Sarah

The Life of Sarah Bernhardt

Yale University Press Everything about Sarah Bernhardt is fascinating, from her obscure birth to her glorious career--redefining the very nature of her art--to her amazing (and highly public) romantic life, to her indomitable spirit. Well into her seventies, after the amputation of her leg, she was performing under bombardment for soldiers during World War I and toured America for the ninth time. Though the Bernhardt literature is vast, this is the first English-language biography to appear in decades, tracking the trajectory through which an illegitimate--and scandalous--daughter of a Jewish courtesan transformed herself into the most famous actress who ever lived, and into a national icon, a symbol of France.--From publisher description.

The Secret World

A History of Intelligence

Yale University Press The first-ever detailed, comprehensive history of intelligence, from Moses and Sun Tzu to the present day "A comprehensive exploration of spying in its myriad forms from the Bible to the present day."—Ben Macintyre, "By the Book," *New York Times Book Review* "For anyone with a taste for wide-ranging and shrewdly gossipy history—or, for that matter, for anyone with a taste for spy stories—Andrew's is one of the most entertaining books of the past few years."—Adam Gopnik, *New Yorker* The history of espionage is far older than any of today's intelligence agencies, yet the long history of intelligence operations has been largely forgotten. The codebreakers at Bletchley Park, the most successful World War II intelligence agency, were completely unaware that their predecessors in earlier moments of national crisis had broken the codes of Napoleon during the Napoleonic wars and those of Spain before the Spanish Armada. Those who do not understand past mistakes are likely to repeat them. Intelligence is a prime example. At the outbreak of World War I, the grasp of intelligence shown by U.S. President Woodrow Wilson and British Prime Minister Herbert Asquith was not in the same class as that of George Washington during the Revolutionary War and leading eighteenth-century British statesmen. In this book, the first global history of espionage ever written, distinguished historian Christopher Andrew recovers much of the lost intelligence history of the past three millennia—and shows us its relevance.

On the Move!

Simon and Schuster Rita, Dan, Max and Ted are on the move in Trucktown! Kids will have hands-on fun with a movable part on each spread! Swing Wrecker Rosie's wrecking ball, spin Monster Truck Max's wheel, dump gravel from Dump Truck Dan's bed, and move Tow Truck Ted's hook up and down as he saves a good friend!

¡Avancemos!.

Transports students beyond the classroom on an exciting journey through the diverse Spanish-speaking world. The perfect blend of culture, instruction and interaction enables and motivates students to succeed. Units are built around countries and cities. Relevant instruction is based on multi-tiered differentiation in presentation, practice, and assessments.

Parasitic Crustacea

State of Knowledge and Future Trends

Springer This book offers the first comprehensive review of parasitic Crustacea, which are among the most successful and diverse parasites. Starting with an introductory chapter, followed by an historic overview and topic-specific chapters, each presenting a different aspect of parasitic crustacean biology, it enables readers to gain a better understanding of how these parasites function and allows direct comparisons between the different parasitic crustacean groups. The authors also discuss, in depth, the adaptations and interactions that have made parasitic Crustacea as successful as they are today, covering topics ranging from the history of their discovery, their

biodiversity, phylogeny, evolution and life strategies to their role as vectors, or hosts of other organisms, and their significance in ecological processes. Consisting of ten chapters from leading international experts in the field, this volume offers a one-stop resource for all researchers, lecturers, students and practitioners.

Machines as the Measure of Men

Science, Technology, and Ideologies of Western Dominance

Cornell University Press This new edition of what has become a standard account of Western expansion and technological dominance includes a new preface by the author that discusses how subsequent developments in gender and race studies, as well as global technology and politics, enter into conversation with his original arguments.

Muslims and Citizens

Islam, Politics, and the French Revolution

Yale University Press A groundbreaking study of the role of Muslims in eighteenth-century France "This elegant, braided history of Muslims and French citizenship is urgently needed. It will be a 'must read' for students of the French Revolution and anyone interested in modern France."— Carla Hesse, University of California, Berkeley From the beginning, French revolutionaries imagined their transformation as a universal one that must include Muslims, Europe's most immediate neighbors. They believed in a world in which Muslims could and would be French citizens, but they disagreed violently about how to implement their visions of universalism and accommodate religious and social difference. Muslims, too, saw an opportunity, particularly as European powers turned against the new French Republic, leaving the Muslim polities of the Middle East and North Africa as France's only friends in the region. In *Muslims and Citizens*, Collier examines how Muslims came to participate in the political struggles of the revolution and how revolutionaries used Muslims in France and beyond as a test case for their ideals. In his final chapter, Collier reveals how the French Revolution's fascination with the Muslim world paved the way to Napoleon's disastrous invasion of Egypt in 1798.

The Secrets of Happy Families

Eight Keys to Building a Lifetime of Connection and Contentment

John Wiley and Sons Proven ways to create a more loving family Research proves that happy families are good for health, longevity, peace of mind, productivity, and success. In *The Secrets of Happy Families*, Scott Haltzman offers an original approach to building family contentment that works for families of all ethnicities and make-ups—two-parent, single-parent, blended, childless, or same-sex couple. He provides a "positive psychology" way of solving family problems through strategy and leadership, including knowing and accepting who you are, taking a leadership role in loving and united relationships, building a network of support in extended families and communities, and making quality time for fun, adventures, holidays, and rituals.

T'es Branché?

Level 2

The Cambridge Companion to Medieval Women's Writing

Cambridge University Press The *Cambridge Companion to Medieval Women's Writing* seeks to recover the lives and particular experiences of medieval women by concentrating on various kinds of texts: the texts they wrote themselves as well as texts that attempted to shape, limit, or expand their lives. The first section investigates the roles traditionally assigned to medieval women (as virgins, widows, and wives); it also considers female childhood and

relations between women. The second section explores social spaces, including textuality itself: for every surviving medieval manuscript bespeaks collaborative effort. It considers women as authors, as anchoresses 'dead to the world', and as preachers and teachers in the world staking claims to authority without entering a pulpit. The final section considers the lives and writings of remarkable women, including Marie de France, Heloise, Joan of Arc, Julian of Norwich, Margery Kempe, and female lyricists and romancers whose names are lost, but whose texts survive.

Perspectives on Teaching Language and Content

Yale University Press An overview of current issues and developments in foreign language education, designed for instructors of language, literature, and culture at any stage of their careers A contemporary guide to language teaching, this book presents the latest developments and issues in the field of applied linguistics. Written by scholars with expertise in theoretical linguistics, literary and cultural studies, and education, the book encourages readers to examine their beliefs about language teaching and to compare these perspectives with the tenets of current research-supported frameworks and approaches. It also leads instructors to make vital connections between theory and practice while linking language and content pedagogy so that they may develop innovative lesson plans, classroom activities, and course materials that align with the specific contexts in which they teach. Serving as a textbook for teaching methods courses, as well as a reference for instructors with varying levels of experience and diverse specializations, the book is applicable to all levels of instruction and provides guidelines and models that prepare instructors to teach in a rapidly evolving field.

Open Veins of Latin America

Five Centuries of the Pillage of a Continent

NYU Press [In this book, the author's] analysis of the effects and causes of capitalist underdevelopment in Latin America present [an] account of ... Latin American history. [The author] shows how foreign companies reaped huge profits through their operations in Latin America. He explains the politics of the Latin American bourgeoisies and their subservience to foreign powers, and how they interacted to create increasingly unequal capitalist societies in Latin America.-Back cover.

Dressing Dangerously

Dysfunctional Fashion in Film

A thought-provoking examination of the challenging and sometimes sinister roles that fashion has played in the history of cinema

Paul Mellon's Legacy

A Passion for British Art : Masterpieces from the Yale Center for British Art

Yale University Press Paul Mellon (1907--1999) was an unparalleled collector of British art. His collection, now at Yale in the museum and study center he founded to house it, rivals those in Britain's national museums and is unquestionably the most comprehensive representation of British art held outside of the United Kingdom. This book and the exhibition that it accompanies celebrate the centenary of his birth. Five introductory essays examine Mellon's extraordinary collecting activity, as well as his role in creating both the Yale Center for British Art and the Paul Mellon Centre for Studies in British Art in London as gifts to his alma mater (Yale 1929). A lavishly illustrated catalogue section showcases 148 of the most exquisite and important paintings, watercolors, drawings, prints, sculpture, rare books, and manuscript material in the Yale Center's collection, including major works by Thomas Gainsborough, Joshua Reynolds, George Stubbs, John Constable, and J. M. W. Turner.

Project: Happily Ever After

Saving Your Marriage When the Fairytale Falters

Running Press What do you do when your marriage is so unhappy that you begin to fantasize about your husband's funeral? That's how bad it got for Alisa Bowman. . . So she launched a last-ditch effort to save her marriage. **Project: Happily Ever After** is her fearlessly honest and humorous account of how she went from being a "divorce daydreamer" to renewing her wedding vows—and all of the steps in between. From bikini waxes to erotica, romance instruction manuals to second honeymoons, the silent treatment to power struggles, she goes where many marriage-improvement gurus have feared to tread. Equal parts funny, poignant, and most importantly, useful, Bowman's story will give other miserably-married folks courage and hope. And in addition to telling her own story, she packs straightforward prescriptive guidance, including a "10-Step Marital Improvement Guide." Readers will laugh. They'll cry. And they can start on the road toward their own happy ending!

The Search for Immortality

Tomb Treasures of Han China

During the last two centuries BC, the Western Han dynasty of China forged the first stable empire covering all of China and presided over a golden age that shaped much of subsequent Chinese art and culture. From family values to the structure of the civil service, Han thinking and philosophy continue to pervade Chinese society up to the present day - indeed, the majority of Chinese people consider themselves 'Han Chinese'. In the search for immortality, the Han imperial family left an artistic legacy of spectacular beauty and power. The finest of these treasures to have survived - including exquisite jades, silver and goldwork, bronzes and ceramics - have been found in the tombs of the Han imperial family and of a revival 'emperor' of Nanyue.

Arms and Influence

Yale University Press "This is a brilliant and hardheaded book. It will frighten those who prefer not to dwell on the unthinkable and infuriate those who have taken refuge in stereotypes and moral attitudinizing."—Gordon A. Craig, **New York Times Book Review** Originally published more than fifty years ago, this landmark book explores the ways in which military capabilities—real or imagined—are used, skillfully or clumsily, as bargaining power. Anne-Marie Slaughter's new introduction to the work shows how Schelling's framework—conceived of in a time of superpowers and mutually assured destruction—still applies to our multipolar world, where wars are fought as much online as on the ground.

Lavoisier—the Crucial Year

The Background and Origin of His First Experiments on Combustion in 1772

Cornell University Press The author explores the origins of the eighteenth-century chemical revolution as it centers on Antoine-Laurent Lavoisier's earliest work on combustion. He shows that the main lines of Lavoisier's theory—including his theory of a heat-fluid, caloric—were elaborated well before his discovery of the role played by oxygen. Contrary to the opinion prevailing at that time, Lavoisier suspected, and demonstrated by experiment, that common air, or some portion of it, combines with substances when they are burned. Professor Guerlac examines critically the theories of other historians of science concerning these first experiments, and tries to unravel the influences which French, German, and British chemists may have had on Lavoisier. He has made use of newly discovered material on this phase of Lavoisier's career, and includes an appendix in which the essential documents are printed together for the first time.

On Color

Yale University Press Our lives are saturated by color. We live in a world of vivid colors, and color marks our psychological and social existence. But for all color's inescapability, we don't know much about it. Now authors David Scott Kastan and Stephen Farthing offer a fresh and imaginative exploration of one of the most intriguing and least understood aspects of everyday experience. Kastan and Farthing, a scholar and a painter, respectively, investigate color from numerous perspectives: literary, historical, cultural, anthropological, philosophical, art historical, political, and scientific. In ten lively and wide-ranging chapters, each devoted to a different color, they examine the various ways colors have shaped and continue to shape our social and moral imaginations. Each individual color becomes the focal point for a consideration of one of the extraordinary ways in which color appears and matters in our lives.

Beautifully produced in full color, this book is a remarkably smart, entertaining, and fascinating guide to this elusive topic.

Ham House

400 Years of Collecting and Patronage

Paul Mellon Ctr for Studies Built in 1610 during the reign of James I and remodeled in 1637-39 by the future first Earl of Dysart, Ham House and its gardens have endured through centuries of English history while remaining representative of the styles and culture of the original inhabitants. It is one of the few places where Caroline décor—as developed by British architect Inigo Jones and familiar to Peter Paul Rubens and Anthony van Dyck—can still be appreciated. To mark the 400th anniversary of one of the most famous houses in Europe, eighteen internationally recognized scholars join National Trust curators in documenting the history of Ham House and its collections. The new discoveries, reattributions, and revelations of the contributors are accompanied by specially commissioned photography of the house and its contents. An appendix includes complete transcriptions of house inventories for the 17th, 18th, and 19th centuries, published here for the first time.

12 Rules for Life

An Antidote to Chaos

Ballantine Books "What does everyone in the modern world need to know? [The author's] answer to this most difficult of questions uniquely combines the hard-won truths of ancient tradition with the stunning revelations of cutting-edge scientific research. [The author discusses] discussing discipline, freedom, adventure and responsibility, distilling the world's wisdom into 12 practical and profound rules for life"--

Mountains and Plains

The Ecology of Wyoming Landscapes

Yale University Press Many changesome discouraging, others hopefulhave occurred in the Rocky Mountain region since the first edition of this widely acclaimed book was published. Wildlife habitat has become more fragmented, once-abundant sage grouse are now scarce, and forest fires occur more frequently. At the same time, wolves have been successfully reintroduced, and new approaches to conservation have been adopted. For this updated and expanded Second Edition, the authors provide a highly readable synthesis of research undertaken in the past two decades and address two important questions: How can ecosystems be used so that future generations benefit from them as we have? How can we anticipate and adapt to climate changes while conserving biological diversity?

Venice and Vitruvius

Reading Venice with Daniele Barbaro and Andrea Palladio

In about 35-25 B.C.E., the Roman architect Vitruvius produced his encyclopedic ten-book summary of the principles of Hellenistic architecture, *De architectura* (On Architecture). These ideas have stimulated architects ever since. In the mid-16th century, the architect Andrea Palladio (1508-1580) and the humanist Daniele Barbaro (1513-1570) looked to the city of Venice in order to understand and interpret Vitruvius's text - still in need of clarification - which would enable them to solve contemporary architectural problems. They found in the city's medieval and Renaissance streets, palaces, churches, and towers living principles that enabled them to interpret the ancient principles. By 1556, Barbaro had incorporated their observations into his "Commentaries" on Vitruvius, and two distinctly new editions for different audiences followed a decade later. Margaret D'Evelyn has gathered evidence to document how Palladio's understanding of Vitruvius influenced Barbaro. This engrossing volume also charts the invention of the illustrated architectural book and how major architect-authors, such as Leon Battista Alberti and Sebastiano Serlio, contributed to its development - demonstrating how Vitruvius shaped the way the city of Venice was viewed.

Impressionism

Reflections and Perceptions

Presents a revision of the late Columbia University art historian's lectures given at Indiana University in 1961

Respect for Acting

John Wiley & Sons Incorporated The performer and teacher guides the actor in overcoming the human and technical problems of his art

The French Revolution

A History

IB French B Course Book

For the IB diploma

OUP Oxford Developed with the IB to accurately match the 2011 syllabus, this comprehensive text tangibly builds fluency and strengthens assessment potential. Oral activities in every chapter build confident speaking skills, and a dedicated unit on literature stretches learners beyond functional language-learning, ensuring exceptional achievement.

Endless Forms

Charles Darwin, Natural Science and the Visual Arts

Yale University Press A gorgeously illustrated book that is the first to explore the impact of Darwin's ideas about man and nature on 19th-century visual arts Charles Darwin's revolutionary theories of evolution and natural selection have not only had a profound influence on the fields of biology and natural history, but also provided fertile territory for the creative imagination. This lavishly illustrated book accompanies an exhibition organized by the Fitzwilliam Museum, University of Cambridge, in association with the Yale Center for British Art, that will coincide with the global celebration of the bicentenary of Darwin's birth and the 150th anniversary of the publication of *On the Origin of Species by Means of Natural Selection* (1859). The essays in this exceptionally wide-ranging book examine both the profound impact that Darwin's ideas had on European and American artists and the ways in which his theories were influenced by the visual traditions he inherited. In works by artists as diverse as Church, Landseer, Liljefors, Heade, Redon, Cézanne, Lear, Tissot, Rossetti, and Monet, from imaginative projections of prehistory to troubled evocations of a life dominated by the struggle for existence, Darwin's sense of the interplay of all living things and his response to the beauties of the natural world proved inspirational.
