Tired of math textbooks with 700 to 1,000 pages? Tired of massive student failure in gatekeeper math courses like Algebra I? Tired of math phobic students (and their parents) exclaiming, "I hate math!"? Maybe it is time to try a different curriculum. Math For Everyone is a curriculum designed to promote massive student (and teacher) math success. Each year's content in the six math courses (7th Grade Math, Algebra I, Geometry I, Algebra II, Math Analysis and Calculus) is boiled down into its essential vocabulary and 5-7 key concepts with particular attention paid to clarity and articulation between courses. Assessment includes old favorites as well as authentic assessment with rubrics and grading advice included. No text is longer than 80 pages as the 5-7 key concepts can be amply demonstrated and practiced in this amount of space. Math For Everyone is not only great for new math teachers and struggling math students, but great for everyone. Nathaniel Max Rock is an educator since 2001 and the author of more than a dozen education books. He has taught the following courses: 7th Grade Math, Algebra I, Geometry I, Algebra II, Math Analysis, Calculus, as well as California High School Exit Exam (CAHSEE) Prep Classes, AVID Elective (9th & 10th grade), and Carnegie Computer classes. Max's authoring topics include math, education and religion. **New Mathematics Today book 6 S. Math and Art and Music Section 5. Math and Fun and Recreation Section 6. Math and Life Skills **Closing America's High-achievement Gap: A Wise Giver's Guide to Helping Our Most Talented Students Reach Their Full Potential** *The Philanthropy Roundtable* This intriguing book makes a powerful case for a sorely needed U.S. educational improvement that has been almost entirely overlooked. During the last two decades, philanthropists and education reformers have made urgent efforts to pull weak students up to levels of basic competency. Though that vital work is incomplete, there is evidence of progress among low achievers. Meanwhile, though, children at the other end of the achievement spectrum have gotten lost in the shuffle. Programs and funding once aimed at stimulating high-potential students to make the most of their talents have withered, and we are now doing a poor job of stimulating our quick learners. When the particular needs of high-potential

students are not met by schools, that is a moral failure—because every child deserves to be stretched and challenged. It is also a threat to our national interests—since high achievers will be crucial to America’s future ability to compete internationally. This is a field where donors have wide-open opportunities to lead. In the pages of this fresh, practical guidebook, savvy school-reform philanthropists will be introduced to scores of programs and institutions that can pull talented students of all ages, races, and income levels up to their full natural capabilities.
