COMMUNICATION IN ACCOUNTING EDUCATION

Routledge Accounting, often described as "the language of business", requires a diverse set of written, listening and oral communication skills if those who practise it are to be effective. Given the pace of change relating to, for example, the evolution of international accounting standards and the demands for greater transparency, accountants must be clear, responsive, and audience-focussed communicators. Employers of accountants consistently comment on the need for their new graduate recruits and trainees to have strong written, oral, and interpersonal communication skills. In this light accounting educators face the challenge of designing and delivering programmes that reflect professional expectations on the part of employers and clients, and educating students on how to make informed communication choices in order to achieve desired results and to build good working relationships. The chapters in this book deal with such topics as accounting students' perceptions of oral communication skills; competence-based writing skills; and the development of listening skills. This book was originally published as Accounting Education: an international journal.

GENERAL ACCOUNTING AND AUDITING DEVELOPMENTS

CRITICAL HISTORIES OF ACCOUNTING

SINISTER INSCRIPTIONS IN THE MODERN ERA

Routledge The critical tradition in accounting historiography has come to occupy a prominent place in the discipline's academic scholarship. Some critical literature has confronted the responsibility of accounting and accountants in precipitating contemporary crises, such as the audit failures that spawned Sarbanes-Oxley and the world-wide recession. Certain contemporary issues have long histories, such as the difficulties encountered by women to break the glass ceiling in public accounting, and the suffering of indigenous peoples under the imperialistic yoke. Other episodes in accounting's long history are seemingly more divorced from the present, but in reality they all have contemporary significance. Slavery in the New World, for example, although abolished more than a century ago, is still rampant in parts of the world, albeit less formally. Critical accounting historians feel it a duty to harken to the "suppressed voices" of the past, those groups of people who had no access to an accounting record - women, persons of color, indigenous populations, alienated proletarians, victims of governmental incompetence and graft, and many voiceless others. Critical Histories of Accounting: Sinister Inscriptions in the Modern Era draws on the foremost work in this developing literature, both that authored by the co-editors of this volume, and that written by others. Editors Richard K. Fleischman, Warwick N. Funnell, and Steve Walker have written extensively about "the dark side of accounting," gauging the complicity of those performing accounting functions in episodes in human history that are at worst evil and at best reprehensible. The editors have also hand-selected a series of historical and contemporary episodes that have been critically investigated by the wider accounting history community, preceded by a thorough introduction.

RESEARCH ON PROFESSIONAL RESPONSIBILITY AND ETHICS IN ACCOUNTING

Emerald Group Publishing Intends to offer research and cases that focus on the professional responsibilities of accountants and how they deal with the ethical issues they face. This series features articles on a range of important topics, including professionalism, social responsibility, corporate responsibility, ethical judgments, and accountability.

BEYOND DEMOGRAPHIC DIVIDENDS

World Scientific This book presents empirical observations and theoretical thinking of the fundamental changes in the Chinese economy. It starts with a warning of the arrival of the Lewis Turning Point, which is empirically proven by disappearance of surplus labor force and a rapid increase in wages of unskilled workers. It further reveals that China's rapid population-aging trend is diminishing the demographic dividend that has kept China's economic growth rate high. Subsequently, it touches upon employment challenges that arise after reaching the Lewis Turning Point, further propelling urbanization, a balanced regional development, and so on. Finally, it introduces middle-income trap which is one of the biggest challenges China is facing, followed by recommendation of policies for the Chinese government to tackle the challenges ahead. This book should be of great interest to graduates, undergraduates, researchers and specialists who follow closely the economic development and demographic transition of China, the world's most populous country.
