generations DBAs. Some of the functions normally done by DBA or console operators can now be done in this eclipse-based environment by the application developers. This means that the need to request these services from others can be eliminated. This IBM Redbooks® publication examines specific IMS DBA processes and highlights the new IMS and IMS tools features, which show an alternative way to accomplish those processes. Each chapter highlights a different area of the DBA processes like: PSB creation Starting/stopping a database in an IMS system Recovering a database Cloning a set of databases

ASSESSMENT IN COUNSELING

PROCEDURES AND PRACTICES

John Wiley & Sons The latest edition of this perennial bestseller instructs and updates students and clinicians on the basic principles of psychological assessment and measurement, recent changes in assessment procedures, and the most widely used tests in counseling practice today. Dr. Danica Hays guides counselors in the appropriate selection, interpretation, and communication of assessment results. This edition covers more than 100 assessment instruments used to evaluate substance abuse and other mental health disorders, intelligence, academic aptitude and achievement, career and life planning, personal interests and values, assessment of personality, and interpersonal relationships. In addition, a new chapter on future trends in assessment discusses the changing cultural landscape, globalization, and technology. Perfect for introductory classes, this text provides students and instructors with practical tools such as bolded key terminology; chapter pretests, summaries, and review questions; self-development and reflection activities; class and field activities; diverse client case examples; practitioner perspectives illustrating assessment in action; and resources for further reading. PowerPoint slides, a test bank, a sample syllabus, and chapter outlines to facilitate teaching are available to instructors by request to ACA. *Requests for digital versions from the ACA can be found on wiley.com. *To request print copies, please visit the ACA website here. *Reproduction requests for material from books published by ACA should be directed to permissions@counseling.org

marketplace. The eighth edition has been fully updated to reflect the recent financial crisis and includes a new chapter on Hedge Funds.

BABY STEPS MILLIONAIRES

HOW ORDINARY PEOPLE BUILT EXTRAORDINARY WEALTH--AND HOW YOU CAN TOO

Ramsey Press You Can Baby Step Your Way to Becoming a Millionaire Most people know Dave Ramsey as the guy who did stupid with a lot of zeros on the end. He made his first million in his twenties—the wrong way—and then went bankrupt. That’s when he set out to learn God’s ways of managing money and developed the Ramsey Baby Steps. Following these steps, Dave became a millionaire again—this time the right way. After three decades of guiding millions of others through the plan, the evidence is undeniable: if you follow the Baby Steps, you will become a millionaire and get to live and give like no one else. In Baby Steps Millionaires, you will . . . *Take a deeper look at Baby Step 4 to learn how Dave invests and builds wealth *Learn how to bust through the barriers preventing them from becoming a millionaire *Hear true stories from ordinary people who dug themselves out of debt and built wealth *Discover how anyone can become a millionaire, especially you Baby Steps Millionaires isn’t a book that tells the secrets of the rich. It doesn't teach complicated financial concepts reserved only for the elite. As a matter of fact, this information is straightforward, practical, and maybe even a little boring. But the life you'll lead if you follow the Baby Steps is anything but boring! You don’t need a large inheritance or the winning lottery number to become a millionaire. Anyone can do it—even today. For those who are ready, it’s game on!

THE PSYCHIC LIFE OF POWER

THEORIES IN SUBJECTION

Stanford University Press Judith Butler's new book considers the way in which psychic life is generated by the social operation of power, and how that social operation of power is concealed and fortified by the psyche that it produces. It combines social theory, philosophy, and psychoanalysis in novel ways, and offers a more sustained analysis of the theory of subject formation implicit in her previous books.

FOR THE SAKE OF THE ARGUMENT

RAMSEY TEST CONDITIONALS, INDUCTIVE INFERENCE AND NONMONOTONIC REASONING

Cambridge University Press Suppositions made "for the sake of the argument" sometimes conflict with our beliefs, and when they do, some beliefs are rejected and others retained. Thanks to such hypothetical belief contravention, adding content to a supposition can undermine conclusions reached without it. Subversion can also arise because suppositional reasoning is ampliative. These two types of nonmonotonicity are the focus of this book.

APPLIED CORPORATE FINANCE, 4TH EDITION

Wiley Global Education Aswath Damodaran, distinguished author, Professor of Finance, and David Margolis, Teaching Fellow at the NYU Stern School of Business, have delivered the newest edition of Applied Corporate Finance. This readable text provides the practical advice students and practitioners need rather than a sole concentration on debate theory, assumptions, or models. Like no other text of its kind, Applied Corporate Finance, 4th Edition applies corporate finance to real companies. It now contains six real-world core companies to study and follow. Business decisions are classified for students into three groups: investment, financing, and dividend decisions.

MEANS-TESTED TRANSFER PROGRAMS IN THE UNITED STATES

University of Chicago Press Few United States government programs are as controversial as those designed to aid the poor. From tax credits to medical assistance, aid to needy families is surrounded by debate—on what benefits should

be offered, what forms they should take, and how they should be administered. The past few decades, in fact, have seen this debate lead to broad transformations of aid programs themselves, with Aid to Families with Dependent Children replaced by Temporary Assistance to Needy Families, the Earned Income Tax Credit growing from a minor program to one of the most important for low-income families, and Medicaid greatly expanding its eligibility. This volume provides a remarkable overview of how such programs actually work, offering an impressive wealth of information on the nation's nine largest "means-tested" programs—that is, those in which some test of income forms the basis for participation. For each program, contributors describe origins and goals, summarize policy histories and current rules, and discuss the recipient's characteristics as well as the different types of benefits they receive. Each chapter then provides an overview of scholarly research on each program, bringing together the results of the field's most rigorous statistical examinations. The result is a fascinating portrayal of the evolution and current state of means-tested programs, one that charts a number of shifts in emphasis—the decline of cash assistance, for instance, and the increasing emphasis on work. This exemplary portrait of the nation's safety net will be an invaluable reference for anyone interested in American social policy.

NEVER LET ME GO

Vintage Canada From the Booker Prize-winning author of *The Remains of the Day* and *When We Were Orphans*, comes an unforgettable edge-of-your-seat mystery that is at once heartbreakingly tender and morally courageous about what it means to be human. Hailsham seems like a pleasant English boarding school, far from the influences of the city. Its students are well tended and supported, trained in art and literature, and become just the sort of people the world wants them to be. But, curiously, they are taught nothing of the outside world and are allowed little contact with it. Within the grounds of Hailsham, Kathy grows from schoolgirl to young woman, but it's only when she and her friends Ruth and Tommy leave the safe grounds of the school (as they always knew they would) that they realize the full truth of what Hailsham is. *Never Let Me Go* breaks through the boundaries of the literary novel. It is a gripping mystery, a beautiful love story, and also a scathing critique of human arrogance and a moral examination of how we treat the vulnerable and different in our society. In exploring the themes of memory and the impact of the past, Ishiguro takes on the idea of a possible future to create his most moving and powerful book to date.
