The big problem facing managers and their organizations today is one of implementation—how to get things done in a timely and effective way. Problems of implementation are really issues of how to influence behavior, change the course of events, overcome resistance, and get people to do things they would not otherwise do. In a word, power. *Managing With Power* provides an in-depth look at the role of power and influence in organizations. Pfeffer shows convincingly that its effective use is an essential component of strong leadership. With vivid examples, he makes a compelling case for the necessity of power in mobilizing the political support and resources to get things done in any organization. He provides an intriguing look at the personal attributes—such as flexibility, stamina, and a high tolerance for conflict—and the structural factors—such as control of resources, access to information, and formal authority—that can help managers advance organizational goals and achieve individual success. **Fundamentals of Management Essential Concepts and Applications Cracked it! How to solve big problems and sell solutions like top strategy consultants Springer** Solving complex problems and selling their solutions is critical for personal and organizational success. For most of us, however, it doesn't come naturally and we haven't been taught how to do it well. Research shows a host of pitfalls trips us up when we try: We're quick to believe we understand a situation and jump to a flawed solution. We seek to confirm our hypotheses and ignore conflicting evidence. We view challenges incompletely through the frameworks we know instead of with a fresh pair of eyes. And when we communicate our recommendations, we forget our reasoning isn't obvious to our audience. How can we do it better? In *Cracked It!*, seasoned strategy professors and consultants Bernard Garrette, Corey Phelps and Olivier Sibony present a rigorous and practical four-step approach to overcome these pitfalls. Building on tried-and-tested (but rarely revealed) methods of top strategy consultants, research in cognitive psychology, and the latest advances in design thinking, they provide a step-by-step process and toolkit that will help readers tackle any challenging business problem. Using compelling stories and detailed case examples, the authors guide readers through each step in the process: from how to state, structure and then solve problems to how to sell the solutions. Written in an engaging style by a trio of experts with decades of experience researching, teaching and consulting on complex business problems, this book will be an indispensable manual for anyone interested in creating value by helping their organizations crack the problems that matter most. **School and Community Relations** For prospective and current educational administrators learning about school and community relations. airline management, but it should also be useful to entry and junior level airline managers and professionals seeking to expand their knowledge of the industry beyond their own functional area. **Changing Employee Behavior A Practical Guide for Managers Springer** An important part of every manager's job is changing people's behavior: to improve someone's performance, get them to better manage relationships with colleagues, or to stop them doing something. Yet, despite the fact that changing people's behavior is such an important skill for managers, too many are unsure how to actually go about it. This book reveals the simple, but powerful techniques for changing behavior that experts from a range of disciplines have been using for years, making them available to all managers in a single and comprehensive toolkit for change that managers can use to drive and improve the performance of their staff. Based on research conducted for this book, it introduces practical techniques drawn from the fields of psychology, psychotherapy, and behavioral economics, and show how they can be applied to address some of the most common, every-day challenges that managers face. #changingpeople
