PHILOSOPHY AND HUMAN REVOLUTION

ESSAYS IN CELEBRATION OF DAISAKU IKEDA'S 90TH BIRTHDAY

Cambridge Scholars Publishing This book collects a series of philosophical papers dedicated to the figure and work of Daisaku Ikeda. The author's interest in studying Ikeda's work is not to carry out a specialised or disciplinary study of his Buddhist exegesis, or to offer a critical synthesis from the point of view of its basic doctrinal contents and references, nor to examine his creed and religious teaching. Beyond the fact that Ikeda's work has the double face of a construction founded on a Japanese philosophical-religious tradition with specific links to classical Chinese tradition, interfaced with the globe's most representative literary, scientific and speculative cultural products, it was developed according to an intercultural design strongly marked by western rationality and a spiritual-speculative-pragmatic approach to life and the world. Throughout this book, the author proposes an agnostic suspension in order to leave a place for philosophy and its argumentative constructions.

ART AND POLITICS UNDER MODERN DICTATORSHIPS

A COMPARISON OF CHILE AND ROMANIA

Springer This book analyzes the relationship between art and politics in two contrasting modern dictatorships. Through a detailed look at the Chilean and Romanian dictatorships, it compares the different ways in which political regimes convey their view of the world through artistic means. It examines how artists help \ convey a new understanding of politics and political action during repressive regimes that are inspired by either communism or anti-communism (neoliberalism, traditionalist, conservative). This book demonstrates how artistic renderings of life during dictatorships are similar in more than one respect, and how art can help better grasp the similarities of these regimes. It reveals how dictatorships use art to symbolically construct their power, which artists can consolidate by lending their support, or deconstruct through different forms of artistic resistance.

DEMOCRACY AND COMPLEXITY

A REALIST APPROACH

John Wiley & Sons This book is a highly original and provocative contribution to democratic theory. Zolo argues that the increasing complexity of modern societies represents a fundamental challenge to the basic assumptions of the Western democratic tradition and calls for a reformulation of some of the key questions of political theory. Zolo maintains that, as modern societies become more complex and more involved in the `information revolution', they are subjected to new and unprecedented forms of evolutionary stress - as manifested, for instance, in the growing autonomy and power of political parties, and in new kinds of political communication which create and sustain the fiction of consensus. These forms of stress have become so serious that they threaten to undermine some of the values traditionally associated with democracy, such as the rationality and autonomy of the individual, and the visibility and accountability of power.

CONSTITUTIONALISM AND TRANSITIONAL JUSTICE IN SOUTH AFRICA

Berghahn Books Over the last fifteen years, the South African postapartheid Transitional Amnesty Process - implemented by the Truth and Reconciliation Commission (TRC) - has been extensively analyzed by scholars and commentators from around the world and from almost every discipline of human sciences. Lawyers, historians, anthropologists and sociologists as well as political scientists have tried to understand, describe and comment on the 'shocking' South African political decision to give amnesty to all who fully disclosed their politically motivated crimes committed during the apartheid era. Investigating the postapartheid transition in South Africa from a multidisciplinary perspective involving constitutional law, criminal law, history and political science, this book explores the overlapping of the postapartheid constitution-making process and the Amnesty Process for political violence under apartheid and shows that both processes represent important innovations in terms of constitutional law and transitional justice systems. Both processes contain mechanisms that encourage the constitution of the unity of the political body while ensuring future solidity and stability. From this perspective, the book deals with the importance of several concepts such as truth about the past, publicly shared memory, unity

of the political body and public confession.

EVALUATION AND OPTIMIZATION OF ELECTORAL SYSTEMS

SIAM This monograph offers a systematic quantitative approach to the analysis, evaluation, and design of electoral systems. Today, electoral reform is of concern to newborn democracies as well as many old ones. The authors use mathematical models and automatic procedures, when possible, to solve some of the problems that arise in the comparison of existing systems as well as in the construction of new ones. One distinctive feature of the book is the emphasis on single- and multiple-criteria optimization methods. This powerful tool kit will help political researchers evaluate and choose an appropriate electoral system.

THE SIMPLE ART OF VOTING

THE COGNITIVE SHORTCUTS OF ITALIAN VOTERS

Oxford University Press In *The Simple Art of Voting*, Delia Baldassarri provides a new understanding of how voting works by focusing on how choices are made rather than on what their outcomes are. Drawing on recent advances in cognitive psychology, political cognition, and behavioral economics, Baldassarri distinguishes voters based on the cognitive shortcuts, or heuristics, they use to reduce the complexity of political choice. In doing so, she reveals which factors-parties, leaders, ideology, the media-are most important to different types of voters.

PRODUCER COOPERATIVES AS A NEW MODE OF PRODUCTION

Routledge The notion that there is no alternative to capitalism emerged after the fall of the Berlin Wall and made rapid headway due to increasing economic globalisation. More recently, this belief that there is no viable alternative has held firm despite the financial crisis, high unemployment levels and an ever-increasing gap between rich and poor. However, since the appearance of Benjamin Ward's seminal 1958 article, economic theorists have been developing a workable alternative: a system of self-managed firms. The core argument outlined in this book is that a well-organised system of producer cooperatives would give rise to a new mode of production and, ultimately, a genuinely socialist society. This argument is developed through three key steps. First, following on from Jaroslav Vanek's definition, it is argued that a 'Labour-Managed Firm', a firm which strictly segregates capital incomes from labour incomes, would implement a new production mode because it would reverse the pre-existing relation between capital and labour. Second, given that a system of these 'Labour-Managed Firm' cooperatives would reverse the capital-labour relationship, it is suggested that this would constitute a form of market socialism. Third, it is argued that compared to capitalism a system of producer cooperatives offers a wealth of advantages, including the potential for efficiency gains, the eradication of unemployment and the end of exploitation. Ultimately, this book concludes that self-management could take the place of central planning in Marxist visions for the future.

MULTIPLE POPULISMS

ITALY AS DEMOCRACY'S MIRROR

Routledge This book provides a comprehensive interpretation of the multiple manifestations of populism using Italy, the only country amongst consolidated constitutional democracies in which populist political forces have been in government on various occasions since the early 1990s, as the starting point and benchmark. Populism is a complex, multi-faceted political phenomenon which redefines many of the essential characteristics of democracy; participation, representation, and political conflict. This book considers contemporary versions of populism that pose a real challenge to representative and constitutional democracy. Contributors provide an integrative interpretation of populism and analyse its principal historical, social and politico-legal variables to provide a multi-dimensional reflection on the concept of populism, comprehensive analysis of the populist phenomenon and a theoretical and comparative perspective on the diverse political experiences of populism. Based on conceptual and interdisciplinary reflections from expert authors, this book will be of great interest to scholars and post-graduate students of cultural studies, European studies, political sociology, political science, comparative politics, political philosophy, and political theory with an interest in a comparative and interdisciplinary theory of populism and its manifestations.

A NEW MODEL OF SOCIALISM

DEMOCRATISING ECONOMIC PRODUCTION

Edward Elgar Publishing Economic democracy is essential for creating a truly democratic political sphere. This engaging book uses Marxist theory to hypothesise that capitalism is not a democratic system, and that a modern socialist system of producer cooperatives and democratically managed enterprises is urgently needed. *A New Model of Socialism* focuses on the current crisis of the political Left, a result of the collapse of the Soviet model of society and the decline of statism and kingship. Bruno Jossa expands on existing theories to explore Marx's notions on economic democracy in a modern setting. He advocates a move away from the centralised planning form of economic socialism towards a self-management system for firms that does not prioritise the interests of one class over another, in order to achieve greater economic democracy. It is argued that the establishment of such a system of democratic firms is the precondition for reducing intervention in the economy, thus enabling the State to perform its ultimate function of serving the public interest. This timely book is ideal for advanced scholars of Marxist, radical and heterodox economic theory, as well as academics with an interest in the rise of socialism in our modern world. Indeed, it will also be of value to all those seeking a viable and practical alternative to existing capitalist and socialist thinking.

ALTERNATIVES TO CAPITALISM: THE ECONOMICS OF PARTNERSHIP

PROCEEDINGS OF A CONFERENCE HELD IN HONOUR OF JAMES MEADE BY THE INTERNATIONAL ECONOMIC ASSOCIATION AT WINDSOR, ENGLAND

Springer]At a time of rapid change in Central and Eastern Europe, there is widespread interest in alternative forms of market economy. Is it possible to combine the best features of capitalism with the best features of socialism? The first part of the volume examines the idea of 'Agathotopia' put forward by Nobel-Prize winner James Meade; the second with worker participation and economic democracy, including the Yugoslav experience and the third with partnership at macro- and micro-levels.

COMPARATIVE CONSTITUTIONAL ENGINEERING

AN INQUIRY INTO STRUCTURES, INCENTIVES, AND OUTCOMES

NYU Press The second edition of this pathbreaking, highly innovative comparative study in state-building by a major political scientist is a fully updated examination of the problems of making democratic government work. He concludes with a detailed proposal for a new type of government: alternating presidentialism. This meets the need for strong parliamentary control and efficient government, with safeguards against both parliamentary obstructionism and government by decree, and so could help to avoid political paralysis in

Latin America, in the post-communist countries of Europe and in countries with dysfunctional parliamentary systems such as Italy and Israel.

THE CAMBRIDGE COMPANION TO LEGAL POSITIVISM

Cambridge University Press Legal positivism is one of the fundamental theories of jurisprudence studied in law and related fields around the world. This volume addresses how legal positivism is perceived and makes the case for why it is relevant for contemporary legal theory. The Cambridge Companion to Legal Positivism offers thirty-three chapters from leading scholars that provide a comprehensive commentary on the fundamental ideas of legal positivism, its history and major theorists, its connection to normativity and values, its current development and influence, as well as on the criticisms moved against it.

THE DIGITAL CITIZEN(SHIP)

POLITICS AND DEMOCRACY IN THE NETWORKED SOCIETY

Edward Elgar Publishing This cutting-edge book explores the diverse and contested meanings of 'citizenship' in the 21st century, as representative democracy faces a mounting crisis in the wake of the digital age. Luigi Ceccarini enriches and updates the common notion of citizenship, answering the question of how it is possible to fully live as a citizen in a post-modern political community.

MAESTRI OF POLITICAL SCIENCE

ECPR Press This book continues the editors' work (started in the volume "Masters of Political Science") of highlighting and re-evaluating the contributions of the most important political scientists who have gone before. Its basis is the belief that the future development and sophistication of the discipline will benefit from a critical understanding of the works of early political "giants" whose contributions are presented and analysed: Gabriel A. Almond, Raymond Aron, Philip Converse, Maurice Duverger, Stanley Hoffmann, Paul Lazarsfeld, Arend Lijphart, Elinor Ostrom, William H. Riker, Stein Rokkan and Susan Strange. The editors review and consider the contributions of these maestri to the study of contemporary democracy, political culture, electoral systems, political communication, the transformation of capitalism and state formation in Europe. Maestri of Political Science is aimed not only at a new generation of political scientists but is a valuable opportunity for established scholars to see new light through old windows. THE MANY AND THE FEW

POLITICAL PARTICIPATION IN REPUBLICAN BUENOS AIRES

Stanford University Press This book analyzes the relationship between the many and the few in the formation of a republican polity. It studies the case of Buenos Aires in the 1860s and 1870s, when the inauguration of a new national order in Argentina entailed a radical change in the ways of power. By exploring the different forms of participation of the people in the public life of the city, it illuminates a frequently neglected side of the process of construction and legitimization of political power in nineteenth-century Latin American societies. It also provides new historical evidence on the origins of democracy in Argentina, and proposes an interpretation of that process that challenges prevailing views. The book focuses on two major topics: the history of elections and electoral practices, and the creation and development of a public sphere. Its detailed, and often colorful, description of electoral procedures portrays a dynamic and competitive political life that contradicts traditional interpretations of the history of citizenship in Argentina. The author also argues that elections were not the only major element in the relationship between the many and the few, that these decades witnessed the formation of a public sphere: a space of mediation between civil society and the political realm, where different groups voiced their opinions and directly represented their claims. She studies three aspects of the life of the city that were symptoms of this process: the proliferation of associations, the expansion of the periodical press, and the development of a "culture of mobilization." The book concludes by assessing how its conclusions offer new clues to the study of the Argentine political system, the history of Latin American democracies, and, more generally, the relations between the many and the few in modern societies.

THE STATE

ITS NATURE, DEVELOPMENT AND PROSPECTS

John Wiley & Sons This book offers a fresh, accessible and original interpretation of the modern state, concentrating particularly on the emergence and nature of democracy. Poggi presents an extensive conceptual portrait of the state, distinguishing its early characteristics from those which have developed subsequently and are apparent in contemporary states. Here reviews the 'historical career' of the state, from the dissolution of feudal forms of rule to the advent of modern, liberal-democratic systems. Poggi also discusses the nature of liberal-democratic regimes, and the distinctive features of the Soviet one-party system. Finally, the chapter discusses the challenges set to the state by contemporary developments in military affairs, in the international economy, and in the ecological sphere.

COMPARISON

A METHODOLOGICAL INTRODUCTION FOR THE SOCIAL SCIENCES

Verlag Barbara Budrich Comparison is an essential research method in political science. This book helps students to understand comparison as a scientific instrument, to grasp its necessity and its effective purpose for research. For that reason, it replies to three 'simple' questions: why compare, what to compare, and how to compare. The introduction distinguishes itself by considering not only the comparative tradition but also by taking methodological innovations of the last two decades into account.

PERFORMANCE ACCOUNTABILITY AND COMBATING CORRUPTION

World Bank Publications Performance based oversight and accountability can serve as an important antidote to government corruption, inefficiency, and waste. This volume provides an analytical framework and operational approaches needed for the implementation of results-based accountability. The volume makes a major contribution to the literature on public management and evaluation. Major subject areas covered in this book include: performance based accountability, e-government, network solutions to performance measurement and improvement; institutions of accountability in governance; legal and institutional framework to hold government to account; fighting corruption; external accountability; ensuring integrity of revenue administration; the role of supreme audit institutions on detecting fraud and corruption; and the role of parliamentary budget offices and public accounts committees.

REACTIONARY NATIONALISTS, FASCISTS AND DICTATORSHIPS IN THE TWENTIETH CENTURY

AGAINST DEMOCRACY

Springer This book provides a comparative study of fascisms and reactionary nationalisms. It presents these as transnational political cultures and examines the dictatorships and regimes in which these cultures played significant roles. The book is organised into three main sections, focusing on nationalists, fascists and dictatorships in turn. The chapters range across French, Italian, Spanish, Portuguese and German experiences, and include a broader overview of the political cultures in Central and Eastern Europe as well as Latin America. The chapters consider the identities, organizations and evolution of the various cultures and specific political movements, alongside the intersections between these movements and how they adapted to changing contexts. By doing so, the book offers a global view of fascisms and reactionary nationalisms, and promotes debate around these political cultures.

THE WAR ON TERROR AND THE GROWTH OF EXECUTIVE POWER?

A COMPARATIVE ANALYSIS

Routledge The 9/11 attacks on New York and Washington prompted a "global war on terror" that led to a significant shift in the balance of executive-legislative power in the United States towards the executive at the expense of the Congress. In this volume, seasoned scholars examine the extent to which terrorist threats and counter-terrorism policies led uniformly to the growth of executive or Government power at the expense of legislatures and parliaments in other political systems, including those of Australia, Britain, Canada, Indonesia, Israel, Italy, and Russia. The contributors question whether the "crises" created by 9/11 and subsequent attacks, led inexorably to executive strengthening at the expense of legislatures and parliaments. The research reported finds that democratic forces served to mitigate changes to the balance of legislative and executive power to varying degrees in different political systems. This book will be of interest to students and researchers of Comparative Government Politics and International Politics.

SOCIAL MOVEMENTS

AN INTRODUCTION

John Wiley & Sons Social Movements is a comprehensive introduction and critical analysis of collective action in society today. In this new edition, the authors have updated all chapters with the most recent scientific literature, expanded on topics such as individual motivations, new media, public policies, and governance. Draws on research and empirical work across the social sciences to address the key questions in this international field. New edition expands on topics such as individual motivations, new media, public policies, and governance. Has been redesigned in a more user-friendly format.

MEDIA POWER AND THE TRANSFORMATION OF WAR

Springer Do the news media have any role in the transformation of war and warfare? Focusing on television, this book argues that the news media alters the cognitive and strategic environment of the actors of war and politics and therefore changes the way these interact with one another.

GOVERNMENT ACCOUNTABILITY AND LEGISLATIVE OVERSIGHT

Routledge The purpose of the book is to investigate parliaments' capacity to oversee government activities, policies and budget legislation. By analysing the survey data that the World Bank Institute in collaboration with the Inter-Parliamentary Union collected from 120 parliaments, Pelizzo and Stapenhurst show what tools are available to parliaments worldwide, which tools are more or less common, how oversight capacity can be estimated, how oversight capacity is related to other institutional and constitutional factors. In addition to discussing the conditions under which oversight capacity is greater, the authors perform some analyses to assess the policy implications of oversight capacity. Specifically, they look at the impact of oversight capacity on the quality of democracy and on the level of good governance.

RESTRUCTURING EUROPE

CENTRE FORMATION, SYSTEM BUILDING, AND POLITICAL STRUCTURING BETWEEN THE NATION STATE AND THE EUROPEAN UNION

Oxford University Press This book focuses on the historical configuration of the territorial borders and functional boundaries of the European nation state. It presents integration as a process of boundary transcendence, redefinition, shift, and change that fundamentally alters the nature of the European states. Its core concern lies in the relationship between the specific institutional design of the new Brussels centre, the boundary redefinitions that result from its political production, and, finally, the consequences of these two elements on established and developing national European political structures. Integration is examined as a new historical phase in the development of Europe, characterized by a powerful trend toward legal, economic, and cultural de-differentiation after the five-century process of differentiation that led to the European system of nation states. Considering the EU as the formation of an enlarged territorial system, this work recovers some of the classic issues of political modernization theory: Is the EU an attempt at state formation? Is it an attempt at centre formation without nation building? Is it a process of centre formation without democratization? This work also seeks to sharpen the conceptual tools currently available to deal with processes of territorial enlargement and unification. It develops a theoretical framework for political structuring beyond the nation state, capable of linking all aspects of EU integration (inter-governmentalism, definition of rights, the 'constitutionalization' of treaties, the tensions between the new territorial hierarchy and the nation states, etc.). The book adopts an 'holistic' approach to integration, in the form of a theory from which hypotheses can be generated (even if it is not possible to test all of its components). This theoretical framework has three principal aims: to overcome a rigid distinction between domestic politics and international relations; to link actors' orientations, interests, and motivations with macro outcomes; and to relate structural profiles with dynamic processes of change.

THE PARETIAN TRADITION DURING THE INTERWAR PERIOD

FROM DYNAMICS TO GROWTH

Routledge The years in-between the two World Wars were a crucial period for the building of economic dynamics as an autonomous field. Different competing research programs arose at international level. Great progress was achieved by studies on the business cycle, with the first statistical applications. Outside the theory of the business cycle, a significant line of inquiry was that pursued at the end of the 1930s by Hicks and Samuelson. This period also saw the formulation of another approach to formal economic dynamics which in the 1930s represented the frontier of research from the analytical point of view. It was an approach which set the notion of equilibrium at the basis of dynamics, exactly as in the case of statics, thus leading to the definition of a dynamic equilibrium approach. The aim of this volume is to take into consideration this original research field sparked from Pareto's works and initially developed during the 1920s in the United States by two American mathematicians, G. Evans and C. Ross. In the 1930s, the concept of dynamic equilibrium became the main research field of the Pareto school which gave its most important contributions in this field. The Paretian economists as Amoroso, de Pietri Tonelli, Sensini, and the younger, such as Bordin, Palomba, La Volpe, Fossati and Zaccagnini, for the most part students of the former, developed this approach in many directions. The theory of dynamic equilibrium reached remarkable results from an analytical viewpoint through the wide application of the functional calculus, thus anticipating a perspective which was taken into consideration in the 1960s with the theory of optimal growth. Despite the Pareto school's relevance, it remained widely unknown, not only at international level, but also in Italy. Recently, it has been object of renewed interest. This present work aims at reconstructing the fundamental contributions offered by the Pareto school in forming the economic dynamics theory.

HOW POLITICAL PARTIES RESPOND

INTEREST AGGREGATION REVISITED

Routledge How Political Parties Respond focuses specifically on the question of interest aggregation. Do parties today perform that function? If so, how? If not, in what different ways do they seek to show themselves responsive to the electorate? This fascinating book studies these questions with reference to Great Britain, France, Germany, Italy, Spain, Denmark, Norway, Sweden, and Canada. A chapter on Russia demonstrates how newly powerful private interest groups and modern techniques of persuasion can work together to prevent effective party response to popular interests in systems where the authoritarian tradition remains strong.

MACHIAVELLI ON LIBERTY AND CONFLICT

University of Chicago Press Although Machiavelli's ideas have entered the language as an adjective, what Machiavellian means at least to those who study him is a matter of ongoing and vigorous debate. Interpretations range from liberal and conservative, Cambridge School and anti-Cambridge School, Postmodernists, and traditionalists. All these approaches and others can be found in this distinctive volume drawn from an international conference celebrating the 500th anniversary of Machiavelli's "The Prince.". With original contributions by many of the field's leading scholars Quentin Skinner, Harvey Mansfield, Erica Benner, John McCormick, and Giovanni Giorgini, to name but a few."

JUDICIAL ACCOUNTABILITIES IN NEW EUROPE

FROM RULE OF LAW TO QUALITY OF JUSTICE

Routledge This volume focuses on a highly challenging aspect of all European democracies, namely the issue of combining guarantees of judicial independence and mechanisms of judicial accountability. It does so by filling the gap in European scholarship between the two policy sectors of enlargement and judicial cooperation and by taking full stock of an interdisciplinary literature, spanning from comparative politics, socio-legal studies and European studies. Judicial Accountabilities in New Europe presents an insightful account of the judicial reforms adopted by new member States to embed the principle of the rule of law in their democratic institutions, along with the guidelines of quality of justice promoted by European institutions in all member States.

REIMAGINING SOCIAL MOVEMENTS

FROM COLLECTIVES TO INDIVIDUALS

Routledge The social scientific study of social movements remains largely shaped by categories, concepts and debates that emerged in North Atlantic societies in the late 1960s and early 1970s, namely resource mobilization, framing, collective identity, and new social movements. It is now, however, increasingly clear that we are experiencing a profound period of social transformation associated with online interactivity, informationalization and globalization. Written by leading experts from around the world, the chapters in this book explore emerging forms of movement and action not only in terms of the industrialized countries of the North Atlantic, but recognizes the importance of globalizing forms of action and culture emerging from other continents and societies. This is the first book to bring together key authors exploring this transformation in terms of action, culture and movements. It not only engages with critical transformations in the nature of collective action, but also makes a significant contribution to the globalizing of sociology.

LEGISLATIVE OVERSIGHT AND BUDGETING

A WORLD PERSPECTIVE

World Bank Publications In most countries, parliament has the constitutional mandate to both oversee and hold government to account. In light of the increased focus on good governance, academics and legislative strengthening practitioners are re-examining parliament's oversight function with a view to increasing public financial accountability, curbing corruption, and contributing to poverty reduction. This volume brings together research from many different perspectives and many different legislative settings worldwide. As the country case studies in section III demonstrate, the accountability mechanisms or oversight tools available to the legislature vary based on constitutionally defined powers of the legislature, institutional arrangements between the branches of government, divisions of authority between national, regional, and local governments, the degree of legitimacy conferred on the legislature, and the resources available to it. The budget process provides critical opportunities. Section II of this volume is devoted to examining budget oversight from the formulation and approval of the budget, to implementation and the ex post examination of the public accounts. Special attention is also paid to mechanisms to assist parliaments such as Public Accounts Committees and independent parliamentary budget offices. This title will be of interest to parliamentarians and parliamentary staff, legislative strengthening practitioners, and students of legislative development.
