*Universe It was no time to fear animals when the possibility of the enemy counteroffensive was increasing. It didn't suit a soldier to lose nerve in the presence of a mere crocodile At the end of World War II, a garrison of the Twenty-eighth Japanese Army is deployed to Ramree Island, off the coast of Burma, to fight the Allies' severe counteroffensive. While on the island, Superior Private Minoru Kasuga questions a local villager about the terrible smell coming from the saltwater creek. To his horror, the old man tells him it is the stench of death from the breath of man-eating crocodiles that inhabit Myinkhon Creek. Fierce fighting drives the battalion to the island's east coast, and they must evacuate to Burma by crossing the creek. Just before they embark, Kasuga smells the same putrid odor that he'd questioned the villager about and warns his commanding officer of the underwater danger. His sergeant ignores him, thinking Kasuga is obsessed with wild stories from the villagers, and he tells the soldiers to cross the creek. Ordered to save the penned-in garrison, Second Lieutenant Yoshihisa Sumi arrives on Ramree Island. But what awaits him at Myinkhon Creek is a sight too horrible to contemplate*

*Penn State Press* In the early nineteenth century, the American Colonization Society was formed for the purpose of encouraging emigration of free blacks to Africa. While intent on ridding the United States of what the Society's members saw as a dangerous black population, the association also attracted some liberals who viewed its goals as an incentive toward emancipation. Attitudes among African Americans toward colonization were varied, some viewing it as an opportunity to start new lives in a free country and others seeing in it a deceptive scheme of the white man. But when the passage of the Fugitive Slave Act in 1850 put the freedom of every person of African descent in jeopardy, many began to consider emigration their only option. This collection of historic documents illuminates the debate on emigration through the narratives of four black men who in 1853 traveled to the new black nation of Liberia. Their accounts offer surprisingly different views and insights on the young country and provide both endorsements and condemnations of the colonization effort. *Liberian Dreams* contains four selections that have never before been published in a single volume: William Nesbit's attack on Liberia and its sponsors, Samuel Williams's spirited defense of the black republic in response to Nesbit, Daniel Peterson's pro-emigration tract commissioned by the ACS, and Augustus Washington's balanced critique of both sides of the issue. Each account offers a perspective not found in the others, and together they cover nearly the full range of debate among black Americans of that time. These narratives shed light not only on the experience of creating a new country but also on the conflict among African Americans over the colonization effort, and they offer a unique opportunity to witness African Americans encountering Africans and their cultures. The selection by Augustus Washington in particular reveals the insights of an educated community activist with a sure understanding of the issues at stake. Historian Wilson Moses, who has published widely on African American history and black nationalism, provides an introduction that expertly places the selections in context.

WILSON LITERARY SCIENCE WRITING AWARD LONGLISTED FOR THE ANDREW CARNEGIE MEDAL FOR EXCELLENCE A LIBRARY JOURNAL BEST SCIENCE BOOK OF THE YEAR** “[A] curiously edifying book.” —The New York Times Book Review “With the taut suspense of a spy novel, Voigt paints a vivid world of murder, black market deals, and habitat destruction surrounding a fish that's considered, ironically, to be a good-luck charm.” —Discover “[An] immensely satisfying story, full of surprises and suspense....Things get weird fast.” —The Wall Street Journal An intrepid journalist's quest to find a wild Asian arowana—the world's most expensive aquarium fish—takes her on a global tour in this “engaging tale of obsession and perseverance...and an enthralling look at the intersection of science, commercialism, and conservationism” (Publishers Weekly, starred review). A young man is murdered for his pet fish. An Asian tycoon buys a single specimen for \$150,000. Meanwhile, a pet detective chases smugglers through the streets of New York. With “the taut suspense of a spy novel” (Discover) *The Dragon Behind the Glass* tells the story of a fish like none other. Treasured as a status symbol believed to bring good luck, the Asian arowana, or “dragon fish,” is a dramatic example of a modern paradox: the mass-produced endangered species. While hundreds of thousands are bred in captivity, the wild fish as become a near-mythical creature. From the South Bronx to Borneo and beyond, journalist Emily Voigt follows the trail of the arowana to learn its fate in nature. “A fresh, lively look at an obsessive desire to own a piece of the wild” (Kirkus Reviews), *The Dragon Behind the Glass* traces our fascination with aquarium fish back to the era of exploration when naturalists stood on the cutting edge of modern science. In an age when freshwater fish now comprise one of the most rapidly vanishing groups of animals, Voigt unearths a surprising truth behind the arowana's rise to fame—one that calls into question how we protect the world's rarest species. “Not since Candace Millard published *The River of Doubt* has the world of the Amazon, Borneo, Myanmar, and other exotic locations been so colorfully portrayed as it is now in Emily Voigt's *The Dragon Behind the Glass*...a must-read” (Library Journal, starred review).

## THE END OF DEVELOPMENT

---

### A GLOBAL HISTORY OF POVERTY AND PROSPERITY

---

Zed Books Ltd. Why did some countries grow rich while others remained poor? Human history unfolded differently across the globe. The world is separated in to places of poverty and prosperity. Tracing the long arc of human history from hunter gatherer societies to the early twenty first century in an argument grounded in a deep understanding of geography, Andrew Brooks rejects popular explanations for the divergence of nations. This accessible and illuminating volume shows how the wealth of 'the West' and poverty of 'the rest' stem not from environmental factors or some unique European cultural, social or technological qualities, but from the expansion of colonialism and the rise of America. Brooks puts the case that international inequality was moulded by capitalist development over the last 500 years. After the Second World War, international aid projects failed to close the gap between 'developed' and 'developing' nations and millions remain impoverished. Rather than address the root causes of inequality, overseas development assistance exacerbate the problems of an uneven world by imposing crippling debts and destructive neoliberal policies on poor countries. But this flawed form of development is now coming to an end, as the emerging economies of Asia and Africa begin to assert themselves on the world stage. *The End of Development* provides a compelling account of how human history unfolded differently in varied regions of the world. Brooks argues that we must now seize the opportunity afforded by today's changing economic geography to transform attitudes towards inequality and to develop radical new approaches to addressing global poverty, as the alternative is to accept that impoverishment is somehow part of the natural order of things.

## **NARRATIVE OF THE CIRCUMNAVIGATION OF THE GLOBE BY THE AUSTRIAN FRIGATE NOVARA: VOLUME 1**

---

### **UNDERTAKEN BY ORDER OF THE IMPERIAL GOVERNMENT, IN THE YEARS 1857, 1858, AND 1859**

---

*Cambridge University Press* *Joined by seven eminent natural scientists, including Karl von Scherzer (1821-1903), the Austrian naval expedition of 1857-9 was remarkable for its globe-spanning scale. During the course of the voyage, the naturalists collected an abundance of samples which contributed to several scientific discoveries, including the isolation of cocaine in its pure form. Some of the investigations also revolutionised knowledge in such fields as geology, oceanography, hydrography and geomagnetism, and are still being studied by modern-day researchers. Prepared by Scherzer and*

first published in English in 1861-3, this is a compelling three-volume account of the mission, remaining relevant to scholars interested in naval exploration and the history of science. Opening with the guidance given by Alexander von Humboldt prior to the expedition, Volume 1 covers the leg between Europe and India. It includes notes on the social structure of the populations encountered, and on the local flora and fauna.
