Essentials of Engineering Economics McGraw-Hill College Planter Raj to Swaraj Freedom Struggle and Electoral Politics in Assam This is a re-issue of Amalendu Guha's influential work on Assam and the Northeast, 30 years after its original publication, with a new introduction by the author. Guha's analysis extends from Assam in 1826, the year of the British annexation, to the post-independence conditions in 1950. The peculiar features of the region's plantation economy; the imperialism of opium cultivation; the problems of a steady influx of immigrants and the backlash of a local linguistic chauvinism; peasants' and workers' struggles; the evolution of the ryot sabhas, the Congress, trade unions and later of the Communist Party - such are the themes that have received attention in this book, alongside an analysis of legislative and administrative processes. The narrative is structured chronologically within an integrated Marxist framework of historical perspective, and is based on a wide range of primary sources. God's Gateway Identity and Meaning in a Hindu Pilgrimage Place Oxford University Press A celebrated Hindu pilgrimage site, Hardwar lies on the river Ganges at the edge of the Himalayas. Its identity as a holy place is inextricably tied to the mythology and reality of the Ganges, and traditional sources overwhelmingly stress this connection. Virtually nothing has been written about Hardwar's history and development, although the historical record reveals striking changes of the past few centuries. These changes have usually reflected worldly forces such as shifting trade routes, improved transportation, or political instability. Yet such mundane influences have been ignored in the city's sacred narrative, which presents a fixed, unchanging identity. The city's complex identity, says Lochtefeld, lies in the tension between these differing narratives. In this fieldwork-based study, Lochtefeld analyzes modern Hardwar as a Hindu pilgrimage center. He looks first at various groups of local residents -- businessmen, hereditary priests, and ascetics -- and assesses their differing roles in managing Hardwar as a holy place. He then examines the pilgrims and the factors that bring them to Hardwar. None of these groups is as pious as popularly depicted, but their interactions in upholding their own interest create and maintain Hardwar's religious environment. In conclusion, he addresses the wider context of Indian pilgrimage and the forces shaping it in the present day. He finds that many modern Hindus, like many modern Christians, feel some dissonance between traditional religious symbols and their 21st-century world, and that they are reinterpreting their traditional symbols to make them meaningful for their time. Fruit Processing Springer Science & Business Media Fruit and fruit products, in all their many varieties and variations, are major world commodities and part of the economic life blood of many countries, particularly in the developing world. The perception of the healthy nature of fruit is a major reason for its increased consumption in the developed world, and many consumers today find a wider selection of fruit varieties, available at all times of the year, than ever before. This volume, however, is not so much concerned with fresh fruit as those principal areas of processing to which it may be subjected. Fruit processing arose as a means of utilising a short-lived product and preserving its essential nutritional qualities as far as possible. A chapter on the nutritional aspects of fruit is included in this work to reflect the importance of this topic to most consumers. After a general introduction, the chapter on fruit storage is the only contribution which deals with a process from which fruit emerges in essentially the same physical condition. Beyond that the book sets out to cover most of the major areas in which fruit may be processed into forms which bear varying semblances to the original raw material. Liking Progress, Loving Change A Literary History of the Progressive Writers' Movement in Urdu Oxford University Press, USA From Faiz Ahmad Faiz to Ali Sardar Jafri, this book explores a critical history of the Progressive Writers' Movement (PWM) in India, particularly in the context of Urdu literature. Religious Interactions in Mughal India Oxford University Press, USA Popular knowledge generally operates with the notion that "Hindu" and "Muslim" as polarized religious identities have existed from the moment Muslims entered northern India in the eleventh century. The essays for this volume interrogate this idea. They focus on Islamicate traditions in their interaction with coterminous Hindu ones in the three centuries between 1500 and 1800. They examine a wide tableau of sites and modes of interchanges, allowing the texts to speak in their own languages, whether these are assimilative, antagonistic, or indifferent. Given the charged nature of Hindi-Muslim relations today, a fresh study of these relations in their regional and temporal specificity along with a renewed attempt to closely interrogate the language in which we talk about them is absolutely vital in order to contest powerful and contemporary "clash of civilizations" narratives in South Asia as well as elsewhere. Indian freedom struggle is one of the most important parts of its history. A lot has been written and said about it, but there still remains a gap. The Story of Indian Manufacturing Encounters with the Mughal and British Empires (1498 -1947) Springer This book discusses the role historical events played in determining the pattern of growth of Indian manufacturing. Two important historical events significantly influenced the course of Indian manufacturing from the 15th century AD. The first was the arrival of European merchants via sea route pioneered by Vasco-da-Gamma in 1498 and the other was the dawn of the Mughal Empire in 1526. The book explores how these two events provided the appropriate stimulus for the emergence of traditional flexible manufacturing in India and how they played a vital role in the pattern of growth of the Indian manufacturing: The Mughal Empire created an integrated economy of continental size whereas European trading companies expanded the commercial connectivity of the Indian economy and South East Asia. It further investigates how the circumstances created by the colonial administration, factor endowment and market conditions created the complex forms of manufacturing enterprises that India inherited at the time of independence. It is a valuable resource for students of history, economic history, business history and the history of technology.
