SUBMISSION

Random House As the 2022 French Presidential election looms, two candidates emerge as favourites: Marine Le Pen of the Front National, and the charismatic Muhammed Ben Abbes of the growing Muslim Fraternity. Forming a controversial alliance with the political left to block the Front National's alarming ascendancy, Ben Abbes sweeps to power, and overnight the country is transformed. This proves to be the death knell of French secularism, as Islamic law comes into force: women are veiled, polygamy is encouraged and, for our narrator François - misanthropic, middle-aged and alienated - life is set on a new course. Submission is a devastating satire, comic and melancholy by turns, and a profound meditation on faith and meaning in Western society.

HOW TO LEARN SPANISH IN 30 DAYS

HOW2 Edizioni This book will allow you to learn Spanish in only 30 days, starting from scratch. And this is more than a simple promise. Let me explain... The method is very simple: this book is divided in 30 chapters, one for each day, to let you learn the basics of this language in just one month. To make the most of this course, you just need to follow one rule: reading one chapter every day, no more, no less. If you follow this rule and the guidelines included in this book, the result is guaranteed. Forget about the usual boring grammar courses, with their impersonal style. "How to learn Spanish in 30 days" has been created with all the trappings of self-help, as a practical manual, with a personal, fun and motivational touch. It is full of many curious anecdotes and useful pieces of advice not only to speak in Spanish, but also to help you while travelling. If you are still not convinced, keep reading... **FROM THE PREFACE...** (...) You are going to tell me: "so, in 30 days I will be able to learn an entire language?!". The answer is YES! First of all, as any valuable product, it has brilliantly passed the quality check: friends and relatives have tested this manual and the following month they did pretty well with grammar and vocabulary, trust me. Of course, in 30 days no one becomes a native speaker: but you can build a strong foundation on which to build a beautiful house. Do you get what I mean? Studying a little bit every day is a secret as simple as it is effective to make the learning easier and quicker. I will give you the opportunity to analyse in depth every little secret about grammar and vocabulary, and you must really promise me that you will do everything you can to complete this rich training: consult online newspapers, watch films or TV series with subtitles, read a good book with a dictionary next to you, in short take every little opportunity to be in contact with Spanish as much as possible. Then there will be space for real dialogues in Spanish, the testing ground for your theoretical skills. When you go on holiday to a

Spanish-speaking country or you will have to use Spanish in any other situation, you will just want to do your best. Think about this: one month. 30 days of studying will help you learning a new language, improving your curriculum, immersing yourself in a new and different world. It will be a special month, and you will be satisfied.

ENGLISH BY THE NATURE METHOD

English by the by Nature Method. The aim of the natural approach is to develop communicative skills, and it is primarily intended to be used with beginning learners. It is presented as a set of principles that can apply to a wide range of learners and teaching situations, and concrete objectives depend on the specific context in which it is used. Terrell outlines three basic principles of the approach: "Focus of instruction is on communication rather than its form." "Speech production comes slowly and is never forced." "Early speech goes through natural stages (yes or no response, one- word answers, lists of words, short phrases, complete sentences.)" These principles result in classrooms where the teacher emphasizes interesting, comprehensible input and low-anxiety situations.

REMEMBERING SIMPLIFIED HANZI

HOW NOT TO FORGET THE MEANING AND WRITING OF CHINESE CHARACTERS

University of Hawaii Press "The approach that has helped thousands of learners memorize Japanese kanji has been adapted to help students with Chinese characters. *Remembering Simplified Hanzi* covers the writing and meaning of the 1,000 most commonly used characters in the traditional Chinese writing system, plus another 500 that are best learned at an early stage." "Of critical importance to the approach found in these pages is the

systematic arranging of characters in an order best suited to memory. In the Chinese writing system, strokes and simple components are nested within relatively simple characters, which can, in turn, serve as parts of more complicated characters and so on. Taking advantage of this allows a logical ordering, making it possible for students to approach most new characters with prior knowledge that can greatly facilitate the learning process."--BOOK JACKET.

LONG LIVE LATIN

THE PLEASURES OF A USELESS LANGUAGE

Latin has given us so much, from Virgil's Aeneid to Ovid's Metamorphoses, from some of the world's most enduring stories to the words we use everyday. And yet we call it dead. Oxford academic Nicola Gardini argues the case for its vitality and value, offering a personal and passionate defence of its beauty and future. From ancient writers we can learn about such vital aspects of life as love, purpose, eloquence, beauty and loss. These lessons from the past can illuminate our present, and Gardini encourages us to dig to the roots of our own language to consider how Latin has influenced the ways in which we communicate, think and live today. A timely reminder that not everything needs to be 'leveraged', 'optimised' or 'efficient' - some things enrich our lives by simply being part of them. A formidable mix of history, memoir and criticism, this is a beautiful love letter to one language that ultimately celebrates the vital power of all literature.

HACKING CHINESE

A PRACTICAL GUIDE TO LEARNING MANDARIN

Learning Chinese can be frustrating and difficult, partly because it's very different from European languages. Following a teacher, textbook or language course is not enough. They show you the characters, words and grammar you need to become proficient in Chinese, but they don't teach you how to learn them! Regardless of what program you're in (if any), you need to take responsibility for your own learning. If you don't, you will miss many important things that aren't included in the course you're taking. If you study on your own, you need to be even more aware of what you need to do, what you're doing at the moment and the difference between them. Here are some of the questions I have asked and have since been asked many times by students: How do I learn characters efficiently? How do I get the most out of my course or teacher? Which are the best learning tools and resources? How can I become fluent in Mandarin? How can I improve my pronunciation? How do I learn successfully on my own? How can I motivate myself to study more? How can I fit learning Chinese into a busy

schedule? The answers I've found to these questions and many others form the core of this book. It took eight years of learning, researching, teaching and writing to figure these things out. Not everybody has the time to do that! I can't go back in time and help myself learn in a better way, but I can help you! This book is meant for normal students and independent language learners alike. While it covers all major areas of learning, you won't learn Chinese just by reading this book. It's like when someone on TV teaches you how to cook: you won't get to eat the delicious dish just by watching the program; you have to do the cooking yourself. That's true for this book as well. When you apply what you learn, it will boost your learning, making every hour you spend count for more, but you still have to do the learning yourself. This is what a few readers have said about the book: "The book had me nodding at a heap of things I'd learnt the hard way, wishing I knew them when I started, as well as highlighting areas that I'm currently missing in my study." - Geoff van der Meer, VP engineering
"This publication is like a bible for anyone serious about Chinese proficiency. It's easy for anyone to read and written with scientific precision." - Zachary Danz, foreign teacher, children's theatre artist
About me I started learning Chinese when I was 23 (that's more than eight years ago now) and have since studied in many different situations, including serious immersion programs abroad, high-intensity programs in Sweden, online courses, as well as on the side while working or studying other things. I have also successfully used my Chinese in a graduate program for teaching Chinese as a second language, taught entirely in Chinese mostly for native speakers (the Graduate Institute for Teaching Chinese as a Second Language at National Taiwan Normal University). All these parts have contributed to my website, Hacking Chinese, where I write regularly about how to learn Mandarin.

BOTANICAL ILLUSTRATION

Laveturine Although botanical drawings are specialised scientific renderings they possess an endearing universal appeal. Their commitment to accuracy in no way limits their aesthetic merit as full-fledged works of art. The images in this book are chosen from thousands of illustrations from the 16th to the early 20th century. Some of the drawings, even from Pierre-Joseph Redoute, have never been published before.

THE FRENCH HISTORICAL REVOLUTION

THE ANNALES SCHOOL 1929-2014

In the 20th century, historians began arguing for new ways of doing history. This "new history" movement called for a total history open to exploring every human activity. Instead of concentrating on the great deeds of statesmen and generals, new history considered the views and experiences of ordinary people. Instead of limiting themselves to official documents, new historians examined a greater variety of evidence, collaborating with sociologists, anthropologists, economists, linguists, and psychologists. Instead of traditional narratives, new history examined structures. Instead of claiming objective truth, new history acknowledged the prejudices associated with color, creed, class or gender. In this newly revised and updated edition of The French Historical Revolution, renowned cultural historian Peter Burke provides a critical history of this movement most associated with the French journal Annales, from its foundation in 1929 to the present. From founding historians Lucien Febvre and Marc Bloch through the "new history" movement's best-known champions Jacques Le Goff and Fernand Braudel to current practitioners Roger

Chartier and Serge Gruzinski, Burke traces and analyzes the contributions of one of the most important historical movements of the last century.

Additional mysteries include "The Blue Carbuncle," "The Engineer's Thumb," "The Beryl Coronet," "The Copper Beeches," and four others.
