THE AMERICAN PSYCHIATRIC ASSOCIATION PRACTICE GUIDELINES FOR THE PSYCHIATRIC EVALUATION OF ADULTS, THIRD EDITION

American Psychiatric Pub Since the publication of the Institute of Medicine (IOM) report *Clinical Practice Guidelines We Can Trust* in 2011, there has been an increasing emphasis on assuring that clinical practice guidelines are trustworthy, developed in a transparent fashion, and based on a systematic review of the available research evidence. To align with the IOM recommendations and to meet the new requirements for inclusion of a guideline in the National Guidelines Clearinghouse of the Agency for Healthcare Research and Quality (AHRQ), American Psychiatric Association (APA) has adopted a new process for practice guideline development. Under this new process APA's practice guidelines also seek to provide better clinical utility and usability. Rather than a broad overview of treatment for a disorder, new practice guidelines focus on a set of discrete clinical questions of relevance to an overarching subject area. A systematic review of evidence is conducted to address these clinical questions and involves a detailed assessment of individual studies. The quality of the overall body of evidence is also rated and is summarized in the practice guideline. With the new process, recommendations are determined by weighing potential benefits and harms of an intervention in a specific clinical context. Clear, concise, and actionable recommendation statements help clinicians to incorporate recommendations into clinical practice, with the goal of improving quality of care. The new practice guideline format is also designed to be more user friendly by dividing information into modules on specific clinical questions. Each module has a consistent organization, which will assist users in finding clinically useful and relevant information quickly and easily. This new edition of the practice guidelines on psychiatric evaluation for adults is the first set of the APA's guidelines developed under the new guideline development process. These guidelines address the following nine topics, in the context of an initial psychiatric evaluation: review of psychiatric symptoms, trauma history, and treatment history; substance use assessment; assessment of suicide risk; assessment for risk of aggressive behaviors; assessment of cultural factors; assessment of medical health; quantitative assessment; involvement of the patient in treatment decision making; and documentation of the psychiatric evaluation. Each guideline recommends or suggests topics to include during an initial psychiatric evaluation. Findings from an expert opinion survey have also been taken into consideration in making recommendations or suggestions. In addition to reviewing the available evidence on psychiatry evaluation, each guideline also provides guidance to clinicians on implementing these recommendations to enhance patient care.

TOWARDS THE LOCAL GOVERNMENT'S INTEGRATED ACCOUNTABILITY FRAMEWORK

A CRITICAL LESSON FROM SOCIO-ENVIRONMENTAL ISSUES IN INDONESIA

Springer Nature This book shows the growing phenomenon and the broad impact of socio-environmental conflicts in the grassroots communities—farmers, fishermen and urban poor—in Indonesia, as the effects of government's development strategies based on neoliberal and New Public Management (NPM) views without a clear accountability system or socio-environmental accountability practices and reports are becoming apparent. Inspired by the emancipatory socio-environmental accounting discourse, which focuses on the socio-local context in developing alternative models of accountability based on local views and people's aspirations, this book uses research methodology based on the principles put forth by Indonesian national hero and critical scholar Tan Malaka to develop a framework of integrated accountability for the local government. This book fills the present gap in English publications that analyse the intents and outcomes of the public management reforms in Indonesia with regard to socio-environmental issues, as a basis for further research at the international level as well as policymaking in Indonesia. As the Indonesian government has recently undertaken key structural and accounting reforms in the public sector, this book is a timely and valuable read for graduate students, researchers, - and policymakers.
