Everyday Media Culture in Africa Audiences and Users Taylor & Francis African audiences and users are rapidly gaining in importance and increasingly targeted by global media companies, social media platforms and mobile phone operators. This is the first edited volume that addresses the everyday lived experiences of Africans in their interaction with different kinds of media: old and new, state and private, elite and popular, global and national, material and virtual. So far, the bulk of academic research on media and communication in Africa has studied media through the lens of media-state relations, thereby adopting liberal democracy as the normative ideal and examining the potential contribution of African media to development and democratization. Focusing instead on everyday media culture in a range of African countries, this volume contributes to the broader project of provincializing and decolonizing audience and internet studies. European Media Policy for the Twenty-First Century Assessing the Past, Setting Agendas for the Future Routledge Media policy issues sit at the heart of the structure and functioning of media systems in Europe and beyond. This book brings together the work of a range of leading media policy scholars to provide inroads to a better understanding of how effective media policies can be developed to ensure a healthy communication sector that contributes to the wellbeing of individual citizens, as well as a more democratic society. Faced with a general atmosphere of disillusionment in the European project, one of the core questions tackled by the volume's contributors is: what scope is there for European media policy that can exist beyond the national level? Uniquely, the volume's chapters are structured around four key policy themes: media convergence; the continued role and position of public regulatory intervention in media policy; policy issues arising from the development of new electronic communication network environments; and lessons for European media policy from cases beyond the EU. In its chapters, the volume provides enriched understandings of the role and significance of policy actors, institutions, structures, instruments and processes in communication and media policy. China's Influence on Non-Trade Concerns in International Economic Law Routledge This volume examines the range of Non-Trade Concerns (NTCs) that may conflict with international economic rules and proposes ways to protect them within international law and international economic law. Globalization without local concerns can endanger relevant issues such as good governance, human rights, right to water, right to food, social, economic, cultural and environmental rights, labor rights, access to knowledge, public health, social welfare, consumer interests and animal welfare, climate change, energy, environmental protection and sustainable development, product safety, food safety and security. Focusing on China, the book shows the current trends of Chinese law and policy towards international standards. The authors argue that China can play a leading role in this context: not only has China adopted several reforms and new regulations to address NTCs; but it has started to play a very relevant role in international negotiations on NTCs such as climate change, energy, and culture, among others. While China is still considered a developing country, in particular from the NTCs' point of view, it promises to be a key actor in international law in general and, more specifically, in international economic law in this respect. This volume assesses, taking into consideration its special context, China's behavior internally and externally to understand its role and influence in shaping NTCs in the context of international economic law.
