THE ROLE OF THE STATE AND ACCOUNTING TRANSPARENCY

IFRS IMPLEMENTATION IN DEVELOPING COUNTRIES

Routledge Dr Mohammad Nurunnabi examines the factors that affect the implementation of International Financial Reporting Standards (IFRS) in developing countries and answers these specific research questions: - What is the relative impact of accounting regulatory frameworks and politico-institutional factors on the implementation of IFRS in developing countries? - How do cultural factors affect said implementation? - How does a study of implementing IFRS help to build an understanding of a theory of the role of the state in accounting change in developing countries? This follows a mixed methodology approach, in which interviews are conducted, IFRS-related enforcement documents and annual reports are evaluated. More than 138 countries have adopted IFRS, yet the International Accounting Standards Board (IASB) does not provide an implementation index. Financial reporting varies by country, even within the area of the world that has apparently adopted IFRS and Nurunnabi offers an important viewpoint that considers the issues of IFRS implementation from various perspectives. This is an invaluable resource for Undergraduate, Masters and PhD students, policy makers (at local, regional and international level) namely the IASB, World Bank, IMF, practitioners and users, giving them the

necessary insight into the financial reporting environment and the state's attitude towards accounting transparency. Most importantly, this book contributes to military and democratic political regimes and the Max Weberian view of the theory of the role of the state's attitude towards accounting transparency.

REPORT ON THE OBSERVANCE OF STANDARDS AND CODES

International Monetary Fund This Report on Observance of Standards and Codes (ROSC) for Italy summarizes the findings and recommendations of the fiscal assessment of Italy's economic policies. It highlights that while raising the bar for banking supervision, the Core Principles must be capable of application to a wide range of jurisdictions. The new methodology reinforces the concept of proportionality, both in terms of the expectations on supervisors and in terms of the standards that supervisors impose on banks. It recommends that a group-focused supervisory approach for the nationally significant insurers and sophisticated offsite monitoring together with ad hoc inspections for smaller entities is required.

ACCOUNTING FOR GROWTH IN LATIN AMERICA AND THE CARIBBEAN

IMPROVING CORPORATE FINANCIAL REPORTING TO SUPPORT REGIONAL ECONOMIC DEVELOPMENT

World Bank Publications *The importance of moving toward high-quality, global standards of accounting and auditing has never been clearer. In the midst of the global financial and economic crisis, the leaders of the Group of 20 met and issued their Declaration on Strengthening the Financial System , placing significant emphasis on sound accounting and auditing standards as a critical piece of the international financial architecture. Transparent and reliable corporate financial reporting underpins much of the Latin America and Caribbean development agenda, from private-sector-led growth to enhanced financial stability, facilitating access to finance for small and medium enterprises, and furthering economic integration. For nearly 10 years, the World Bank has prepared diagnostic Reports on the Observance of Standards and Codes (ROSCs) on Accounting and Auditing (A and A) at the country level. In Latin America and the Caribbean, ROSC A and A reports have been completed for 17 countries. This book takes a step back and seeks to distill lessons from a regional perspective. 'Accounting for Growth in Latin America and the Caribbean' is the first book to examine financial reporting and auditing in the region in a systematic way, drawing on the World Bank's years of experience and analysis in this area. The book is designed to inform the policy dialogue on accounting and auditing issues among government officials, the accounting profession, the private sector, academia, and civil society in LAC countries. It also seeks to disseminate the lessons learned to key players at the international and regional level, including the donor community, in order to generate momentum for reform of accounting and auditing throughout the region.*

THE ROUTLEDGE HANDBOOK OF ACCOUNTING IN ASIA

Routledge *As the centre of world economic development has shifted towards Asia over the last two decades, many Asian countries have witnessed rapid growth in economic and business operations. In light of these recent changes, accounting has played a significant role in assisting economic transition and advancement in Asian countries. As well as providing an overview of standards in the larger Asian economies of China, India and Japan,*

SMART LEARNING

TEACHING AND LEARNING WITH SMARTPHONES AND TABLETS

Sheffield Hallam University The use of smart technologies and social media by staff and students in and out of the classroom has implications for academic practice in post-compulsory education. Unlike previous eras of learning with technology, change is being led by the students and academics themselves and this establishes a challenge to institutions. This shift demands that we reassess our understanding of formal and informal engagement, the physical and virtual environments we use, and the people we involve. *Smart Learning: teaching and learning with smartphones and tablets in post compulsory education* observes how personal smart technology, social media, rich digital media as well as ideas about open learning work together to form a new immersive and interactive space for learning. The *Smart Learning* book is a product of the Media-Enhanced Learning Special Interest Group (MELSIG) which has considered the opportunities and challenges afforded by new media in developing a forward looking Digital Age, learner-centred view of academia since 2008. MELSIG is a self-driven association fascinated and excited by thinking differently, reflectively and critically. Working informally across UK post-compulsory education around special foci, the group runs sharing and developing practice events and webinars, as well as organising collective research and writing activities about academic innovation with digital and social media. *Smart Learning* is made up of thought pieces, research chapters and case studies. It is punctuated with scenario vignettes, making real this new thinking about learning with personal smart devices.

ACCOUNTING AND CORPORATE REPORTING

TODAY AND TOMORROW

BoD - Books on Demand We have spent a great deal of time on the continued development of accounting and auditing standards, which are used as a primary component of corporate reporting, to reach today's financial reporting framework. However, is it possible to say that, currently, financial statements provide full and prompt disclosure? Or will they still be useful as a primary element with their current structures in corporate reporting? Undoubtedly, we are deeply concerned about these issues in recent times. This volume contains chapters to discuss the today's and tomorrow's accounting and corporate reporting phenomena in a comprehensive and multidimensional way. Therefore, this book is organized into six sections: "Achieving Sustainability through Corporate Reporting", "International Standardization", "Financial Reporting Quality", "Accounting Profession and Behavioral Aspects", "Public Sector Accounting and Reporting", and "Managerial Accounting".

CORPORATE GOVERNANCE IN DEVELOPMENT

THE EXPERIENCES OF BRAZIL, CHILE, INDIA, AND SOUTH AFRICA

OECD Poor corporate governance can have significant implications for the lives of ordinary people, whether in the most highly developed countries or in developing world, as illustrated by recent failures at Enron and WorldCom. This publication, based on case studies in Brazil, Chile, India, and South Africa, illustrates the importance of good corporate governance in developing countries, in helping to increase financial capital to firms and to achieving sustained productivity growth. However, its value cannot be considered in isolation, since financial sector measures are required to strengthen the banking sector and financial institutions as a whole, as well as focusing on competition policy and reforms of sector-specific regulatory practices.

BEYOND CORPORATE SOCIAL RESPONSIBILITY

OIL MULTINATIONALS AND SOCIAL CHALLENGES

Corporate Social Responsibility (CSR) has emerged as an important approach for addressing the social and environmental impact of company activities. Yet companies are increasingly expected to go beyond this. They are now often expected to assist in addressing many of the world's most pressing problems, including climate change, poverty and HIV/AIDS. With increasing expectations placed on

business, this book asks if CSR is capable of delivering on these larger expectations. It does so by investigating an industry that has been at the centre of the CSR development - the oil and gas sector. Looking at companies from developed countries such as Exxon and Shell, as well as companies from emerging economies such as Brazil's Petrobras and China's CNOOC, the book investigates the potential of CSR for addressing three important challenges in the business-society relationship: the environment, development and governance.
