1519-1522 An Account of Magellan's Expedition University of Toronto Press On 10 August 1519, five ships departed from Seville for what was to become the first circumnavigation of the globe. Linked by fame to the name of its captain, Magellan, much of the expedition is known through the travelogue of one of the few crew members who returned to Spain, Antonio Pigafetta. A narrative and cartographic record of the journey (including 23 hand-drawn watercolour charts) from Patagonia to Indonesia, from the Philippines to the Cape of Good Hope, Pigafetta's *The First Voyage around the World* is a classic of discovery and exploration literature. This volume is based on the critical edition by Antonio Canova. It includes an extensive introduction to the work and generous annotations by Theodore J. Cachey Jr who discusses the marvelous elements of the story through allusions to Magellan's travels made by writers as diverse as Shakespeare and Gabriel García Márquez. However, Cachey is careful to point out that Pigafetta's book is far from just a marvel-filled travel narrative. *The First Voyage around the World* is also a remarkably accurate ethnographic and geographical account of the circumnavigation, and one that has earned its reputation among modern historiographers and students of the early contacts between Europe and the East Indies. Expertly presented and handsomely illustrated, this edition of Pigafetta's classic travelogue is sure to enlighten new readers and invigorate the imagination as the story has done since it first appeared.

Financial analysis offices in most international banks are supposed to forecast the rise or fall of stock prices, the success or failure of investment products, and even the growth or decline of entire national economies. And yet their predictions are heavily disputed. How do they make their forecasts—and do those forecasts have any actual value? Building on recent developments in the social studies of finance, Stories of Capitalism provides the first ethnography of financial analysis. Drawing on two years of fieldwork in a Swiss bank, Stefan Leins argues that financial analysts construct stories of possible economic futures, presenting them as coherent and grounded in expert research and analysis. In so doing, they establish a role for themselves—not necessarily by laying bare empirically verifiable trends but rather by presenting the market as something that makes sense and is worth investing in. Stories of Capitalism is a nuanced look at how banks continue to boost investment—even in unstable markets—and a rare insider's look into the often opaque financial practices that shape the global economy. **Cost Accounting** Cengage Learning The most practical, real-world presentation of cost accounting on the market, this book blends a traditional and proven method of teaching cost accounting with the integration of innovative topics. Cost topics are covered in the context of organizational strategy and operational tactics, as cost management decisions are sensitive to strategies driven by quality, cost, and innovation. Kinney, Prather-Kinsey, and Raiborn reinforce the material with real-world examples and visual illustrations that bring cost management techniques into the student's sphere of understanding. A flexible organization appropriate for either a one- or two- semester course--coupled with clear and abundant visual presentations--allows students to clearly understand difficult topics.
