The Writing Revolution

A Guide to Advancing Thinking Through Writing in All Subjects and Grades

John Wiley & Sons "HELP! My Students Can't Write!" Why You Need a Writing Revolution in Your Classroom and How to Lead It. The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, TWR can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities TWR is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.

Two Books Are Better Than One!

Reading Writing (and Talking and Drawing) Across Texts in K-2

Capstone Today's early literacy programs are more demanding than ever. No longer is it sufficient to teach letters, letter sounds, sight words, and simple texts in kindergarten through second grade. Children are expected to read and comprehend texts in a variety of genres with increasing complexity. Then they must integrate the ideas and concepts from those texts into their own writing. Two Books are Better Than One: Reading and Writing (and Talking and Drawing) Across Texts in K-2 helps teachers meet those demands. Each chapter contains an anchor lesson focused on a different way of connecting texts, including: by theme, characters, perspective, structure, or genre. The lessons feature research-based and common core aligned strategies: interactive read-alouds; shared reading and writing; scaffolded small group reading; accountable talk; close reading; and opinion, narrative, and explanatory writing. Each anchor lesson features two high-quality children's books, and each chapter is rounded out with a list of other recommended book pairs to support you in creating your own lessons.

Media Management and Digital Transformation

Routledge Media Management and Digital Transformation provides novel and empirically rich insights into the tensions, struggles and innovations of news making and managing in media organizations. From an empirically grounded perspective this book investigates how the 'buzz' of new technology tends to prevent management from seeing which changes are needed and indeed possible to make in the newsroom. It presents ground-breaking research showing that fostering ingenious, innovative solutions can be created from within organizations by engaging and allowing employees to recognize problems, reflect and experiment with new ways of working, using technology as support for change. The research presented arises from a four-year action research project in collaboration with three small and medium-sized Norwegian newspapers, in addition to ethnographic research in newsrooms and on media organizations and phenomena in the USA and Europe. It includes among other empirical examples of newsrooms transitioning from a deadline-controlled workflow to an open-ended flowline production, and provides new tools and methods for fostering collaborative creativity and co-creative innovation practices. It also looks into newsrooms' attempts to strengthen their audience engagement, metrics performance and external collaborations with technology providers, journalism education and action researchers. With theoretical chapters, methodological insights and qualitative case studies of contemporary practices, this book is essential reading for students and practitioners involved with media management globally.
