Trade the Markets with an Edge *CreateSpace* This is an important book discussing the use of different strategies methods about trading. It was written by over 30 expert traders. The book was designed to help you develop your own trading edge in the markets to put you above others who don't have an edge and just trade by the seat of their pants. 90% of traders actually lose in the markets and the main reason is simply that they don't have an edge. All of the writers in this book are very experienced and knowledgeable of different ways. Each of them has their own expertise in trading the markets. What sets these traders apart from other traders? Many think that beating the markets has something to do with discovering and using some secret formula. The traders in this book have the right attitude and many employ a combination of fundamental analysis, technical analysis principles and formulas in their best trading strategies. This gives them a trading edge over other traders. If you want to be successful at trading, you too must have your edge. One needs to find successful trading strategies and implement them in their own trading method. The purpose of this book is to present to you the best trading strategies of these traders so that you might be able to select those that fit you best and then implement them into your own trading style. I wish to express my appreciation to all the writers in this book who made the book possible. They have spent many hours of their time and hard work in writing their section of the book and the putting together their video presentation for the online expo.

Gann Masters *CreateSpace* As you know, W.D. Gann was a legendary trader. Some say he amassed a fortune in the the markets. He died in 1955. He wrote several important books on trading as well as a commodity trading course and a stock market trading course. He charged \$3000 to \$5000 for the trading courses which included 6 months of personal instruction by phone. The

books and courses were written in veiled language which is almost impossible to understand by the average person. I have found many successful traders used the techniques of W.D. Gann. Due to the overwhelming interest in the W.D. Gann trading techniques, I created the Gann Masters Trading Course to help traders become successful. The course was created in combination with asking large traders how they used the techniques of W.D. Gann. This was put together in an easy-to-understand course designed for the average person. The course includes dozens of charts and illustrations which were not included in the courses of W.D. Gann. The course length is 200 pages. An Excel template was also developed to help the students with master table and circle charts. It is included with the course. It has electronic versions of all the master charts including the square of 4 and 9. It is possible to extend these master charts out to infinity with the Excel template. You should NEVER attempt Trading or Investing without it! My 25 years experience has taught me that 'Every book on the market' regarding Charting and Technical Analysis are seemingly worthless! All seem to find yet another creative way to tell you to "Buy Low and Sell High!" And they offer NO in-depth understanding or analysis about WHO is buying and WHO is selling, and when. Point is, anyone, experienced or not, can show you a picture of a Chart and tell you to buy at the bottom and sell at the top. That is simple 'hindsight', and is always 20/20! This book is different! It is IN-DEPTH - EXPLAINED and you WILL learn price movements and technical analysis from this information! You will understand and recognize tops and bottoms in the market and in particular stocks, AS they are forming. This is highly valuable information, and you should NEVER attempt to trade or invest without this knowledge! Mutual Funds? Most people think they do not need this information because they have a Mutual Fund. That could not be farther from the truth. Investing your hard-earned money should be done with your own knowledge of market direction, when to buy, and when to move your money to safety. Without this knowledge you are at the mercy of a salesperson hungry to earn a commission. Thus, invariably entering the market at the wrong time and in the wrong investment. No one else has your best interest in mind, either learn to protect your money or keep it in the bank. It's that simple. The next move is yours.
