THE WRITING REVOLUTION

A GUIDE TO ADVANCING THINKING THROUGH WRITING IN ALL SUBJECTS AND GRADES

John Wiley & Sons "HELP! My Students Can't Write!" Why You Need a Writing Revolution in Your Classroom and How to Lead It. The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, TWR can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities TWR is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.

EBOOK: NEW STRUCTURE OF SCHOOL IMPROVEMENT

McGraw-Hill Education (UK) Self renewing schools where students and staff are involved in ongoing inquiry has long since been an ideal in education. However, this goal has not proved readily achievable. The authors of this book regard this as a challenge which can be confronted positively, believing that enough knowledge exists to develop a fresh structure of school improvement - and one which is likely to succeed. The book draws upon the considerable body of research on successful and unsuccessful school improvement programs to generate a practical strategy for school improvement that can be used by schools, school districts and local education authorities, and policymakers with a high probability of success. The heart of the strategy is an inquiry process centered on the continuous study of student learning and the creation and study of initiatives to enhance student achievement in academic, personal and social domains. The school as a workplace is altered dramatically with the inclusion of study time for teachers, continuous staff development and the organization of a governance structure which includes school staff, parents, community agencies, business partners and local district or education authority personnel. This timely and important book is vital reading for anyone with an interest in improving schools and the quality of education today.
