This volume provides an account of the progress made by British Rail prior to privatisation. The English Catalogue of Books ... "Sesame Street" and the Reform of Children's Television [JHU Press](#) "[An] accessible, well-researched introduction to the people and principles behind the show's creation . . . Essential." —Choice (An Outstanding Academic Title of the Year) By the late 1960s more than a few critics of American culture groused about the condition of television programming and, in particular, the quality and content of television shows for children. In the eyes of the reform-minded, commercial television crassly exploited young viewers; its violence and tastelessness served no higher purpose than the bottom line. The Children's Television Workshop (CTW)—and its fresh approach to writing and producing programs for kids—emerged from this growing concern. Sesame Street—CTW's flagship hour-long show—aimed to demonstrate how television could help all preschoolers, including low-income urban children, prepare for first grade. In this engaging study Robert W. Morrow explores the origins and inner workings of CTW, how the workshop in New York scripted and designed Sesame Street, and how the show became both a model for network television and a thorn in its side. Through extensive archival research and a systematic study of sample programs from Sesame Street's first ten seasons, Morrow tells the story of Sesame Street's creation; the ideas, techniques, organization, and funding behind it; its place in public discourse; and its ultimate and unfortunate failure as an agent of commercial television reform. "An insightful look at American children's television." —Library Journal

Tourism and Hospitality Studies [Peter Lang D](#) This book discusses "tourism and hospitality" from different perspectives and disciplines. In addition, this book, considering the tourism and hotel management terminology, is expected to be a source book for the theoretical and practical scientific studies in the fields which is in close relationship such as gastronomy, recreation and marketing. A Collection of Technical Papers AIAA Man's Role in Space Conference, Cocoa Beach, Florida, March 27-28, 1972 The English Catalogue of Books [annual] Vols. for 1898-1968 include a directory of publishers. Global Economic Prospects, June 2021 [World Bank Publications](#) The world economy is experiencing a very strong but uneven recovery, with many emerging market and developing economies facing obstacles to vaccination. The global outlook remains uncertain, with major risks around the path of the pandemic and the possibility of financial stress amid large debt loads. Policy makers face a difficult balancing act as they seek to nurture the recovery while safeguarding price stability and fiscal sustainability. A comprehensive set of policies will be required to promote a strong recovery that mitigates inequality and enhances environmental sustainability, ultimately putting economies on a path of green, resilient, and inclusive development. Prominent among the necessary policies are efforts to lower trade costs so that trade can once again become a robust engine of growth. This year marks the 30th anniversary of the Global Economic Prospects. The Global Economic Prospects is a World Bank Group Flagship Report that examines global economic developments and prospects, with a special focus on emerging market and developing economies, on a semiannual basis (in January and June). Each edition includes analytical pieces on topical policy challenges faced by these economies. U.S. Government Research Reports Regional Industrial Development 1974 NASA Authorization, Hearings Before Greece's 'odious' Debt The Looting of the Hellenic Republic by the Euro, the Political Elite and the Investment Community [Anthem Press](#) Jason Manolopoulos lends a unique perspective, based on experience of the global financial system, emerging markets and crises, European politics and Greek society, to demonstrate how one of the EU's smaller countries played a catalytic role in a crisis that threatens the future of the euro, and possibly even of the European Union itself. He digs beneath the headline economic data to explore the historical legacy and psychological biases that have shaped an ongoing political drama, in a book that has profound implications for our understanding of economics, as well as the policy choices for Europe's elite. List of Recent Periodical Articles North coastal area of California and portions of Southern Oregon water, land, and related resources Market Power in EU Antitrust Law [Bloomsbury](#)

Publishing The notion of market power is central to antitrust law. Under EU law, antitrust rules refer to appreciable restrictions of competition (Article 101(1) Treaty on the Functioning of the European Union (TFEU), ex Article 81(1) EC Treaty), the elimination of competition for a substantial part of the market (Article 101 (3) TFEU, ex Article (81(3) EC), dominant positions (Article 10 (2) TFEU, ex Article 82 EC), and substantial impediment to effective competition, in particular by creating or reinforcing a dominant position (Article 2 of the EU Merger Regulation). At first sight, only the concept of dominant position relates to market power, but it is the aim of this book to demonstrate that the other concepts are directly linked to the notion of market power. This is done by reference to the case law of the EU Courts and the precedents of the European Commission. The author goes on to argue that for very good reasons (clarity and enforceability, among others) the rules should be interpreted in this way. Beginning with market definition, the book reviews the different rules and the different degrees of market power they incorporate. Thus it analyses the notion of 'appreciable restriction of competition' to find a moderate market power obtained by agreement among competitors to be the benchmark for the application of Article 101 TFEU, ex Article 81 EC. It moves on to the concept of dominance under Article 102 TFEU (ex Article 82 EC), which is equivalent to substantial (or significant) market power, and then focuses on the old and new tests for EU merger control. Finally, it addresses the idea of elimination of competition in respect of a substantial part of the market (Article 101 (3) TFEU, ex Article 81 (3) (b) EC), in which the last two types of market power (Article 102 TFEU, ex Article 82 EC and EU Merger Regulation) converge. To exemplify this, an in-depth study of the notion of collective dominance is conducted. The book concludes that a paradigm of market power exists under the EU antitrust rules that both fits with past practice and provides for a useful framework of analysis for the general application of the rules by administrative and even more importantly judicial authorities in the Member States, under conditions of legal certainty.

Chemical Engineering Design Principles, Practice and Economics of Plant and Process Design Elsevier Chemical Engineering Design, Second Edition, deals with the application of chemical engineering principles to the design of chemical processes and equipment. Revised throughout, this edition has been specifically developed for the U.S. market. It provides the latest US codes and standards, including API, ASME and ISA design codes and ANSI standards. It contains new discussions of conceptual plant design, flowsheet development, and revamp design; extended coverage of capital cost estimation, process costing, and economics; and new chapters on equipment selection, reactor design, and solids handling processes. Hearings, reports and prints of the House Committee on Science and Astronautics BEBR Faculty Working Paper We the People, Volume 3 The Civil Rights Revolution: Harvard University Press "The Civil Rights Revolution carries Bruce Ackerman's sweeping reinterpretation of constitutional history into the era beginning with Brown v. Board of Education. From Rosa Parks's courageous defiance, to Martin Luther King's resounding cadences in "I Have a Dream," to Lyndon Johnson's leadership of Congress, to the Supreme Court's decisions redefining the meaning of equality, the movement to end racial discrimination decisively changed our understanding of the Constitution. "The Civil Rights Act turns 50 this year, and a wave of fine books accompanies the semicentennial. Ackerman's is the most ambitious; it is the third volume in an ongoing series on American constitutional history called We the People. A professor of law and political science at Yale, Ackerman likens the act to a constitutional amendment in its significance to the country's legal development." —Michael O'Donnell, The Atlantic "Ackerman weaves political theory with historical detail, explaining how the civil rights movement evolved from revolution to mass movement and then to statutory law...This fascinating book takes a new look at a much-covered topic." —Becky Kennedy, Library Journal" MacArthur's Airman General George C. Kenney and the War in the Southwest Pacific Thomas Griffith offers a critical assessment of George C. Kenney's numerous contributions to MacArthur's war efforts. He depicts Kenney as a staunch proponent of airpower's ability to shape the outcome of

military engagement and a commander who shared MacArthur's strategic vision. Knowledge Economy, Information Technologies and Growth [Routledge](#) This volume focuses on the Information and Communication (ICT) revolution and its impact on economic growth. Even though the emergence of the knowledge economy is at the center of attention by media and is often a subject of economic policy debate, economic research on the issue is still relatively underdeveloped and many aspects of it are still awaiting proper theoretical and empirical scrutiny. One important question is whether, as many economists and opinion leaders maintain the knowledge economy and the new information technologies have fostered the birth of a 'new economy' which by inducing a strong productivity growth in most sectors, is behind the impressive growth of GDP experienced by the US economy. Empirical research has in fact been unable to provide a conclusive answer to this question. This book debates this issue and provides the opportunity to discuss the economic and social effects of the ICT revolution. It also focuses on the functioning and the micro-economic structure of the ICT sector, as well as on its impact on various industries, on the financial system and on the labor market. It analyses the role of the ICT revolution on regional development and it addresses important policy issues such as its consequences for antitrust legislation and government regulation. The Financial Crisis Inquiry Report The Final Report of the National Commission on the Causes of the Financial and Economic Crisis in the United States Including Dissenting Views [Cosimo, Inc.](#) The Financial Crisis Inquiry Report, published by the U.S. Government and the Financial Crisis Inquiry Commission in early 2011, is the official government report on the United States financial collapse and the review of major financial institutions that bankrupted and failed, or would have without help from the government. The commission and the report were implemented after Congress passed an act in 2009 to review and prevent fraudulent activity. The report details, among other things, the periods before, during, and after the crisis, what led up to it, and analyses of subprime mortgage lending, credit expansion and banking policies, the collapse of companies like Fannie Mae and Freddie Mac, and the federal bailouts of Lehman and AIG. It also discusses the aftermath of the fallout and our current state. This report should be of interest to anyone concerned about the financial situation in the U.S. and around the world. THE FINANCIAL CRISIS INQUIRY COMMISSION is an independent, bi-partisan, government-appointed panel of 10 people that was created to "examine the causes, domestic and global, of the current financial and economic crisis in the United States." It was established as part of the Fraud Enforcement and Recovery Act of 2009. The commission consisted of private citizens with expertise in economics and finance, banking, housing, market regulation, and consumer protection. They examined and reported on "the collapse of major financial institutions that failed or would have failed if not for exceptional assistance from the government." News Dissector DANNY SCHECHTER is a journalist, blogger and filmmaker. He has been reporting on economic crises since the 1980's when he was with ABC News. This revised and updated edition addresses how best to handle recent crises like the

earthquakes and tsunami in Japan, the economic downturn, or political instability in countries like Egypt, Tunisia, Bahrain, and Libya. It also covers every new compliance and security regulation, as well as evolving best practices, including: • C-TPAT guidelines • Incoterms • In-house compliance programs • Freight cost-reduction tips • Beefed-up TSA regulations • Improved technology options • President Obama's new export initiatives. It's an indispensable resource for today's complex and changing global marketplace. **COLD WAR LABORATORY** [Smithsonian Inst Scholarly Press](#) In 1946, before the start of the Cold War with the Soviet Union, the Army Air Forces established Project RAND — a groundbreaking 'think tank' designed to link leaders in the military and aircraft industry. Modern war was now total war, a contest between entire societies, and demanded the commitment of peacetime preparation. Martin J. Collins examines the critical years of this experiment through an evolving cast of key individuals and investigates in-depth the scientific and social birth of systems analysis. **An Error Profile : Employment as Measured by the Current Population Survey Economic Inequality and Poverty Facts, Methods, and Policies** [Oxford University Press](#) Issues of economic inequality and poverty have become increasingly central to public debate over the past fifty years. The literature on measuring economic inequality and poverty has vastly expanded, developing many new methods but also generating many controversies. **Economic Inequality and Poverty** provides a systematic treatment of the development of inequality and poverty, focusing on how income inequality and poverty measurements have evolved in recent decades and identifying approaches to resolving some of the methodological and factual conflicts. The book's primary aim is to analyse the relationships between individuals and households distributions of economic variables. These relationships are crucial in understanding many economic phenomena. Kakwani and Son employ household surveys to illustrate the application of their framework, demonstrating its importance in drawing evidence-based policy conclusions. **Measuring and Sustaining the New Economy Report of a Workshop** [National Academies Press](#) Sustaining the New Economy will require public policies that remain relevant to the rapid technological changes that characterize it. While data and its timely analysis are key to effective policy-making, we do not yet have adequate statistical images capturing changes in productivity and growth brought about by the information technology revolution. This report on a STEP workshop highlights the need for more information and the challenges faced in measuring the New Economy and sustaining its growth. **Liberty and Sexuality The Right to Privacy and the Making of Roe V. Wade, Updated** [Univ of California Press](#) The definitive account of the legal and political struggles that created the right to privacy and won constitutional protection for a woman's right to choose, "Liberty and Sexuality" details both the unheralded contributions of the young lawyers who filed America's first abortion rights cases and the inside-the-Supreme Court deliberations that produced "Roe v. Wade". **Contents of Recent Economics Journals**
