Flash 8: The Missing Manual "O'Reilly Media, Inc." Macromedia's Flash 8 is the world's premier program for adding animation to websites. And with the latest version, this popular program becomes more versatile, letting beginning webmasters and expert developers alike create sophisticated web content. But Flash isn't intuitive. And it doesn't come with a manual. Whether you want to learn the basics or unleash the program's true power, Flash 8: The Missing Manual is the ideal instructor. This hands-on guide to today's hottest web design tool is aimed at nondevelopers, and it teaches you how to translate your ideas into great web content. It begins with a solid primer on animation, which helps you get comfortable with the Flash interface. Once you have these basics under your belt, Flash 8: The Missing Manual moves on to advanced animations, including adding special effects and audio, video, and interactivity to your presentations. When you're really feeling steady, the book shows how to use a dollop of ActionScript to customize your content. It then teaches you how to publish your Flash creations for web surfers everywhere to enjoy. Along the way, the book shows you good design principles and helps you avoid elements that can distract or annoy an audience. Author Emily Vander Veer has more than a dozen books to her credit, including titles on web design and scripting--most written for non-technical readers. Her background makes her the perfect author for a straightforward book on a complex subject. She takes Flash 8: The Missing Manual from the basics to the advanced, yet avoids a hasty jump into tough topics that can leave readers confused. Not only will Flash 8: The Missing Manual help you turn a concept into unique, dynamic content, but it will continue to serve as a reference as you develop your website. **Flash CS3: The Missing Manual** "O'Reilly Media, Inc." Starting working with new software immediately regardless of your level . Achieve professional results, learn practical skills from industry experts . Focused, user-friendly coverage of the key tools you need to know Flash 8: Projects for Learning Animation and Interactivity Projects for Learning Animation and Interactivity "O'Reilly Media, Inc." Macromedia Flash is fast becoming the Web's most widely used platform for creating rich media with animation and motion graphics, but mastering Flash isn't easy. Most entry-level books teach through simple examples that concentrate on either animation or scripting, but rarely both together. To get the most from Flash 8, you not only need to be proficient in programming/interface design, you need the creativity for story telling and the artistic insights to design fluid animation. Flash 8: Projects for Learning Animation and Interactivity teaches Flash design rather than simply Flash itself. With a standalone series of walkthroughs and tutorials for Flash beginners coming from a graphics field, this book teaches Flash in the context of real-world projects. Rather than learn a Flash tool for the sake of it, you learn which areas of Flash are important, and which are less used, simply by seeing how typical content is actually created. And rather than a text-heavy approach, this graphically rich book leads you through hands-on examples by illustration. Each project in the book starts with goals and broad sketches before moving to design and scripting. This helps you understand design intent-the why of the process-rather than just learning the interfaces and the how of it all. Along the way, you'll create Flash content that includes traditional animation techniques (as seen in full-length animated features), and ActionScript-based interactive animation, such as custom web site interface designs. You also learn how to combine both traditional animation techniques and ActionScript to create feature-rich Flash assets from the ground up. Co-authored by educational developers with years of experience creating compelling content, interfaces, and applications, Flash 8: Projects for Learning Animation and Interactivity offers a content-driven approach that is also inspiration-driven. You learn because you're accomplishing something tangible, not because you think you need to know how a tool works. If you want to understand how various features of Flash come together to create a final end design, this book provides you with both the insight and the know-how. Foundation Actionscript 3.0 Animation Making Things Move! friendsofED Provides information on using Flash ActionScript to create realistic motion in computer animation. Tradiginal Flash A CG Animator's Guide to Applying the Classic Principles of Animation Focal Press There's more to animation that just software shortcuts. "Tradiginal Flash" shows you how to animate in Flash like a professional. Though Flash animation has been the standard for 2D animation in video games, television, advertising, on the web for over a decade, there's been precious little instruction on achieve top results...by creating fluid, convincing motion or truly appealing characters. Leverage the timeless principles of classical animation, as originally outlined by Disney animators Ollie Johnston and Frank Thomas in the 1930s, and learn to make Flash work for you. Few books offer pearls on how to make animation artistically compelling. "Tradigital" books are unique in their coverage of animation principles (arcs, exaggeration, timing, weight, etc) and how to implement them in your program of choice. Michaelis explains why the principles are important, and shows you just how to implement them in Flash. Birgitta Hosea uses tried and tested material based on her teaching, breaking down the software into its main components and providing lots of screenshots and simple step-by-step instructions. This encourages you to get the most out of the programme and fully develop your skills, whilst allowing those with particular needs to 'jump ahead'. The structure and style, influenced by her commercial and creative expertise, allows you either as a student or professional to dip in and out according to the needs of your specific projects, but also allows the exploration of the programmes capability when you have more time. It is a generalist, accessible, visual and a truly introductory guide, written from the perspective of a designer with a thorough coverage of the basic features of Flash MX 2004, without going into in-depth coding with ActionScript. Birgitta Hosea is a motion graphics artist and Course Director of the London Animation Studio at Central Saint Martins College of Art and Design. Her experience ranges from designing idents and promotional materials to working as an Art Director on pop promos and short films.
