CPR/AED FOR THE PROFESSIONAL RESCUER

Amer Red Cross This New American Red Cros CPR/AED for the Professional Rescuer Participant's Manual and course reflect changes based on the 2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR skill sequences, which helps improve retention. There have also been changes to help improve the quality of CPR. Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can be added to this course including bloodborne pathogens training and emergency oxygen administration. While the skills and knowledge that professional rescuers use are increasing, this training will help you meet your most important responsibility as a professional rescuer- the responsibility to save lives.

PREVENTING DROWNING

AN IMPLEMENTATION GUIDE

"Far too many people around the world know the pain of losing a loved one to drowning. Each year almost 360,000 people die from drowning--over 90% of them in low- and middle income countries. More than half of these deaths are among those younger than 25, with children aged under 5 facing the greatest risk. Drowning is the third leading cause of death worldwide for those aged from 5 to 14. Despite these tragic facts, drowning prevention gets relatively little attention and few resources. There is far more we can do to prevent drowning. Global commitments made as part of the Sustainable Development Goals, for example, cannot be met as long as this preventable cause of death is left largely unchecked. All of us--policymakers, parents, non-profit organizations, businesses and concerned citizens--can help prevent drowning. Explaining how is the goal of this guide. Building on the World Health Organization's 2014 Global report on drowning, the following pages provide practical, step-by-step guidance on how to implement 10 effective measures to prevent drowning. They range from community-based solutions, such as day care for children and barriers controlling access to water, to effective national policies and legislation around water safety, including setting and enforcing boating, shipping and ferry regulations. Data show that all of these solutions can help save lives. The more we work together to implement the measures outlined in this guide, the more lives can be saved. We urge all concerned to adopt as many of the interventions and strategies as their resources will allow, and to protect those most vulnerable without delay."--Page iv.

BASIC WATER RESCUE

THE WOLF OF WALL STREET

Bantam NEW YORK TIMES BESTSELLER • Now a major motion picture directed by Martin Scorsese and starring Leonardo DiCaprio By day he made thousands of dollars a minute. By night he spent it as fast as he could. From the binge that sank a 170-foot motor yacht and ran up a \$700,000 hotel tab, to the wife and kids waiting at home and the fast-talking, hard-partying young stockbrokers who called him king, here, in Jordan Belfort's own words, is the story of the ill-fated genius they called the Wolf of Wall Street. In the 1990s, Belfort became one of the most infamous kingpins in American finance: a brilliant, conniving stock-chopper who led his merry mob on a wild ride out of Wall Street and into a massive office on Long Island. It's an extraordinary story of greed, power, and excess that no one could invent: the tale of an ordinary guy who went from hustling Italian ices to making hundreds of millions—until it all came crashing down. Praise for *The Wolf of Wall Street* "Raw and frequently hilarious."—The New York Times "A rollicking tale of [Jordan Belfort's] rise to riches as head of the infamous boiler room Stratton Oakmont . . . proof that there are indeed second acts in American lives."—Forbes "A cross between Tom Wolfe's *The Bonfire of the Vanities* and Scorsese's *GoodFellas* . . . Belfort has the Midas touch."—The Sunday Times (London) "Entertaining as pulp fiction, real as a federal indictment . . . a hell of a read."—Kirkus Reviews

TRAUMA SURGERY III

Springer Science & Business Media There currently is a clear tendency to an increasing number of accidental injuries in elderly people, in sport injuries and car crashes also in countries which recently joined the European Union and candidates to join the European Union. PONDLIFE

A SWIMMER'S JOURNAL

A&C Black The ponds of Hampstead Heath are small oases; fragments of wild nature nestled in the heart of north-west London. For the best part of his life Al Alvarez - poet, critic, novelist, rock-climber and poker player - has swum in them almost daily. An athlete in his youth, Alvarez, now in his eighties, chronicles what it is to grow old with humour and fierce honesty - from his relentlessly nagging ankle which makes daily life a struggle, to infuriating bureaucratic battles with the council to keep his disabled person's Blue Badge, the devastating effects of a stroke, and the salvation he finds in the three Ss - Swimming, Sex and Sleep. As Alvarez swims in the ponds he considers how it feels when you begin to miss that person you used to be - to miss yourself. Swimming is his own private form of protest against the onslaught of time; proof to others, and himself, that he's not yet beaten. By turns funny, poetic and indignant, Pondlife is a meditation on love, the importance of life's small pleasures and, above all, a lesson in not going gently in to that good night.

COUNSELING AND ACTION

TOWARD LIFE-ENHANCING WORK, RELATIONSHIPS, AND IDENTITY

Springer Engaging in action is at the heart of our most meaningful experiences. And given the fast-paced, goal-driven nature of modern society, engagement in action is also central to how we perceive ourselves. Action has traditionally been viewed as an end product of the counseling process, but now a bold new redefinition makes counseling not only a driver of action, but an action in itself. Counseling and Action couples a timely update on the multiple roles of action in counseling with an action-based framework for enhancing progress between client and professional. Grounded in the core concepts of contextual action theory as well as key aspects of counseling (e.g., identity, intentionality, emotion), the book explicates an approach that is responsive to client complexities and the larger social conditions that frame them. Expert-penned chapters apply theory to practice, illustrating levels of engagement in action as counselor and client negotiate goals and work toward their realization. And an especially useful section offers guidelines for intervening with specific populations and addressing particular issues. Among the topics covered: Designing projects for career construction. Agentic action in context. Counseling intentional addiction recovery grounded in relationships and social meaning. The action of mindfulness in counseling. A contextual action theory perspective on self-efficacy in individual counseling. Counseling processes and procedures through the lens of contextual action theory. With its forceful argument for a quantum leap in both theory and practice, Counseling and Action is transformative reading for professionals, educators, and graduate students in social work, psychotherapy, psychology, and counseling.

TREATMENT FOR POSTTRAUMATIC STRESS DISORDER IN MILITARY AND VETERAN POPULATIONS

INITIAL ASSESSMENT

National Academies Press Prior to the military conflicts in Iraq and Afghanistan, wars and conflicts have been characterized by such injuries as infectious diseases and catastrophic gunshot wounds. However, the signature injuries sustained by United States military personnel in these most recent conflicts are blast wounds and the psychiatric consequences to combat, particularly posttraumatic stress disorder (PTSD), which affects an estimated 13 to 20 percent of U.S. service members who have fought in Iraq or Afghanistan since 2001. PTSD is triggered by a specific traumatic event - including combat - which leads to symptoms such as persistent re-experiencing of the event; emotional numbing or avoidance of thoughts, feelings, conversations, or places associated with the trauma; and hyperarousal, such as exaggerated startle responses or difficulty concentrating. As
