CONTEMPORARY DEVELOPMENTS AND PERSPECTIVES IN INTERNATIONAL HEALTH SECURITY

VOLUME 1

BoD - Books on Demand International health security (IHS) is a broad and highly heterogeneous area. Within this general context, IHS encompasses subdomains that potentially influence (and more specifically endanger) the well-being and wellness of humans. The general umbrella of IHS includes, but is not limited to, natural disasters, emerging infectious diseases (EID) and pandemics, rapid urbanization, social determinants of health, population growth, systemic racism and discrimination, environmental matters, civilian violence and warfare, various forms of terrorism, misuse of antibiotics, and the misuse of social media. The need for this expanded definition of health security stems from the realization that topics such as EID; food, water, and pharmaceutical supply chain safety; medical and health information cybersecurity; and bioterrorism, although important within the overall realm of health security, are not only able to actively modulate the wellness and health of human populations, but also tend to do so in a synergistic fashion. This inaugural tome of a multi-volume collection, Contemporary Developments and Perspectives in International Health Security, introduces many of the topics directly relevant to modern IHS theory and practice. This first volume provides a solid foundation for future installments of this important and relevant book series.

LIFE FOR THE ACADEMIC IN THE NEOLIBERAL UNIVERSITY

Routledge Life for the Academic in the Neoliberal University investigates the impact of neoliberalism on academics in today's universities. Considering the experiences of early career researchers as well as more experienced academics, it outlines the changing nature of working life in the university precipitated by the reality of de-professionalisation, worsening conditions of employment, and general precarious existence. The book traces the dramatic shift in the role and function of universities and academics over the last forty years. It considers how capitalist neoliberalism drives universities to operate like businesses in a cut-throat financialised education market place. Uniquely the book then provides a possible alternative in the form of the National Education Service (NES) and what this alternative system could look like. Thought-provoking and relevant, this book will be of use to postgraduate students as well as new, emerging, and established academics interested in the current state of higher education, academic life, and possibilities for the future.

MOTHERHOOD, RESPECTABILITY AND BABY-FARMING IN VICTORIAN AND EDWARDIAN LONDON

Taylor & Francis Motherhood, Respectability and Baby-Farming in Victorian and Edwardian London explores a largely obscured marketplace of motherhood that provided ways for women to manage the

stigma of illegitimacy and their respectable identities within Victorian and Edwardian society. It focuses on the extent of women's 'dirty work', when maternal problem management was fundamental to the general maintenance of respectability and, by extension, to Empire and Civilisation. Despite its intrigue, history has struggled to understand and represent an uncomfortable but significant artefact of Western modernising society: 'baby-farming'. During a period when ideologies of respectability and civilisation arguably mattered most, the 'right' kind of parenthood – especially motherhood – became paramount. As the 'wrong' offspring could jeopardise a woman's chances of being respectable, a wholesale, informal, and somewhat clandestine marketplace emerged that catered to various maternal difficulties. Within this marketplace, a pregnancy or newborn child who may have compromised a woman's respectability could be 'disposed' of through different means, for a fee. From the Victorian period to the present, the commercialised maternal practices associated with baby-farming have become firmly established within collective consciousness as being synonymous with child murder, female pathology, and 'infanticide for hire'. This book provides a revised, far more complex, and nuanced narrative history which reveals all that was associated with baby-farming – including all possible outcomes – to be entirely natural, rational, and even necessary products of their time; an understandable outcome of the period's 'civilising offensive'. Motherhood, Respectability and Baby-Farming in Victorian and Edwardian London will be of great interest to students and scholars of criminology, sociology, history, and gender studies.

ONTOLOGICAL INSECURITY IN THE EUROPEAN UNION

Routledge The European Union (EU) faces many crises and risks to its security and existence. While few of them threaten the lives of EU citizens, they all create a sense of anxiety and insecurity about the future for many ordinary Europeans. This comprehensive volume explores the concept of 'ontological security' which was introduced into international relations over a decade ago to better understand the 'security of being' found in feelings of fear, anxiety, crisis, and threat to wellbeing. The authors make use of this concept to explore how narratives of European integration have been part of public discourses in the post-war period and how reconciliation dynamics, national biographical narratives and memory politics have been enacted to create ontological security. Within this context, they also discuss the anxiety of the 'remainers' in the Brexit referendum and the consequences of its failure to address the ontological anxieties and insecurities of remain voters. The book also explores: how European security firms market ontological security and provide an ontological security-inspired reading of the EU's relations with post-communist states; the EU and NATO's engagement with hybrid threats; and the EU as an anxious community. This book was originally published as a special issue of the journal European Security.

DONALD TRUMP AND ME

MY DIARIES RECORDING THE FOUR WILD YEARS OF AN AMERICAN PRESIDENT

eBook Partnership So, you think you know Donald Trump? The outrageous showman, vainglorious TV media host and first President to be appointed without any political or military experience. Yes, that Donald Trump. Jim G. Sitch's diaries, compiled over four long years of the Donald Trump presidency, are hypnotic and scary throughout and a timely reminder of 'what has been' and what could well be again. President Trump was a self-taught ruler who, during his time in power, demonstrated his leadership capabilities by trying to tarnish the reputation of a dying American war hero, throwing paper towels at hurricane survivors and provoking Denmark to make Greenland a National Security Priority due to the President trying to buy it. Once you've read these diaries, which detail just what it was like to live under Donald Trump's rule, you'll seriously question whether there can ever again be another President like Donald Trump.

THEN THIS HAPPENED...

A DIARY ABOUT BREAST CANCER. MAY 2017 - APRIL 2018

Independently Published The cover of the book is right after we left the doctors office. We were just told my wife had to get a lumpectomy. We got in the car and she shouted. She doesn't even remember doing it. But I remember it. This is a daily cartoon journal. I wanted to get back into creating comics and animation. However, the day I started, we found out my wife had breast cancer. I could have just given up. But I needed to do something to help me deal with the news. So I drew. It's nothing special, the first one was just a drawing I did on my phone. But it felt so therapeutic to draw what I felt that I kept drawing something about each day to help me deal with it. It first it was on whatever I had around me to draw it on, my phone, a napkin, a post-it note. But over time as we dealt with it things became more clear and so did my comic journal. My wife is now in recovery and cancer free. But drawing about what we went through each day I think really helped us get through it. It started a dialog that I don't think would have been there otherwise. The comics aren't all about going through cancer. We still had our day to day lives and sometimes it was just about that, remembering something about each day. It's really easy just to say "Nothing happened today." So I wanted to make sure I found something to look back on. After a near death experience like that, we knew that we wanted to do something different with our lives... which will happen. So we started taking chances. We wanted to meet people in the artist community in our city. I was posting these comics every day on a website I created called American Bandito. So I started a podcast on the website. I posted an ad on Facebook that basically asked artists within a 10-mile radius of where I lived if they wanted to be on it. I started meeting artists through that ad. People I never knew before. And things started happening from there. One of the people that I talked to for instance, also did pop-up events. And she told me I should try it. So I did. I printed my comics as little books I made myself. It was almost a year later we were selling things at an art event and that became this collection of comics from my journal over that period of a year.

MARINE EXTREMES

OCEAN SAFETY, MARINE HEALTH AND THE BLUE ECONOMY

Routledge Marine extremes, as they are conceived of in this volume, encompass environments, activities, events and impacts. Extreme environments found in and around our oceans, including the deep sea and seabed as well as the frozen polar regions, are being seriously affected by both extreme behaviours (dumping and discharge of waste, illegal fishing and piracy) and extreme events (storms, tsunamis, extreme waves and marine heatwaves). The aim of this book is to highlight the multi-disciplinary knowledge and inputs needed to address marine extremes and thereafter to explore opportunities and current challenges. Safe and healthy oceans are important for economic, recreational and cultural activities, in addition to the maintenance of ecosystem services upon which we rely. This volume gathers a unique mix of researchers working on scientific aspects of biological ecosystems and physical processes together with social scientists exploring law and governance options, community preferences, cultural values, economic aspects and criminological drivers and approaches. The multi-disciplinary feature of this book breaks down barriers that arise between disparate fields of research so that integrated solutions to ocean challenges can be found. Overall, this book argues that if we are to achieve sustainable utilisation of our oceans and blue economy goals we must better understand, and respond to, the extreme environments, activities, events and impacts. The book is a valuable addition to the literature and will be of interest to researchers in marine science, ocean governance and natural resource economics, as well as to professionals and government officials concerned with marine policy and planning.
