**Sailboat Cruising Can Be A Breeze An Adventurous Lifestyle We Started at 50** [AuthorHouse](#) Many of us have sailed or rowed small boats - dinghies, canoes, rowboats, Sailfishes, Lasers, Penguins, and hundreds more. Less have participated in sailboat races, and probably even less have done overnight cruises in various size sailboats. Those of us who have cruised overnight (as opposed to "daysailing") have found a remarkable world of new experiences, including - views of sunrise & sunset never seen before - weather of all sorts experienced up close & personal - new and different friends - new and different approaches to small towns located on the waterfront - peace & quiet under sail or at anchor - ecological travel (10-15 Gallons of diesel per summer for docking & getting home when becalmed or bad weather coming) - luxury camping on our boat that does duty as our summer home, motorhome, and occasional family fun racer - the learning of sailing itself, a forgiving sport when modest common sense is applied. We wish others to share this abundant and affordable lifestyle. As the main photographer, I hope others will also have the opportunity to share the visual feast that cruising presents. The beauty will be evident, and you only have to point & shoot.

**The Riddle of the Sands** [Courier Corporation](#) Written in 1903 by a Boer War veteran, this gripping tale incorporates a wealth of technical sailing detail in its story of a sunny holiday that gradually darkens into a suspenseful adventure. **Exploring the Legacy of the 1948 Arnhem Land Expedition** [ANU E Press](#) "In 1948 a collection of scientists, anthropologists

and photographers journeyed to northern Australia for a seven-month tour of research and discovery - now regarded as 'the last of the big expeditions'. The American-Australian Scientific Expedition to Arnhem Land was front-page news at the time, but 60 years later it is virtually unknown. This lapse into obscurity was due partly to the fraught politics of Australian anthropology and animus towards its leader, the Adelaide-based writer-photographer Charles Mountford. Promoted as a 'friendly mission that would foster good relations between Australia and its most powerful wartime ally, the Expedition was sponsored by National Geographic, the Smithsonian Institution and the Australian Government. An unlikely cocktail of science, diplomacy and popular geography, the Arnhem Land Expedition put the Aboriginal cultures of the vast Arnhem Land reserve on an international stage." -- Publisher's website.

**Big Miracle** Inspired by the Incredible True Story that United the World [St. Martin's Griffin](#) Now a major motion picture starring Drew Barrymore, Ted Danson, Kristen Bell, Tim Blake Nelson, John Krasinski, and Vinessa Shaw—an account of the dramatic rescue of three gray whales trapped under the ice in Alaska in 1988. Set in Cold War-era 1988, **Big Miracle** tells the real story behind the remarkable, bizarre, and oftentimes uproarious event that mesmerized the world for weeks. On October 7, an Inuit hunter near Barrow, Alaska, found three California Gray whales imprisoned in the Arctic ice. In the past, as was nature's way, trapped whales always died. Not this time. Tom Rose, who was covering the event for a Japanese TV station, compellingly describes how oil company executives, environmental activists, Inupiat people, small business people, and the U.S. military boldly worked together to rescue the whales. He also tells the stories of some of the more than 150 international journalists who brought the story to the world's attention. The rescue was followed by millions of people around the world as Ronald Reagan and Mikhail Gorbachev joined the forces of their two nations to help free the whales.

Duluth-Superior Harbor The Palgrave International Handbook of Women and Outdoor Learning [Springer](#) This Handbook serves as a starting point for critical analysis and discourse about the status of women in outdoor learning environments (OLEs). Women choose to participate actively in outdoors careers, many believing the profession is a level playing field and that it offers alternatives to traditional sporting activities. They enter outdoor learning primarily on the strength of their enthusiasm for leading and teaching in natural environments and assume the field is inclusive, rewarding excellence regardless of age, gender, socioeconomic status, disability, or ethnicity. However, both research and collective experiences in OLEs suggest that many women feel invisible, relegated, marginalized, and undervalued. In response to this marginalization, this Handbook celebrates the richness of knowledge and practices of women practitioners

in OLEs. Women scholars and practitioners from numerous fields, such as experiential outdoor education, adventure education, adventure therapy, and gender studies, explore the implications of their research and practice using poignant examples within their own disciplines. These insights emerge from similar life experiences as women and outdoor leaders in the 1970s to the present. Social inequalities still abound in OLEs, and the Handbook ensures that the contributions of women are highlighted as well as the work that needs to be done to make these spaces inclusive. Global in perspective and capacious in content, this one-stop volume is an indispensable reference resource for a diverse range of academics, including students and researchers in the fields of education, psychology, sociology, gender studies, geography, and environment studies, as well as the many outdoors fields. **Creating Miracles Understanding the Experience of Divine Intervention** [H.J. Kramer](#) **Miracles Can Happen to You!** We normally use the term “miraculous” to describe dramatic, larger-than-life events, but not all miracles are out of this world. Ordinary miracles — surprising positive occurrences, such as surviving a horrible automobile accident or finding our soul mate — can happen in our everyday lives. A scientist as well as a student of metaphysics, Dr. Carolyn Miller has spent more than twenty-five years researching the elements that are common in real-life miracles. She has discovered that ordinary people often survive impending disaster by entering a serene state of consciousness and following inner guidance. In **Creating Miracles**, Dr. Miller shares specific suggestions and techniques, such as tapping into our intuition and disarming our ego, for cultivating a state of miracle-readiness in our lives. Through the true stories and amazing experiences she relates in this book, she demonstrates that miracles are real and that accessing them requires only that we follow some clear and simple steps. **The Complete Sailing Manual** [Penguin](#) The only sailing manual you will ever need, covering everything from sailing basics to making repairs and mastering navigation.
