IN CUBA I WAS A GERMAN SHEPHERD

Open Road + Grove/Atlantic Eleven short stories of the Cuban immigrant experience as characters adjust to life in the United Sates, from an award-winning author. From the prize-winning title story—a masterpiece of humor and heartbreak—unfolds a collection of tales that illuminate the landscape of an exiled community rich in heritage, memory, and longing for the past. In Cuba I Was a German Shepherd is at once “tender and sharp-fanged” as Ana Menéndez evocatively charts the territory from Havana to Coral Gables, Florida, and explores whether any of us are capable, or even truly desirous, of outrunning our origins (LA Weekly). “With the grace of Margaret Atwood and the sensuality of Laura Esquivel,” Menéndez makes an unforgettable debut “rich in metaphor, wisdom, and delicious subtlety” (St. Petersburg Times).

THE DEATH OF EXPERTISE

Oxford University Press People are now exposed to more information than ever before, provided both by technology and by increasing access to every level of education. These societal gains, however, have also helped fuel a surge in narcissistic and misguided intellectual egalitarianism that has crippled informed debates on any number of issues. Today, everyone knows everything: with only a quick trip through WebMD or Wikipedia, average citizens believe themselves to be on an equal intellectual footing with doctors and diplomats. All voices, even the most ridiculous, demand to be taken with equal seriousness, and any claim to the contrary is dismissed as undemocratic elitism. As Tom Nichols shows in The Death of Expertise, this rejection of experts has occurred for many reasons, including the openness of the internet, the emergence of a customer satisfaction model in higher education, and the transformation of the news industry into a 24-hour entertainment machine. Paradoxically, the increasingly democratic dissemination of information, rather than producing an educated public, has instead created an army of ill-informed and angry citizens who denounce intellectual achievement. Nichols has deeper concerns than the current rejection of expertise and learning, noting that when ordinary citizens believe that no one knows more than anyone else, democratic institutions themselves are in danger of falling either to populism or to technocracy-or in the worst case, a combination of both. The Death of Expertise is not only an exploration of a dangerous phenomenon but also a warning about the stability and survival of modern democracy in the Information Age.

A PRACTICAL ENGLISH GRAMMAR: EXERCISES

PROBLEM SOLVING WITH ALGORITHMS AND DATA STRUCTURES USING PYTHON

Franklin Beedle & Assoc THIS TEXTBOOK is about computer science. It is also about Python. However, there is much more. The study of algorithms and data structures is central to understanding what computer science is all about. Learning computer science is not unlike learning any other type of difficult subject matter. The only way to be successful is through deliberate and incremental exposure to the fundamental ideas. A beginning computer scientist needs practice so that there is a thorough understanding before continuing on to the more complex parts of the curriculum. In addition, a beginner needs to be given the opportunity to be successful and gain confidence. This textbook is designed to serve as a text for a first course on data structures and algorithms, typically taught

as the second course in the computer science curriculum. Even though the second course is considered more advanced than the first course, this book assumes you are beginners at this level. You may still be struggling with some of the basic ideas and skills from a first computer science course and yet be ready to further explore the discipline and continue to practice problem solving. We cover abstract data types and data structures, writing algorithms, and solving problems. We look at a number of data structures and solve classic problems that arise. The tools and techniques that you learn here will be applied over and over as you continue your study of computer science.

THE HOME TEAM

FATHERS, SONS & HOCKEY

Penguin Shortlisted for the Governor General's Award "A truly magnificent book."—Calgary Herald It's the great Canadian icon: a frozen creek, a backyard rink, a father passing something precious on to his child—the love of a game. There is nothing quite so Canadian as hockey, and nothing quite so evocative in hockey as the relationships between Canadian hockey players and their fathers. Here are the personal tales of Wayne Gretzky, Mark Messier, Paul Coffey and Marty McSorley, told as the four NHL stars take their fathers on a hockey tour of Europe. Here are the memories of hockey's grand families: Gordie, Mark and Travis Howe; Bill, Kevin and Gord Dineen; Murray, Ken and Michael Dryden. Here is Brett Hull's story of the famous father who was never home. But The Home Team is about more than famous names. It is the story of the father and son left weeping in the stands at the end of a disappointing draft day. It is the story of a minor league coach and his house league son. This book is about hockey. It is also about where we live and who we are: a book for all fathers and sons in Canada.

LINGUISTICS AND LITERACY

Springer Science & Business Media William Frawley University of Delaware Several years ago, I performed a kind of perverse experiment. I showed, to several linguistic colleagues, the following comment made by Walker Percy (in The Message in the Bottle): language is too important a problem to be left only to linguists. The linguists' responses were peculiarly predictable: "What does Percy know? He's a mercenary outsider, a novelist, a psychiatrist! How can he say something like that?" Now, it should be known that the linguists who said such things in response were ardent followers of the linguistic vogue: to cross disciplines at whim for the sake of explanation--any explanation. It was odd, to say the least: Percy was damned by the very people who agreed with him! Fortunately, the papers in this book, though radically interdisciplinary, do not fall prey to the kind of hypocrisy described above. The papers (from the Third Delaware Symposium on Language Studies) address the question of literacy--a linguistic problem too important to be left only to linguists--but many of the authors are not linguists at all, and those who are linguists have taken the care to see beyond the parochialism of a single discipline. The subsequent papers have been written by psychologists, linguists, anthropologists, computer scientists, and language teachers to explain the problem of how humans develop, comprehend, and produce extended pieces of information (discourses and texts).

MODERN METHODS OF FOOD ANALYSIS

Springer Science & Business Media This Symposium on Modern Methods of Food Analysis was the seventh in a series of basic symposia, begun in 1976, on topics of major importance to food scientists and food technologists. The Symposium, sponsored jointly by the Institute of Food Technologists and the International Union of Food Science and Technology, was held June 17 and 18, 1983, in New Orleans immediately prior to the 43rd annual IFT meeting. Like the other six basic symposia, the program brought together outstanding speakers, from biochemistry, chemistry, food science, microbiology and nutrition, who are at the cutting edge of their specialty, and provided a setting where they could interact with each other and with the participants. The Symposium and this book are dedicated to the memory of George F. Stewart (1908-1982) who made so many important contributions to the field of food science, including that of food analysis. Bernard S. Schweigert has documented George F. Stewart's contributions in the Dedication of this book.

BANANAS, BEACHES AND BASES**MAKING FEMINIST SENSE OF INTERNATIONAL POLITICS**

Univ of California Press In this brand new radical analysis of globalization, Cynthia Enloe examines recent events—Bangladeshi garment factory deaths, domestic workers in the Persian Gulf, Chinese global tourists, and the UN gender politics of guns—to reveal the crucial role of women in international politics today. With all new and updated chapters, Enloe describes how many women's seemingly personal strategies—in their marriages, in their housework, in their coping with ideals of beauty—are, in reality, the stuff of global politics. Enloe offers a feminist gender analysis of the global politics of both masculinities and femininities, dismantles an apparently overwhelming world system, and reveals that system to be much more fragile and open to change than we think.
