Building Automation

Communication systems with EIB/KNX, LON and BACnet

Springer This book offers all important industrial communication systems for buildings in one single book! It stimulates a basic understanding of network and bus systems for the automation of buildings. After an introduction to EIB/KNX, LON und BACnet technologies, the authors illustrate how these systems can be utilized for specific applications, like air conditioning or illumination. This book assumes only a basic knowledge of mathematics and thanks to its simple explanations and many examples is ideal for students and professional engineers who require practical solutions. Numerous practical examples explain basic concepts of industrial communication technology as well as the procedure for the transmission of digital data. All chapters have been thoroughly revised for the 2nd edition and the book includes the latest technical developments and standards.

Advances in Rhabditida Research and Treatment: 2013 Edition

ScholarlyBrief

ScholarlyEditions **Advances in Rhabditida Research and Treatment: 2013 Edition** is a ScholarlyBrief™ that delivers timely, authoritative, comprehensive, and specialized information about ZZZAdditional Research in a concise format. The editors have built **Advances in Rhabditida Research and Treatment: 2013 Edition** on the vast information databases of ScholarlyNews.™ You can expect the information about ZZZAdditional Research in this book to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of **Advances in Rhabditida Research and Treatment: 2013 Edition** has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

Configuración de instalaciones domóticas y automáticas 2.ª edición

Editorial Paraninfo Las instalaciones domóticas han comenzado a formar parte del ADN de nuestros hogares: un hogar digital conectado, inteligente y adaptado a las necesidades de una nueva sociedad en continuo e incesante cambio y evolución. Este libro desarrolla los contenidos del módulo profesional de Configuración de Instalaciones Domóticas y Automáticas, del Ciclo Formativo de grado superior de Sistemas Electrotécnicos y Automatizados, de la familia profesional de Electricidad y Electrónica. Configuración de instalaciones domóticas y automáticas se ha renovado para que, en esta segunda edición, el lector se aproxime a la evolución que las instalaciones domóticas han sufrido en los últimos años, ayudándole a entender las distintas tecnologías y profundizar en su elección, instalación, puesta en marcha y verificación. La obra es un compendio de las principales tecnologías domóticas existentes en el sector. Se trata de una obra inédita que refleja la necesidad de profundizar en las tecnologías domóticas que cada día se incorporan a nuestros hogares, edificios o ciudades. El calificativo «inteligente» adquiere un nuevo significado, formando parte inherente de los objetos, instalaciones y otros entes que circundan a nuestro alrededor. Dirigida al alumnado de Ciclos Formativos, de Ingenierías e interesados en la temática en general, este libro persigue como objetivo permitir al lector conocer las instalaciones domóticas y las soluciones tecnológicas asociadas que existen en la actualidad, así como su evolución y tendencias.

Photovoltaik Engineering

Handbuch für Planung, Entwicklung und Anwendung

Springer-Verlag Dieses Buch beschreibt die notwendigen Methoden für Planung, Entwicklung und Anwendung photovoltaischer Anlagen im Inselbetrieb, zur Netzeinspeisung oder mit Nachführung. Die vierte Auflage dieses anerkannten Werkes liefert Methoden und Planungshilfen für die Dimensionierung photovoltaischer Komponenten unter realitätsnahen Bedingungen. Der Autor befasst sich ausführlich mit photovoltaischen Inselsystemen, der Qualitätskontrolle vor Ort und der Energie-Ertragsprognose von photovoltaischen Systemen zur Netzeinspeisung. Einstrahlungsdaten für etwa 500 Städte in 140 Ländern aller Kontinente, darunter auch für alle Bundesstaaten der USA, machen das Buch zu einem wertvollen Begleiter für alle Anlagenplaner und -betreiber der Photovoltaik.

Inorganic Carbon Compounds—Advances in Research and Application: 2012 Edition

ScholarlyEditions Inorganic Carbon Compounds—Advances in Research and Application: 2012 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Inorganic Carbon Compounds. The editors have built Inorganic Carbon Compounds—Advances in Research and Application: 2012 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Inorganic Carbon Compounds in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Inorganic Carbon Compounds—Advances in Research and Application: 2012 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. Comparative Genomics

RECOMB 2006 International Workshop, RECOMB-CG 2006, Montreal, Canada, September 24-26, 2006, Proceedings

Springer Science & Business Media This book constitutes the refereed proceedings of the 4th RECOMB Comparative Genomics Satellite Workshop, RECOMB-CG 2006. The 17 revised full papers presented were carefully reviewed and selected from 34 initial submissions. The papers address a broad variety of aspects and components of the field of comparative genomics, ranging from new quantitative discoveries about genome structure and process to theorems on the complexity of computational problems inspired by genome comparison.

Aspect and Modality in Kwa Languages

John Benjamins Publishing This book explores the thesis that in the Kwa languages of West Africa, aspect and modality are more central to the grammar of the verb than tense. Where tense marking has emerged it is invariably in the expression of the future, and therefore concerned with the impending actualization or potentiality of an event, hence with modality, rather than the purely temporal sequencing associated with tense. The primary grammatical contrasts are perfective versus imperfective. The main languages discussed are Akan, Dangme, Ewe, Ga and Tuvuli while Nzema-Ahanta, Likpe and Eastern Gbe are also mentioned. Knowledge about these languages has deepened considerably during the past decade or so and ideas about their structure have changed. The volume therefore presents novel analyses of grammatical forms like the so-called S-Aux-O-V-Other or "future" constructions, and provides empirical data for theorizing about aspect and modality. It should be of considerable interest to Africanist linguists, typologists, and creolists interested in substrate issues.

Energy and Technical Building Systems - Scientific and Technological Advances

MDPI Future buildings require not only energy efficiency but also proper building automation and control system functionalities in order to respond to the needs of occupants and energy grids. These development paths require a focus on occupant needs such as good indoor climate, easy operability, and monitoring. Another area to be tackled is energy flexibility, which is needed to make buildings responsive to the price signals of electricity grids with increasing

amounts of fluctuating renewable energy generation installed both in central grids and at building sites. This Special Issue is dedicated to HVAC systems, load shifting, indoor climate, and energy and ventilation performance analyses in buildings. All these topics are important for improving the energy performance of new and renovated buildings within the roadmap of low energy and nearly zero energy buildings. To improve energy performance and, at the same time, occupant comfort and wellbeing, new technical solutions are required. Occupancy patterns and recognition, intelligent building management, demand response and performance of heating, cooling and ventilation systems are some common keywords in the articles of this Special Issue contributing to future highly performing buildings with reliable operation.

Interactive Systems. Design, Specification, and Verification

10th International Workshop, DSV-IS 2003, Funchal, Madeira Island, Portugal, June 11-13, 2003, Revised Papers

Springer This book constitutes the thoroughly refereed post-proceedings of the 10th International Workshop on Design, Specification, and Verification of Interactive Systems, DSV-IS 2003, held in Funchal, Madeira Island, Portugal, in June 2003. The 26 revised full papers and 5 revised short papers presented together with an invited paper have passed through two rounds of reviewing, selection, and improvement. The papers are organized in topical sections on test and evaluation, Web and groupware, tools and technologies, task modeling, model-based design, mobile and multiple devices, UML, and specification languages.

Evolving Intelligent Systems

Methodology and Applications

John Wiley & Sons From theory to techniques, the first all-in-one resource for EIS There is a clear demand in advanced process industries, defense, and Internet and communication (VoIP) applications for intelligent yet adaptive/evolving systems. Evolving Intelligent Systems is the first self-contained volume that covers this newly established concept in its entirety, from a systematic methodology to case studies to industrial applications. Featuring chapters written by leading world experts, it addresses the progress, trends, and major achievements in this emerging research field, with a strong emphasis on the balance between novel theoretical results and solutions and practical real-life applications. Explains the following fundamental approaches for developing evolving intelligent systems (EIS): the Hierarchical Prioritized Structure the Participatory Learning Paradigm the Evolving Takagi-Sugeno fuzzy systems (eTS+) the evolving clustering algorithm that stems from the well-known Gustafson-Kessel offline clustering algorithm Emphasizes the importance and increased interest in online processing of data streams Outlines the general strategy of using the fuzzy dynamic clustering as a foundation for evolvable information granulation Presents a methodology for developing robust and interpretable evolving fuzzy rule-based systems Introduces an integrated approach to incremental (real-time) feature extraction and classification Proposes a study on the stability of evolving neuro-fuzzy recurrent networks Details methodologies for evolving clustering and classification Reveals different applications of EIS to address real problems in areas of: evolving inferential sensors in chemical and petrochemical industry learning and recognition in robotics Features downloadable software resources Evolving Intelligent Systems is the one-stop reference guide for both theoretical and practical issues for computer scientists, engineers, researchers, applied mathematicians, machine learning and data mining experts, graduate students, and professionals.

Identification of Novel Roles of the ETS-5 Transcription Factor in Exploratory Behaviour

PhD Thesis

Nature's Gift to Neuroscience

A Tribute to Sydney Brenner and John Sulston

CRC Press In the 1960s, Sydney Brenner proposed to use the nematode worm *Caenorhabditis elegans* to discover the control mechanisms of animal development and to reveal how a small number of neurons generate different behaviours, giving birth to a vibrant community that uses this animal model for their studies. Brenner was aided in his aim by John Sulston, who mapped the *C. elegans* cell lineages - from a single cell to the multicellular adult - which transformed the field of developmental biology. As a tribute to these two men, this book captures the perspectives of some of the early pioneers of the worm community, from Martin Chalfie, Robert Waterston and Donald Moerman to Catherine Rankin, Antony Stretton and John White. It also includes contributions from subsequent generations of the community, who explore the development and function of the *C. elegans* nervous system. This book features how this animal has become one of the best models for elucidating the biology of different sensory modalities and their complex behavioural outputs, or how this animal's survival strategies have contributed to our understanding of ageing and neurodegeneration. Thus, this volume documents the development of the *C. elegans* neuroscience field, from infancy to maturity. The chapters in this book were originally published as a special issue of the *Journal of Neurogenetics*.

L-integrità u l-implimentazzjoni tal-EU ETS5

L-EU ETS hija l-pedament tal-politika tal-UE dwar il-klima u spiss tiġi kkwotata bħala mudell għall-politika emergenti dwar it-tibdil fil-klima fid-dinja. Il-Qorti sabet dgħufijiet sinifikanti fl-implimentazzjoni matul il-Fażi II (2008-2012) u problemi bir-robustezza tal-qafas għall-protezzjoni tal-integrità tas-suq. Ir-regolamentazzjoni u s-sorveljanza tas-suq, l-istatus legali ta' kwoti tal-emissjonijiet, u s-sistemi għall-ipproċessar ta' informazzjoni fundamentali tal-EU ETS kienu jeħtieġu li jsir ilhom titjib. L-Istati Membri għandhom isaħħu l-implimentazzjoni tagħhom tal-qafas ta' kontroll u tas-sanzjonijiet. Il-Qorti tagħmel għadd ta' rakkomandazzjonijiet immirati lejn it-titjib tal-integrità u tal-implimentazzjoni tal-iskema.

Judging at the Interface

Deference to State Decision-Making Authority in
International Adjudication

Cambridge University Press **This book investigates how international adjudicators defer to State decision-making authority, and what that reveals about the domestic-international interface.**

The Idea of Human Rights Revisited

Charles Beitz and the Political Turn in the Philosophy of
Human Rights

Taylor & Francis **This volume takes stock of the seminal contribution of Charles Beitz to the so-called "political turn" in the philosophy of human rights, whose origins are in the work of the late Rawls. In his already classic book *The Idea of Human Rights* (2009), Beitz proposes that human rights are better understood from the vantage point of their practice in the contemporary world. Instead of looking at these rights as legal and political instantiations of fully justified moral rights, Beitz reconstructs the idea of human rights as being part of a global discursive practice that can only be understood in the framework of the international system of states in which we live. In this system of interdependent states, with the consequent dispersion of political authority, human rights constitute an array of internal justifications and criticisms, rather than a blueprint of the ideal society. All the chapters in this volume draw on these fundamental ideas elaborated by Beitz and propose to extend them further in their connection with humanistic accounts of human rights, with the plurality of contexts in which the practice of human rights takes place, and finally, with the interconnections between these rights and global justice or intergenerational justice. The chapters in this book were originally published as a special issue of *Critical Review of International Social and Political Philosophy*.**

Human Rights Unbound

A Theory of Extraterritoriality

Oxford University Press This book explores to what extent a state owes human rights obligations to individuals outside of its territory, when the conduct of that state impacts upon the lives of those individuals. It draws upon legal and political philosophy to develop a theory of extraterritoriality based on the nature of human rights, merging accounts of economic, social, and cultural rights with those of civil and political rights. Lea Raible outlines four main arguments aimed at changing the way we think about the extraterritoriality of human rights. First, she argues that questions regarding extraterritoriality are really about justifying the allocation of human rights obligations to specific states. Second, the book shows that human rights as found in international human rights treaties are underpinned by the values of integrity and equality. Third, she shows that these same values justify the allocation of human rights obligations towards specific individuals to public institutions - including states - that hold political power over those individuals. And finally, the book demonstrates that title to territory is best captured by the value of stability, as opposed to integrity and equality. On this basis, Raible concludes that all standards in international human rights treaties that count as human rights require that a threshold of jurisdiction, understood as political power over individuals, is met. The book applies this theory of extraterritoriality to explain the obligations of states in a wide range of cases.

Judicial Dialogue and Human Rights

Cambridge University Press This book offers a comprehensive analysis of the extent, method, purpose and effects of domestic and international courts' judicial dialogue on human rights. The analysis covers national courts' judicial dialogue from different regions of the world, including Eastern Europe, Latin America, Canada, Nigeria and Malaysia. The text is complemented by studies on specific subject matters such as LGBTBI people's and asylum seekers' rights that further contribute to a better understanding of factors that stimulate or hold back judicial dialogue, and by first hand insights of domestic and European Court of Human Rights judges into their courts' involvement in judicial dialogue. The book features contributions from leading scholars and judges, whose combined perspectives provide an interesting and timely study.

Of Justification: four disputations ... defending the Truth, against the unnecessary oppositions of divers learned and reverend brethren

The Right to Conscientious Objection to Military Service and Turkey's Obligations under International Human Rights Law

Springer This study examines Turkey's non-recognition of the right to conscientious objection to military service and locates this non-recognition within the context of international human rights law - specifically United Nations and European Union system.

A Failure of Proportion

Non-Consensual Adoption in England and Wales

Bloomsbury Publishing This book explores non-consensual adoption - an area of law which has sparked considerable debate amongst academics, practitioners and the judiciary nationally and internationally. The emphasis of this book is on the circumstances in which non-consensual adoption may be regarded as a proportionate measure and when less severe forms of intervention, such as long-term foster care or kinship care, may also meet children's needs while providing protection to children's rights under the European Convention on Human Rights. The book builds on existing literature on adoption law but takes the discussion in new directions, placing an emphasis on the need to closely

scrutinise children's and parents' rights at all stages of the adoption process, not simply when parents appeal against the making of an adoption order. A unique feature of this book is its emphasis on routinely incorporating key provisions from the United Nations Convention on the Rights of the Child into analysis when determining whether an adoption order is a proportionate measure.

Selfless Intervention

The Exercise of Jurisdiction in the Common Interest

Oxford University Press Should states intervene in situations outside of their own territory in order to safeguard or promote the common good? In this book, Cedric Ryngaert addresses this key question, looking at how the international law of state jurisdiction can be harnessed to serve interests common to the international community. The author inquires how the purpose of the law of jurisdiction may shift from protecting national interests to furthering international concerns, such as those relating to the global environment and human rights. Such a shift is enabled by the instability of the notion of jurisdiction, as well as the interpretative ambiguity of the related notions of sovereignty and territoriality. There is no denying that, in the real world, 'selfless intervention' by states tends to combine with more insular considerations. This book argues, however, that such considerations do not necessarily detract from the legitimacy of unilateralism, but may precisely serve to trigger the exercise of jurisdiction in the common interest.

International Criminal Law

Cavendish Publishing This book explores criminal issues from an international law perspective. It takes account of international (international criminal tribunals) and domestic case law and recent international developments, such as The International Criminal Court, terrorism, jurisdiction and immunities, among others.

Research Handbook on EU Environmental Law

Edward Elgar Publishing This comprehensive Research Handbook discusses how the EU has used its regulatory power to steer towards environmentally friendly behaviour, delving into the deep concerns related to the compliance with and enforcement of EU environmental law. It also highlights the important role of civil society's use of environmental procedural rights, and characterizes how the CJEU case law has contributed to the effective implementation of EU environmental legislation.

Precipitation Science

Measurement, Remote Sensing, Microphysics and Modeling

Elsevier **Precipitation Science: Measurement, Remote Sensing, Microphysics and Modeling** addresses the latest key concerns for researchers in precipitation science, mainly observing, measuring, modeling and forecasting. Using case studies and global examples, the book demonstrates how researchers are addressing these issues using state-of-the-art methods and models to improve accuracy and output across the field. In the process, it covers such topics as discrepancies between models and observations, precipitation estimations, error assessment, droplet size distributions, and using data in forecasting and simulations. Other sections cover improved standard approaches, novel approaches, and coverage of a variety of topics such as climatology, data records, and more. By providing comprehensive coverage of the most up-to-date approaches to understanding, modeling, and predicting precipitation, this book offers researchers in atmospheric science, hydrology and meteorology with a comprehensive resource for improving outcomes and advancing knowledge. Provides updated and novel approaches to key issues in precipitation research Offers practical knowledge through global examples and case studies Includes full-color visuals to enhance comprehension of key concepts

Propagation Effects Handbook for Satellite Systems Design

Summary of Propagation Impairments on 10 to 100 GHz Satellite Links with Techniques for System Design
