## **A CONTEMPORARY LOOK AT BUSINESS ETHICS**

---

IAP **A Contemporary Look at Business Ethics** provides a 'present day' look at business ethics to include the challenges, opportunities and increased need for ethical leadership in today's and tomorrow's organizations. The book discusses current and future business ethics challenges, issues and opportunities which provides the context leaders and their organizations must navigate. The book includes an in-depth look at lessons learned about the causes of unethical behavior by examining a number of real-world examples of ethical scandals from around the world that have taken place over the past few decades. The analysis of the various ethical scandals focuses on concepts like ethical versus unethical leadership, received wisdom, the bottom-line mentality, groupthink and moral muteness, all of which contribute to the kind of organizational culture and ethical behavior one finds in an organization. The book discusses ethical decision making in general and the increased role of religion and spirituality, in confronting unethical behavior in contemporary

organizations. The book also takes an in-depth look at the impact ethical scandals have on employees and more specifically the psychological contract and person-organization ethical fit with the goal of identifying, along with other things, what leaders can do to restore relationships with employees and rebuild the organization's reputation in the eyes of various stakeholders.

## **CONTEMPORARY ISSUES IN BUSINESS AND ECONOMICS**

---

**MDPI This book is a collection of high-impact papers accepted and presented at the 2019 Vietnam's Business and Economics Research Conference (VBER2019) organised by Ho Chi Minh City Open University held on 18th-20th July 2019. The Special Issue is associated with a broad coverage of the contemporary issues in Business and Economics in Vietnam**

and other emerging markets reflecting a key theme of VBER2019: Vietnam's Place in the Asia Pacific Region. A total of 14 papers were published from more than the 120 submissions to the VBER2019 Conference. Published papers had been undergone a rigorous reviewing process conducted by the Journal of Risk and Financial Management. The papers incorporated in this book address contemporary issues in business and economics from Vietnam and other emerging markets in the Asian region from various angles such as economics, finance, and statistics to management science. At the time of writing this note, some of the papers have attracted more than 1000 downloads in 3 months. In particular, a paper on "Foreign Direct Investment and Economic Growth from Developing Countries in the Short Run and Long Run" by Trang Thi-Huyen Dinh and her team has attracted almost 6000 downloads in 3 months. These statistics indicate that the papers published in this Special Issue have attracted the wide interest of readers. Among these 14 published papers, three main areas of important contemporary issues in Business and Economics in the Asian region can be identified. First, a block of papers deals with various important and fundamental issues in the emerging markets the Asian region, from exchange rate regime, financial inclusion, and financial development to energy consumption and environmental degradation. On the issue of CO<sub>2</sub> emissions, energy consumption and economic growth in the ASEAN, Vo, Vo, and Le utilized various time series econometrics approaches. Key findings from this paper indicate that there are no long-run relationships among carbon dioxide (CO<sub>2</sub>) emissions, energy consumption, renewable energy, population growth, and economic growth in the Philippines and Thailand, but a relationship does exist in Indonesia, Myanmar, and Malaysia. Loo, in his paper on financial inclusion for the ASEAN, concluded that advancing internet capability and availability present investors an opportunity to offer financial technology or Fintech to meet the need for financial services in this digital era. Second, a challenge in quantitative studies for a single country, such as Vietnam, with limited data is generally noted. However, various empirical studies on Vietnam's business and economics issues have been conducted. Nguyen, Quan, and Pham examined the cultural distance and entry mode of foreign direct investment in Vietnam. A key finding from their paper is that when there is a great cultural difference between Vietnam and their home country, foreign-invested firms prefer wholly owned subsidiaries over equity joint ventures. Within the Vietnamese market, Pham, Vo, Ho, and McAleer conducted a study on the issue of corporate financial distress. The authors conclude that the corporate financial distress prediction model, which includes accounting factors with macroeconomic indicators, performs much better than alternative models. In addition, the evidence confirms that the global financial crisis (GFC) had a damaging impact on each sector, with the Health & Education sector demonstrating the most impressive recovery post-GFC, and the utilities sector recording a dramatic increase in bankruptcies post-GFC. At another

extreme of the spectrum, Van and Nguyen considered that competitive context, social influences, the understanding of managers about corporate social responsibility (CSR), and the internal environment of companies are the four drivers of CSR. The authors also argued that in the four drivers, competitive context has the strongest impact on adopting CSR. Third, last but not least, various papers focus on an important aspect of public finance. For an example, Pham, Pham, and Ly documented the effect of double taxation treaties on the bilateral trade of Vietnam with ASEAN member states, thereby making an extensive comparison with its EU partner countries. Their findings indicate the significant contributions of the tax treaties to Vietnam's trade performance, not exclusively with ASEAN but also with EU partner countries. In addition, regarding public finance for Vietnam, Nguyen, Vo, Ho, and Vo investigated the contribution of fiscal decentralisation to economic growth across provinces in Vietnam. For the first time in Vietnam, the fiscal decentralisation index together its two subcomponents, including fiscal importance and fiscal autonomy, are developed. Findings from this paper indicate that while fiscal importance and an overall level of fiscal decentralisation have provided negative impact on provincial economic growth, fiscal autonomy has a positive impact on economic growth across provinces in Vietnam.

## **BUSINESS CYCLES IN THE CONTEMPORARY WORLD**

---

### **DESCRIPTION, CAUSES, AGGREGATION, AND SYNCHRONIZATION**

---

Springer Science & Business Media **The book provides a thorough and sophisticated descriptive analysis of business cycles in a historical perspective. The study is based on the latest available time series as well as latest techniques from the frequency domain. A combined univariate and bivariate analysis is conducted on the national as well as supranational (G7- and Euro-Area wide) level. Issues of stability, volatility, and cyclicity are investigated jointly. An extensive analysis of US manufacturing investment series on the fairly disaggregated four-digit level highlights the limits of linear models to capture the sectoral aggregation process. Synchronization is modelled by a mode-locking mechanism of industrial investment cycles induced by informational externalities. The model in its stochastic version is numerically simulated to assess an agreement between model and data.**
