THE HANDBOOK OF BACH FLOWER REMEDIES FOR ANIMALS

Singing Dragon Bach Flower Remedies are dilutions of flower material developed by Edward Bach, an English physician and homeopath, in the 1930s. This practical handbook explains how Bach Flower Remedies can be highly effective for treating both behavioural and physical complaints in animals. Based on strong scientific research and detailed case studies, this book is a comprehensive resource that helps find solutions to common animal health and behaviour issues. The book lists each of the 38 flower remedies, explaining their properties and applications for both animals and humans. It then looks at specific animal ailments including conjunctivitis, allergies and phobias, and demonstrates how these problems can be successfully addressed using flower remedies. Practical advice about how to prepare and administer the remedies is included, as well as guidelines for using flower remedies in animal shelters. This book will be a valuable addition to the bookshelves of all pet owners, animal shelter workers, vets, ethologists and anyone with an interest in complementary and alternative medicines.

FACIAL REFLEXOLOGY - DIEN CHAN ZONE

A PRACTICAL HANDBOOK WITH MAPS AND IMAGES

Anima Srl "The key to health is on your face and in your hands" This book presents a self-care method unique in its genre, which offers extraordinary, sometimes amazing and often immediate results for all kinds of disharmony in the body. The method began life in 1980s Vietnam - like many important discoveries, a result of war and necessity - independent of resource availability. It was developed by a group of acupuncturists to put healing in the hands of the masses by replacing needles with equally effective blunt rounded tools. It is the most recent reflexology on the planet and has nothing to do with other oriental techniques related to the face. Today 'Dien Chan' is a popular and accepted method of healthcare in its home country and part of their official system. However, it is the work of two self declared Italian 'free-sprits', over the past twenty years, which has suitably translated the technique and advanced it to meet the needs of modern Westerners. No longer a painful stimulation of pre-defined points; it has evolved to a relaxing massage of zones and individual, personalised points. 'Dien Chan Zone' incorporates simplified principles and teachings of Traditional Chinese Medicine, protocols for allergies and intolerances, a unique Facial-Cranial reflexology and a beauty treatment to tone muscle and regulate skin function. It is the authors' overriding intention to facilitate learning and to make this method accessible to everyone. In this book they share full instructions for self-treatment which they know present a great frontier of freedom, and the medicine of the future. Contains 95 full colour maps
Beatrice Moricoli, founder of S.I.R.F.A./A.I.R.F.I. in Milan, is the first female teacher of Dien Chan (Zone) in Italy, but for many years has practiced also as a therapist and teacher of Reiki, Shiatsu, Tui Na, Chinese Medicine and 'The Blowing Technique'. Vittorio Bergagnini, founder of S.I.R.F.A./A.I.R.F.I. in Milan, is a teacher of Dien Chan Zone as well as Tai Chi Chuan, Reiki, Foot Reflexology and Wung Chun.

THE CELESTINE PROPHECY

Grand Central Publishing **THE #1 BESTSELLING INTERNATIONAL PHENOMENON - NOW WITH A NEW PREFACE** You have never read a book like this before--a book that comes along once in a lifetime to change lives forever. In the rain forests of Peru, an ancient manuscript has been discovered. Within its pages are 9 key insights into life itself -- insights each human being is predicted to grasp sequentially; one insight, then another, as we move toward a completely spiritual culture on Earth. Drawing on ancient wisdom, it tells you how to make connections among the events happening in your life right now and lets you see what is going to happen to you in the years to come. The story it tells is a gripping one of adventure and discovery, but it is also a guidebook that has the power to crystallize your perceptions of why you are where you are in life and to direct your steps with a new energy and optimism as you head into tomorrow. Praise for The Celestine Prophecy "A gripping adventure story filled with intrigue, suspense, and spiritual revelations." - Commonwealth Journal "A spiritual classic...a book to read and reread, to cherish, and to give to friends." - Joan Borysenko, PhD, author of Fire in the Soul "In his inimitable style of great storytelling, Redfield opens us up to a world of insight, inspiration, synchronicity, and power." - Deepak Chopra

GEMMOTHERAPY, AND THE SCIENTIFIC FOUNDATIONS OF A MODERN MERISTEMOTHERAPY

Cambridge Scholars Publishing This book reports on the current state of meristemotherapy (also called gemmotherapy or budtherapy) and its possible future directions. Meristemotherapy focuses on the growth of plants, and is based on analytical studies, pre-clinic research, clinical trials and activity tests. The book investigates the determination of preparation methods, collateral effects, posology, and administration methods.

THE ILLUSTRATED ENCYCLOPEDIA OF ESSENTIAL OILS

THE COMPLETE GUIDE TO THE USE OF OILS IN AROMATHERAPY AND HERBALISM

Element Books Limited A guide to the most commonly available aromatherapy oils. It gives vital information on plant origins, medical herbalism and the properties and actions of herbs and essential oils. The book covers 165 oils, their actions, characteristics, principal constituents and folk traditions, as well as safety data, and aromatherapy and home use.

RIVISTERIA

GIORNALE DELLA LIBRERIA

THE FARMER AND THE OBSTETRICIAN

Free Assn Books In his new book Michel Odent shows how farming and childbirth have been industrialized side by side during the 20th century - with dramatic and disturbing consequences. The similarities are striking. In both cases innovations have been presented as the long awaited solution to an old problem: the advent of powerful synthetic insecticides has, overnight, dramatically reduced the costs and increased agricultural productivity; the advent of the modern safe technique of caesarean section has offered serious new reasons to create gigantic obstetrical departments. In both spheres a small number of skeptics voiced doubts and fears concerning the negative long-term consequences of the widespread use of novel, little tested practices; although these repeated warnings initially went unheeded, they have motivated the development of "alternative" approaches and movements. At the turn of the new century the history of industrialized farming has suddenly speeded up. A collective global awareness has been sparked by a series of disasters, particularly "mad cow" and foot and mouth diseases. Industrialized childbirth has not yet reached the same phase of its history, but the parallels between these two industries suggest that there is more to link the farmer and the obstetrician than we had all realized..

L'ALTROVE NEGLI OCCHI DELLE DONNE

Attilio Fortini Il libro raccoglie le testimonianze di sette donne immigrate provenienti da Brasile, Libano, Marocco, India, Albania, Ghana, Romania, che lasceranno un marchio indelebile e affascinante in colei che le ha intervistate, per un epilogo in cui l'autrice stessa deciderà di prendere la strada per il suo "nuovo mondo".

THE GRAMMAR OF FANTASY

AN INTRODUCTION TO THE ART OF INVENTING STORIES

Enchanted Lion Books A collection of essays from the visionary storyteller Gianni Rodari about fairy tales and folk tales and their great advantages in teaching creative storytelling. "Rodari grasped children's need to play with life's rules by using the grammar of their own imaginations. They must be encouraged to question, challenge, destroy, mock, eliminate, generate, and reproduce their own language and meanings through stories that will enable them to narrate their own lives." --Jack Zipes "I hope this small book," writes renowned children's author Gianni Rodari, "can be useful for all those people who believe it is necessary for the imagination to have a place in education; for all those who trust in the creativity of children; and for all those who know the liberating value of the word." Full of ideas, glosses on fairytales, stories, and wide-ranging activities, including the fantastic binomial, this book changed how creative arts were taught in Italian schools. Translated into English by acclaimed children's historian Jack Zipes and illustrated for the first time ever by Matthew Forsythe, this edition of The Grammar of Fantasy is one to live with and return to for its

humor, intelligence, and truly deep understanding of children. A groundbreaking pedagogical work that is also a handbook for writers of all ages and kinds, *The Grammar of Fantasy* gives each of us a playful, practical path to finding our own voice through the power of storytelling. Gianni Rodari (1920-1980) grew up in Northern Italy and wrote hundreds of stories, poems, and songs for children. In 1960, he collaborated with the Education Cooperation Movement to develop exercises to encourage children's creative and critical thinking abilities. Jack Zipes is a renowned children's historian and folklorist who has written, translated, and edited dozens of books on fairytales. He is a professor at the University of Minnesota. Matthew Forsythe lives in Montreal where he draws and paints for picture books, comics, and animations.

WHY THE GARDEN CLUB COULDN'T SAVE YOUNGSTOWN

THE TRANSFORMATION OF THE RUST BELT

Harvard University Press In this book, Sean Safford compares the recent history of Allentown, Pennsylvania, with that of Youngstown, Ohio. Allentown has seen a noticeable rebound over the course of the past twenty years. Facing a collapse of its steel-making firms, its economy has reinvented itself by transforming existing companies, building an entrepreneurial sector, and attracting inward investment. Youngstown was similar to Allentown in its industrial history, the composition of its labor force, and other important variables, and yet instead of adapting in the face of acute economic crisis, it fell into a mean race to the bottom. Challenging various theoretical perspectives on regional socioeconomic change, *Why the Garden Club Couldn't Save Youngstown* argues that the structure of social networks among the cities' economic, political, and civic leaders account for the divergent trajectories of post-industrial regions. It offers a probing historical explanation for the decline, fall, and unlikely rejuvenation of the Rust Belt. Emphasizing the power of social networks to shape action, determine access to and control over information and resources, define the contexts in which problems are viewed, and enable collective action in the face of externally generated crises, this book points toward present-day policy prescriptions for the ongoing plight of mature industrial regions in the U.S. and abroad.

OBSELETE OBJECTS IN THE LITERARY IMAGINATION

RUINS, RELICS, RARITIES, RUBBISH, UNINHABITED PLACES, AND HIDDEN TREASURES

Yale University Press Translated here into English for the first time is a monumental work of literary history and criticism comparable in scope and achievement to Eric Auerbach's *Mimesis*. Italian critic Francesco Orlando explores Western literature's obsession with outmoded and nonfunctional objects (ruins, obsolete machinery, broken things, trash, etc.). Combining the insights of psychoanalysis and literary-political history, Orlando traces this obsession to a turning point in history, at the end of eighteenth-century industrialization, when the functional becomes the dominant value of Western culture. Roaming through every genre and much of the history of Western literature, the author identifies distinct categories into which obsolete images can be classified and provides myriad examples. The function of literature, he concludes, is to remind us of what we have lost and what we are losing as we rush toward the future.

FLOWER HUNTERS

Oxford University Press, USA This fascinating account of eleven remarkable, eccentric, dedicated, and sometimes obsessive individuals that established the science of botany brings to life these extraordinary adventurers and draws out the scientific and cultural value of their work and its legacy.

INTERNATIONAL PERSPECTIVES ON SPINAL CORD INJURY

World Health Organization "Every year between 250 000 and 500 000 people suffer a spinal cord injury, with road traffic crashes, falls and violence as the three leading causes. People with spinal cord injury are two to five times more likely to die prematurely. They also have lower rates of school enrollment and economic participation than people without such injuries. Spinal cord injury has costly consequences for the individual and society, but it is preventable, survivable and need not preclude good health and social inclusion. Ensuring an adequate medical and rehabilitation response, followed by supportive services and accessible environments, can help minimize the disruption to people with spinal cord injury and their families. The aims of *International perspectives on spinal cord injury* are to: -- assemble and summarize information on spinal cord injury, in particular the epidemiology, services, interventions and policies that are relevant, together with the lived experience of people with spinal cord injury; --make recommendations for actions based on this evidence that are consistent with the aspirations for people with disabilities as expressed in the Convention on the Rights of Persons with Disabilities.

METAPHORS IN MIND

TRANSFORMATION THROUGH SYMBOLIC MODELLING

Crown House Pub Limited Describing how to give individuals an opportunity to discover how their symbolic perceptions are organized, what needs to happen for these to change, and how they can develop as a result, this text includes

three client transcripts.

HEAL THYSELF

Random House Dr Bach reveals the vital principles that are influencing some of the more advanced members of the medical profession today and will guide medical practice in the near future.

MAN'S ETERNAL QUEST

Self Realization Fellowship Pub In this first volume of the collected talks and essays of Paramahansa Yogananda, readers will journey through some little-known and seldom-explained aspects of meditation, life after death, healing, and the power of the mind.

IN AND OUT THE GARBAGE PAIL

THE SWALLOWS OF MONTE CASSINO

A NOVEL

New Academia+ORM The Strega Prize-winning author of *The Girl with a Leica* delivers a novel that hinges on one of the bloodiest World War II battles and those who fought it. In this highly original novel, Janeczek retells the four-month-long Battle of Monte Cassino from the point of view of the Maori, Gurkha, Polish, North African, small-town American and other Allied foot soldiers who fought and died under German fire near that 6th century Benedictine abbey. Twined through the battle is another story, a memory of the drowned and the saved in Janeczek's own family in wartime Eastern Europe, where Jews who did not go to Nazi death camps went to Soviet gulag camps, and sometimes survived, and even went on to fight at Monte Cassino. A powerful reflection on all the ways that rights can be taken from us. "Helena Janeczek's novel is this: a tattoo etched on the skin, and not painlessly. A vast design that brings together threads from all the various lives that converged in that legendary battle. The beauty of her tale lies in its structure, the way opposites converge: the chaos of battle and the silence of the defeated, ordinariness and the heroism of the powerless, carefully guarded memory and impetuous youth, the past perpetually intertwined with the present." —Roberto Saviano, author of *Gomorra*

DEPRESSION AND HEART DISEASE

John Wiley & Sons Recently, there has been a growing awareness of the multiple interrelationships between depression and various physical diseases. Patients with psychiatric problems, particularly depression, may be more susceptible to cardiovascular disorders. *Depression and Heart Disease* synthesizes current evidence, including some previously unpublished data, in a concise, easy-to-read format. The authors succinctly describe the epidemiology, pathogenesis (including cytokines and genetics), and risk factors of the comorbidity between depression and heart disease. The book also reviews the best pharmacological and psychotherapeutic approaches for people with this comorbidity.

Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally

available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

EVIDENCE-BASED OTITIS MEDIA

PMPH-USA Evidence-Based Otitis Media offers one-stop shopping for the best current evidence to guide management decisions at the individual, organizational, and societal levels. This text details the importance of evidence-based data in interpreting the ever-enlarging body of literature on otitis media. The editors have assembled an impressive group of experts on all aspects of otitis media and addressed comprehensively many issues related to methodology, clinical management, and consequences of this disease. The eight chapters comprising the methodology section provide the necessary background and detail to allow physicians and other health professionals to understand and appreciate the value of evidence-based medicine. Updates include: the incorporation of new original research, systemic reviews, and evidence reports to existing chapters. New chapter topics include: evidence-based medicine, professional evidence reports, molecular and translational research, complementary and alternative medicine, bacteriologic efficacy of antimicrobials, vaccine prevention, international management perspectives, meta-analysis of speech and language sequelae, suppurative complications, host susceptibility to sequelae, and judicious use of systemic and topical antimicrobials. FEATURES: *Maturation of evidence-based medicine as a foundation for clinical care is reflected throughout the text. *Extensive evidence tables summarize study characteristics and quantitative outcomes for clinically relevant endpoints *Internationally distinguished contributors selected based on both their clinical expertise and their ability to write for an evidence-based text

THE NEUROGENESIS DIET AND LIFESTYLE

UPGRADE YOUR BRAIN, UPGRADE YOUR LIFE

"Only recently has it been discovered that the brain produces new brain cells throughout our entire lives, a process called neurogenesis. The rate at which we form new brain cells has a profound influence upon every aspect of our life. When the rate of neurogenesis is low, we see cognitive deficits and memory problems, anxiety and stress, depression, and lowered immunity. Life is difficult. With high rates of neurogenesis we see the opposite: enhanced cognitive abilities, rapid learning, emotional resilience, protection from anxiety, stress and depression, heightened immunity and robust health. We flourish. Life is wonderful. Given the neurotoxic norms of society, it's almost universally true that your brain is working far below its capacity. It is deteriorating much faster than it needs to. What good is living longer if your brain can't go the distance? Recent discoveries in the emerging field of neurogenesis reveal the secrets to radically improve your brain's health. You can operate at a higher level than you ever dreamed possible--at any age!" --

NARRATOLOGY

THE FORM AND FUNCTIONING OF NARRATIVE

Walter de Gruyter

WRIGHT E L'ITALIA (1910-1960)

STROKE NURSING

John Wiley & Sons Stroke Nursing is the leading guide for optimal stroke care, facilitating the provision of evidence-based practice across the stroke journey, and covering the sixteen elements of care outlined in the UK's Stroke-Specific Education Framework (SSEF). Drawing from years of clinical and research experience, the authors provide practical guidance on the essential areas of stroke nursing, including stroke classification, stabilisation, thrombolysis and thrombectomy, rehabilitation and recovery, nutrition and oral care, palliative and long-term care, physical impairment management, and more. Now in its second edition, this indispensable guide helps practitioners expand their knowledge, skills and competence in all areas of stroke nursing services. Adopts a practical and evidence-based approach to stroke management, exploring UK and international perspectives Authored by expert clinicians and leaders in the field of nursing practice, research and education Includes updated case studies and practice examples, expanded coverage of clinical application in practice, and new discussions of the knowledge and skills required by nurses Stroke Nursing is essential reading for students of nursing and neuroscience, and is the definitive reference for practicing nurses and healthcare professionals caring for stroke patients.

THE IDEA OF NATURE IN DISNEY ANIMATION

FROM SNOW WHITE TO WALL-E

Routledge In the second edition of The Idea of Nature in Disney Animation, David Whitley updates his 2008 book to reflect recent developments in Disney and Disney-Pixar animation such as the apocalyptic tale of earth's failed ecosystem, WALL-E. As Whitley has shown, and Disney's newest films continue to demonstrate, the messages animated films convey about the natural world are of crucial importance to their child viewers. Beginning with Snow White, Whitley examines a wide range of Disney's feature animations, in which images of wild nature are central to the narrative. He challenges the notion that the sentimentality of the Disney aesthetic, an oft-criticized aspect of such films as Bambi, The Jungle Book, Pocahontas, Beauty and the Beast, and Finding Nemo, necessarily prevents audiences

from developing a critical awareness of contested environmental issues. On the contrary, even as the films communicate the central ideologies of the times in which they were produced, they also express the ambiguities and tensions that underlie these dominant values. In distinguishing among the effects produced by each film and revealing the diverse ways in which images of nature are mediated, Whitley urges us towards a more complex interpretation of the classic Disney canon and makes an important contribution to our understanding of the role popular art plays in shaping the emotions and ideas that are central to contemporary experience.

RELIGION

Schopenhauer is one of the few philosophers who can be generally understood without a commentary. All his theories claim to be drawn direct from the facts, to be suggested by observation, and to interpret the world as it is; and whatever view he takes, he is constant in his appeal to the experience of common life. This characteristic endows his style with a freshness and vigor which would be difficult to match in the philosophical writing of any country, and impossible in that of Germany. If it were asked whether there were any circumstances apart from heredity, to which he owed his mental habit, the answer might be found in the abnormal character of his early education, his acquaintance with the world rather than with books, the extensive travels of his boyhood, his ardent pursuit of knowledge for its own sake and without regard to the emoluments and endowments of learning. He was trained in realities even more than in ideas; and hence he is original, forcible, clear, an enemy of all philosophic indefiniteness and obscurity; so that it may well be said of him, in the words of a writer in the *Revue Contemporaine*, *ce n'est pas un philosophe comme les autres, c'est un philosophe qui a vu le monde.*

THE SHAWL

Vintage From the winner of the National Book Critics Circle Award comes a story about the Holocaust that "burns itself into the reader's imagination with almost surreal powers" (*The New York Times*). "Read this great little book of Cynthia Ozick's: It contains dazzling staggering pages filled with sadness and truth." —Elie Wiesel, *Chicago Tribune* A devastating vision of the Holocaust and the unfillable emptiness it left in the lives of those who passed through it.

ON COLLECTIVE MEMORY

University of Chicago Press How do we use our mental images of the present to reconstruct our past? Maurice Halbwachs (1877-1945) addressed this question for the first time in his work on collective memory, which established him as a major figure in the history of sociology. This volume, the first comprehensive English-language translation of Halbwach's writings on the social construction of memory, fills a major gap in the literature on the sociology of knowledge. Halbwachs' primary thesis is that human memory can only function within a collective context. Collective memory, Halbwachs asserts, is always selective; various groups of people have different collective memories, which in turn give rise to different modes of behavior. Halbwachs shows, for example, how pilgrims to the Holy Land over the centuries evoked very different images of the events of Jesus' life; how wealthy old families in France have a memory of the past that diverges sharply from that of the *nouveaux riches*; and how working class construction of reality differ from those of their middle-class counterparts. With a detailed introduction by Lewis A. Coser, this translation will be an indispensable source for new research in historical sociology and cultural memory. Lewis A. Coser is Distinguished Professor of Sociology Emeritus at the State University of New York and Adjunct Professor of Sociology at Boston College.
