As you make your way through the book's short, easily-digestible chapters, you'll learn how to: * Create and delete files, directories, and symlinks * Administer your system, including networking, package installation, and process management * Use standard input and output, redirection, and pipelines * Edit files with Vi, the world's most popular text editor * Write shell scripts to automate common or boring tasks * Slice and dice text files with cut, paste, grep, patch, and sed Once you overcome your initial "shell shock," you'll find that the command line is a natural and expressive way to communicate with your computer. Just don't be surprised if your mouse starts to gather dust. **A featured resource in the Linux Foundation's "Evolution of a SysAdmin" Beginning Fedora Desktop Fedora 18 Edition** [Apress](#) **Beginning Fedora Desktop: Fedora 18 Edition** is a complete guide to using the Fedora 18 Desktop Linux release as your daily driver for mail, productivity, social networking, and more.
