Nigeria's Criminal Crude

International Options to Combat the Export of Stolen Oil

[Chatham House](#) This report analyses the international dimensions of Nigerian crude oil theft and explores what the international community could do about it. Nigerian crude oil is being stolen on an industrial scale. Some of what is stolen is exported. Proceeds are laundered through world financial centers and used to buy assets in and outside Nigeria, polluting markets and financial institutions overseas, and creating reputational, political and legal hazards. It could also compromise parts of the legitimate oil business. Officials outside Nigeria are aware that the problem exists, and occasionally show some interest at high policy levels. But Nigeria's trade and diplomatic partners have taken no real action, and no stakeholder group inside the country has a record of sustained and serious engagement with the issue. The resulting lack of good intelligence means international actors cannot fully assess whether Nigerian oil theft harms their interests. Nigeria's dynamic, overcrowded political economy drives competition for looted resources. Poor governance has encouraged violent opportunism around oil and opened doors for organized crime. The report recommends the following four first steps for building a cross-border campaign against Nigerian oil theft: Nigeria and its prospective partners should prioritize the gathering, analysis and sharing of intelligence. Nigeria should consider taking other steps to build the confidence of partners. Other states should begin cleaning up parts of the trade they know are being conducted within their borders. Nigeria should articulate its own multi-point, multi-partner strategy for addressing oil theft.

Political Risk

How Businesses and Organizations Can Anticipate Global Insecurity

[Twelve](#) From New York Times bestselling author and former U.S. secretary of state Condoleezza Rice and Stanford University professor Amy B. Zegart comes an examination of the rapidly evolving state of political risk, and how to navigate it. The world is changing fast. Political risk—the probability that a political action could significantly impact a company's business—is affecting more businesses in more ways than ever before. A generation ago, political risk mostly involved a handful of industries dealing with governments in a few frontier markets. Today, political risk stems from a widening array of actors, including Twitter users, local officials, activists, terrorists, hackers, and more. The very institutions and laws that were supposed to reduce business uncertainty and risk are often having the opposite effect. In today's globalized world, there are no "safe" bets. POLITICAL RISK investigates and analyzes this evolving landscape, what businesses can do to navigate it, and what all of us can learn about how to better understand and grapple with these rapidly changing global political dynamics. Drawing on lessons from the successes and failures of companies across multiple industries as well as examples from aircraft carrier operations, NASA missions, and other unusual places, POLITICAL RISK offers a first-of-its-kind framework that can be deployed in any organization, from startups to Fortune 500 companies. Organizations that take a serious, systematic approach to political risk management are likely to be surprised less often and recover better. Companies that don't get these basics right are more likely to get blindsided.

Manual of Tests and Criteria

The Manual of Tests and Criteria contains criteria, test methods and procedures to be used for classification of dangerous goods according to the provisions of Parts 2 and 3 of the United Nations Recommendations on the Transport of Dangerous Goods, Model Regulations, as well as of chemicals presenting physical hazards according to the Globally Harmonized System of Classification and Labelling of Chemicals (GHS). As a consequence, it supplements also national or international regulations which are derived from the United Nations Recommendations on the Transport of Dangerous Goods or the GHS. At its ninth session (7 December 2018), the Committee adopted a set of amendments to the sixth revised edition of the Manual as amended by Amendment 1. This seventh revised edition takes account of these amendments. In addition, noting that the work to facilitate the use of the Manual in the context of the GHS had been completed, the Committee considered that the reference to the "Recommendations on the Transport of Dangerous Goods" in the title of the Manual was no longer appropriate, and decided that from now on, the Manual should be entitled "Manual of Tests and Criteria".
