A major premise of the book is that the best way to grasp contract law is to understand it from a critical perspective as an organic, dynamic subject. When contract law is approached in this way it is much easier to grasp and learn than when it is presented simply as a static collection of principles and rules. Professor Eisenberg covers almost all areas of contract law, including the enforceability of promises, remedies for breach of contract, problems of assent, form contracts, the effect of mistake and changed circumstances, interpretation, and problems of performance. Although the emphasis of the book is on the principles and rules of contract law, it also covers important theories in contract law, such as the theory of efficient breach, the theory of overreliance, the normative theory of contracts, formalism, and theories of contract interpretation. **Contract Law A Case and Problem Based Approach** *Aspen Publishing* *Contract Law: A Case & Problem-Based Approach* is a unique casebook that provides an organizational structure introducing students to each major area of contract law before exploring these areas in greater depth later in the casebook. Specifically, the casebook is broken into three major parts, each of which is designed not only to orient the students to the major subject areas of contract law but also meant to help them appreciate the connections and relationships between and among these various subject areas. Part I, the "30,000-foot view," familiarizes students with contract law, discusses the sorts of problems with which contract law is concerned, and introduces them to some of the basic rules and theories governing contract law. Part II, the "10,000-foot view," exposes students to each major substantive area of contract law in more depth by discussing one classic case in each area, along with additional historical, theoretical, and contextual materials to supplement the black-letter doctrine. After finishing Parts I and II, the student will have a basic understanding of each major area of contract law, along with a good understanding of how these parts fit together. Part III is therefore designed to explore each of the major subject areas in greater depth, and is organized along the lines of a traditional contracts casebook, including a healthy mix of classic and modern cases, short problems, and exercises. New to the Second Edition: Additional materials and cases added to explore the contract doctrines of impossibility and impracticability in light of past and current epidemics (in the case of polio) and pandemics (in the case of COVID-19). Additional case added to explore the relationship between Contract Law, Civil Rights, and Constitutional Law. Reorganization of some materials in Chapter 8 (defenses). More focused notes and appendices Professors and student will benefit from: Organization exposes students to main concepts, and gives professors a number of choices about how to teach their course. Helpful doctrinal introductions to each new major substantive section. Historical, theoretical, and comparative materials are presented to help students understand and think critically about the black-letter rules. "Thinking tools" feature that helps the student think critically about the law, along with theoretical, historical, doctrinal, contextual, and practice-oriented notes enrich the students' black-letter experience. Enjoyable, contextual materials that are included after a number of classic cases help to bring to light fascinating background information. **Problems in Contract Law Cases and Materials** *Aspen Publishing* In *Problems in Contract Law: Cases and Materials*, Ninth Edition, by Charles L. Focusing on contemporary debates in contract theory, Contract Theory aims to help readers better understand the nature and justification of the general idea of contractual obligation, as well as the nature and justification of the particular rules that make up the law of contract. The book is in three parts. Part I introduces the idea of 'contract theory', and presents a framework for identifying, classifying, and evaluating contract theories. Part II describes and evaluates the most important general theories of contract; examples include promissory theories, reliance-based theories, and economic theories. In Part III, the theoretical issues raised by the various specific doctrines that make up the law of contract (e.g., offer and acceptance, consideration, mistake, remedies, etc.) are examined in separate chapters. The legal focus of the book is the common law of the United Kingdom, but the theoretical literature discussed is international in origin; the arguments discussed are thus relevant to understanding the law of other common law jurisdictions and, in many instances, to understanding the law of civil law jurisdictions as well. **Contract Law Concentrate Law Revision and Study Guide** Contract Law Concentrate is written and designed to help you succeed. It is intended to supplement your course materials, lectures and textbooks; it is a guide to revision rather than a substitute for the amount of reading that you need to do in order to succeed. Contract law is a vast subject as evidenced by the volume of material contained in standard works on the subject. It follows that a revision work cannot cover all the depth and detail that the student needs to know, and it does not set out to do so. The aim is to provide a concise overall picture of the key areas for revision. **Vulnerable Adults and the Law** *Oxford University Press* We are used to thinking that most people have the capacity to make their own decisions; that they should be free to decide how to live their lives; and that it is a good thing to be self-sufficient. However, in an examination of the legal position of vulnerable adults, understood as those who have capacity under the Mental Capacity Act 2005 but are deemed impaired through vulnerability in their exercise of decision making powers, Jonathan Herring challenges that assumption. Drawing on feminist and disability perspectives he argues that we are all in fact, 'vulnerable' and we need to replace the competent, able-bodied, independent person as the norm which the law is based on and instead fashion which recognises our interdependence and mutuality. At the heart of the law is a distinction between those who have capacity and those who do not. Those who have capacity are given the full rights of the law; they are entitled to enter contracts, dispose of their property, are able to marry. Those who are deemed to lack capacity are unable to make these decisions. Their decisions are made on their behalf based on an assessment of what is in their best interests. This approach is underpinned by the principle of autonomy, and is problematic for those who are deemed 'vulnerable'. The Court of Protection and the Court of Appeal have developed a jurisdiction to deal with cases involving vulnerable adults which has been used in a wide range of cases from those involving people with early stage dementia to cases of forced marriage. This development of law has proved controversial and the courts have struggled to draw its limits and explain the justification for it. Jonathan Herring welcomes the courts willingness to protect vulnerable adults through the inherent jurisdiction, but argues that we need to go much further. It is not just particular groups such as 'the elderly' or 'the disabled' who are vulnerable, but rather vulnerability is part of the human condition. This means that caring relationships are of central significance to our society and should be at the heart of the legal system. **A Casebook on the Roman Law of Contracts** *Oxford University Press* "This casebook explores the writings of Roman lawyers on the law of contracts, a rich and hugely influential area of Roman private law. The 235 "Cases" are actual texts deriving, for the most part, from the Digest of Justinian (535 CE), but written hundreds of years earlier during the Classical era of Roman law. These Cases give a fairly complete view of the concepts and methods used to create rules and judge contract cases in Roman courts. The casebook concentrates especially on two central Roman contracts, stipulation and sale; but all other contracts are discussed, as well as Roman legal thinking on unjustified enrichment"-- **Course Notes: Constitutional and Administrative Law** *Routledge Course Notes* is designed to help you succeed in your law examinations and assessments. After several introductory chapters on international business, legal issues, and contract law, the material walks the reader through a series of agreements between two fictional companies--one an American company, the other a business located in a European civil law country. The transactions begin with a sale of goods and then progress to international distribution arrangements, a joint venture, a stock acquisition, and a secured commercial loan. Each chapter opens with a description of the new arrangement between the two parties, followed by a form of contract for their business deal, a point-by-point critique of the contract, and an examination of relevant business and legal issues. While the typical textbook in this field emphasizes theoretical analysis, International Business Contracting takes a highly innovative approach by showing how a commercial relationship is put into writing. In an ideal situation a business contract will reflect the intentions of the parties, allowing them to carry out their activities while protecting them against business and legal risks. If poorly drafted, however, an agreement may create confusion and unnecessary problems. The book explores what constitutes good drafting, often by showing imprecise or ambiguous clauses. Standard contract provisions, referred to as "boilerplate," are examined in detail. In addition to analysis, the book offers negotiation and drafting exercises, so the student can gain "hands-on" experience in how international business executives and lawyers carry out their work. The textbook is designed to permit professors in different departments or universities--even in different countries--to offer parallel courses, with teams of students negotiating with counterpart teams via videoconference. **Law Notes Model Rules of Professional Conduct** *American Bar Association* The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Excerpt: ...of the note in the hands of an indorsee though he had notice of such agreement. A great part of the improvement of the country and of business generally is carried on with money raised by the discount of notes given upon executory contracts, and if the maker could be allowed to defend against such notes, in case of a breach of contract on the ground that the indorsee, though in other respects bona fide, had knowledge of the transaction out of which the note grew, all confidence in such notes as negotiable paper would be destroyed, and such business would be paralyzed. By making and delivering a negotiable note the maker is held to intend that it may be put in circulation, and that no defenses against it exist. In purchasing such note no inquiry as to the consideration is required. If a failure of consideration occur, the maker must look to the payee for indemnity. On this subject Parsons, in his work on Bills and Notes (volume 1, p. 261), says: "Knowledge on the part of the holder, at the time he took the note, that it was not to be paid on a specified contingency, is not sufficient to defeat his right to recover, although the contingency had then happened, if he was ignorant of this fact. Paper, 42, and cases cited. If the breach had occurred to the knowledge of the indorsee when he purchased he would not, of course, be protected. Designed to enhance the accessibility of the common law the Restatement comprises a number of clear succinct rules, fully explained by a supporting commentary, which set out the general law of contract in England and Wales. Written by one of the leading authorities in this area, in collaboration with an advisory group of senior judges, academics, and legal practitioners, the Restatement offers a novel and powerfully persuasive statement of the law in this central area of English law. All lawyers dealing with the English law of contract, whether as practitioners, judges, academics, or law students, cannot but benefit from this Restatement. The English law of contract is one of the most respected systems of contract law in the world and by the device of a 'choice of law' clause is often chosen by foreign commercial parties as the applicable law to govern their contract. One of the aims of the Restatement is for the reader, including those from civil law jurisdictions, to see quickly and easily how the different elements of the English law of contract fit together.
